
CONTENTS

PREFACE *xix*

1. INTRODUCTION	1
CHARACTERISTICS OF SUCCESSFUL PRODUCT DEVELOPMENT	2
WHO DESIGNS AND DEVELOPS PRODUCTS	3
DURATION AND COST OF PRODUCT DEVELOPMENT	4
THE CHALLENGES OF PRODUCT DEVELOPMENT	5
APPROACH OF THIS BOOK	7
<i>Structured Methodologies</i>	7
<i>Industrial Examples</i>	8
<i>Organizational Realities</i>	8
<i>Road Map of the Book</i>	9
REFERENCES AND BIBLIOGRAPHY	10
EXERCISES	11
THOUGHT QUESTIONS	11
2. DEVELOPMENT PROCESSES AND ORGANIZATIONS	13
A GENERIC DEVELOPMENT PROCESS	14
CONCEPT DEVELOPMENT: THE FRONT-END PROCESS	18
ADAPTING THE GENERIC PRODUCT DEVELOPMENT PROCESS	20
<i>Technology-Push Products</i>	21
<i>Platform Products</i>	21
<i>Process-Intensive Products</i>	22
<i>Customized Products</i>	22
THE AMF DEVELOPMENT PROCESS	22
PRODUCT DEVELOPMENT ORGANIZATIONS	23

*Organizations Are Formed by Establishing Links among
Individuals* 23
*Organizational Links May Be Aligned with Functions, Projects,
or Both* 25
Choosing an Organizational Structure 26

THE AMF ORGANIZATION 28
 SUMMARY 30
 REFERENCES AND BIBLIOGRAPHY 31
 EXERCISES 32
 THOUGHT QUESTIONS 32

3. IDENTIFYING CUSTOMER NEEDS 33

STEP 1: DEFINE THE SCOPE OF THE EFFORT 36
 STEP 2: GATHER RAW DATA FROM CUSTOMERS 38
 Choosing Customers 39
 The Art of Eliciting Customer Needs Data 41
 Documenting Interactions with Customers 42
 STEP 3: INTERPRET RAW DATA IN TERMS OF CUSTOMER NEEDS 43
 STEP 4: ORGANIZE THE NEEDS INTO A HIERARCHY 46
 STEP 5: ESTABLISH THE RELATIVE IMPORTANCE OF THE NEEDS 48
 STEP 6: REFLECT ON THE RESULTS AND THE PROCESS 49
 SUMMARY 50
 REFERENCES AND BIBLIOGRAPHY 51
 EXERCISES 52
 THOUGHT QUESTIONS 52

4. ESTABLISHING PRODUCT SPECIFICATIONS 53

WHAT ARE SPECIFICATIONS? 54
 WHEN ARE SPECIFICATIONS ESTABLISHED? 56
 ESTABLISHING TARGET SPECIFICATIONS 57
 Step 1: Prepare the List of Metrics 57
 Step 2: Collect the Competitive Benchmarking Information 61
 *Step 3: Set Ideal and Marginally Acceptable Target
 Values for Each Metric* 64
 Step 4: Reflect on the Results and the Process 65
 REFINING THE SPECIFICATIONS 65
 Step 1: Develop Technical Models of the Product 67
 Step 2: Develop a Cost Model of the Product 69
 *Step 3: Refine the Specifications, Making Trade-Offs
 Where Necessary* 70

	<i>Step 4: Reflect on the Results and the Process</i>	71	
	SUMMARY		73
	REFERENCES AND BIBLIOGRAPHY		74
	EXERCISES		74
	THOUGHT QUESTIONS		75
5.	CONCEPT GENERATION		77
	THE TASK OF CONCEPT GENERATION IN PRODUCT DEVELOPMENT		78
	<i>Structured Approaches Reduce the Likelihood of Costly Problems</i>	79	
	<i>A Five-Step Methodology</i>	79	
	STEP 1: CLARIFY THE PROBLEM		81
	<i>Decompose a Complex Problem into Simpler Subproblems</i>	82	
	<i>Focus Initial Efforts on the Critical Subproblems</i>	84	
	STEP 2: SEARCH EXTERNALLY		84
	<i>Interview Lead Users</i>	85	
	<i>Consult Experts</i>	85	
	<i>Search Patents</i>	86	
	<i>Search Published Literature</i>	86	
	<i>Benchmark Related Products</i>	88	
	STEP 3: SEARCH INTERNALLY		88
	<i>Both Individual and Group Sessions Can Be Useful</i>	89	
	<i>Hints for Generating Solution Concepts</i>	90	
	STEP 4: EXPLORE SYSTEMATICALLY		91
	<i>Concept Classification Tree</i>	93	
	<i>Concept Combination Table</i>	95	
	<i>Managing the Exploration Process</i>	98	
	STEP 5: REFLECT ON THE SOLUTIONS AND THE PROCESS		100
	SUMMARY		101
	REFERENCES AND BIBLIOGRAPHY		102
	EXERCISES		103
	THOUGHT QUESTIONS		104
6.	CONCEPT SELECTION		105
	<i>Concept Selection Is An Integral Part of the Product Development Process</i>	106	
	<i>All Teams Use Some Method for Choosing a Concept</i>	107	
	<i>A Structured Methodology Offers Several Benefits</i>	111	
	OVERVIEW OF METHODOLOGY		111
	CONCEPT SCREENING		113

<i>Step 1: Prepare the Selection Matrix</i>	113	
<i>Step 2: Rate the Concepts</i>	114	
<i>Step 3: Rank the Concepts</i>	115	
<i>Step 4: Combine and Improve the Concepts</i>	115	
<i>Step 5: Select One or More Concepts</i>	115	
<i>Step 6: Reflect on the Results and the Process</i>	116	
CONCEPT SCORING		117
<i>Step 1: Prepare the Selection Matrix</i>	117	
<i>Step 2: Rate the Concepts</i>	118	
<i>Step 3: Rank the Concepts</i>	119	
<i>Step 4: Combine and Improve the Concepts</i>	119	
<i>Step 5: Select One or More Concepts</i>	119	
<i>Step 6: Reflect on the Results and the Process</i>	120	
CAVEATS		120
SUMMARY		122
REFERENCES AND BIBLIOGRAPHY		122
EXERCISES		123
THOUGHT QUESTIONS		124
APPENDIX A: SCREENING MATRIX EXAMPLE		124
APPENDIX B: SCORING MATRIX EXAMPLE		126

7. PRODUCT ARCHITECTURE **129**

WHAT IS PRODUCT ARCHITECTURE?		131
IMPLICATIONS OF THE ARCHITECTURE		133
<i>Product Change</i>	133	
<i>Product Variety</i>	134	
<i>Component Standardization</i>	135	
<i>Product Performance</i>	135	
<i>Manufacturability</i>	137	
<i>Product Development Management</i>	137	
ESTABLISHING THE ARCHITECTURE		138
<i>Step 1: Create a Schematic of the Product</i>	138	
<i>Step 2: Cluster the Elements of the Schematic</i>	140	
<i>Step 3: Create a Rough Geometric Layout</i>	142	
<i>Step 4: Identify the Fundamental and Incidental Interactions</i>	144	
RELATED SYSTEM-LEVEL DESIGN ISSUES		146
<i>Defining Secondary Systems</i>	146	
<i>Establishing the Architecture of the Chunks</i>	146	
<i>Migration of Functionality across Chunk Interfaces</i>	146	
<i>Creating Detailed Interface Specifications</i>	147	

SUMMARY	148
REFERENCES AND BIBLIOGRAPHY	148
EXERCISES	149
THOUGHT QUESTIONS	150
8. INDUSTRIAL DESIGN	151
WHAT IS INDUSTRIAL DESIGN?	154
ASSESSING THE NEED FOR INDUSTRIAL DESIGN	155
<i>Statistics on Expenditures for Industrial Design</i>	155
<i>How Important Is Industrial Design to a Product?</i>	156
<i>Ergonomic Needs</i>	157
<i>Aesthetic Needs</i>	157
THE IMPACT OF INDUSTRIAL DESIGN	158
<i>Is Industrial Design Worth the Investment?</i>	158
<i>How Does Industrial Design Establish a Corporate Identity?</i>	161
THE INDUSTRIAL DESIGN PROCESS	161
<i>Investigation of Customer Needs</i>	162
<i>Conceptualization</i>	162
<i>Preliminary Refinement</i>	164
<i>Further Refinement and Final Concept Selection</i>	164
<i>Control Drawings</i>	165
<i>Coordination with Engineering, Manufacturing, and External Vendors,</i>	165
<i>The Impact of Computer-Based Tools on the ID Process</i>	165
MANAGEMENT OF THE INDUSTRIAL DESIGN PROCESS	167
<i>Technology-Driven Products</i>	167
<i>User-Driven Products</i>	168
<i>Technology-and-User-Driven Products</i>	168
<i>Timing of Industrial Design Involvement</i>	169
ASSESSING THE QUALITY OF INDUSTRIAL DESIGN	172
1. <i>Quality of the User Interfaces</i>	172
2. <i>Emotional Appeal</i>	172
3. <i>Ability to Maintain and Repair the Product</i>	174
4. <i>Appropriate Use of Resources</i>	174
5. <i>Product Differentiation</i>	174
SUMMARY	175
REFERENCES AND BIBLIOGRAPHY	175
EXERCISES	176
THOUGHT QUESTIONS	177
9. DESIGN FOR MANUFACTURING	179
DESIGN FOR MANUFACTURING DEFINED	181

<i>DFM Requires a Cross-Functional Team</i>	181	
<i>DFM Is Performed throughout the Development Process</i>		182
<i>Overview of the DFM Methodology</i>	182	
ESTIMATE THE MANUFACTURING COSTS		183
<i>Fixed Costs versus Variable Costs</i>	185	
<i>The Bill of Materials</i>	186	
<i>Estimating the Costs of Standard Components</i>		187
<i>Estimating the Costs of Custom Components</i>	188	
<i>Estimating the Cost of Assembly</i>	189	
<i>Estimating the Overhead Costs</i>	190	
REDUCE THE COMPONENT COSTS		191
<i>Understand the Process Constraints and Cost Drivers</i>	191	
<i>Redesign Components to Eliminate Processing Steps</i>	192	
<i>Choose the Appropriate Economic Scale for the Part Process</i>		193
<i>Standardize Components and Processes</i>	193	
<i>Adhere to "Black Box" Component Procurement</i>	194	
REDUCE THE ASSEMBLY COSTS		195
<i>Keeping Score</i>	195	
<i>Integrate Parts</i>	196	
<i>Maximize Ease of Assembly</i>	197	
<i>Consider Customer Assembly</i>	198	
REDUCE THE SUPPORT COSTS		198
<i>Minimize Systemic Complexity</i>	199	
<i>Error Proofing</i>	200	
CONSIDER THE IMPACT OF DFM DECISIONS ON OTHER FACTORS		201
<i>The Impact of DFM on Development Time</i>	201	
<i>The Impact of DFM on Development Cost</i>	201	
<i>The Impact of DFM on Product Quality</i>	201	
<i>The Impact of DFM on External Factors</i>	202	
RESULTS		202
SUMMARY		204
REFERENCES AND BIBLIOGRAPHY		205
EXERCISES		206
THOUGHT QUESTIONS		206
APPENDIX A: MATERIALS COSTS		207
APPENDIX B: COMPONENT MANUFACTURING COSTS		208
<i>Terminology</i>	208	
<i>Description of Processes</i>	208	
APPENDIX C: ASSEMBLY COSTS		214
10. EFFECTIVE PROTOTYPING		217
PROTOTYPE BASICS		218

<i>What Is a Prototype?</i>	218	
<i>Types of Prototypes</i>	219	
<i>What Are Prototypes Used For?</i>	220	
PRINCIPLES OF PROTOTYPING		223
<i>Analytical Prototypes Are Generally More Flexible Than Physical Prototypes</i>	223	
<i>Physical Prototypes Are Required to Detect Unanticipated Phenomena</i>	223	
<i>A Prototype May Reduce the Risk of Costly Iterations</i>	224	
<i>A Prototype May Expedite Other Development Steps</i>	225	
<i>A Prototype May Restructure Task Dependencies</i>	225	
PLANNING FOR PROTOTYPES		226
<i>Step 1: Define the Purpose of the Prototype</i>	226	
<i>Step 2: Establish the Level of Approximation of the Prototype</i>	227	
<i>Step 3: Outline an Experimental Plan</i>	228	
<i>Step 4: Create a Schedule for Procurement, Construction, and Test</i>	228	
<i>Planning Milestone Prototypes</i>	229	
SUMMARY		230
REFERENCES AND BIBLIOGRAPHY		231
EXERCISES		231
THOUGHT QUESTIONS		232
11. ECONOMICS OF PRODUCT DEVELOPMENT PROJECTS		233
ELEMENTS OF ECONOMIC ANALYSIS		234
<i>Quantitative Analysis</i>	234	
<i>Qualitative Analysis</i>	235	
<i>When Should Economic Analysis Be Performed?</i>	235	
<i>Methodology</i>	236	
STEP 1: BUILD A BASE-CASE FINANCIAL MODEL		236
<i>Estimate the Timing and Magnitude of Future Cash Inflows and Outflows</i>	236	
<i>Compute the Net Present Value of the Cash Flows</i>	239	
<i>The Base-Case Financial Model Can Support Go/No-Go Decisions and Major Investment Decisions</i>	239	
STEP 2: SENSITIVITY ANALYSIS		240
<i>Development Cost Example</i>	240	
<i>Development Time Example</i>	242	
STEP 3: USE SENSITIVITY ANALYSIS TO UNDERSTAND PROJECT TRADE-OFFS		243

<i>Six Potential Interactions</i>	243	
<i>Trade-Off Rules</i>	245	
<i>Limitations of Quantitative Analysis</i>	246	
STEP 4: CONSIDER THE INFLUENCE OF THE QUALITATIVE FACTORS ON PROJECT SUCCESS		247
<i>Projects Interact with the Firm, the Market, and the Macro Environment</i>	247	
<i>Carrying Out Qualitative Analysis</i>	249	
<i>Example 1: Decrease in the Price of a Substitute Product</i>	250	
<i>Example 2: Increased Competition in a Complementary Product Market</i>	250	
<i>Example 3: The "Option" Value of Creating a Good Platform Product</i>	251	
SUMMARY		251
REFERENCES AND BIBLIOGRAPHY		252
EXERCISES		252
THOUGHT QUESTIONS		253
APPENDIX A: THE TIME VALUE OF MONEY AND THE NET PRESENT VALUE TECHNIQUE		253
<i>What Interest Rate Should We Use?</i>	255	
<i>Sunk Costs Are Irrelevant for Net Present Value Calculations</i>	255	
<i>Dealing with Uncertainty in the Cash Inflow and Outflow Estimates</i>	256	

12. MANAGING PRODUCT DEVELOPMENT PROJECTS 259

UNDERSTANDING AND REPRESENTING TASKS		260
<i>Sequential, Parallel, and Coupled Tasks</i>	260	
<i>The Design Structure Matrix</i>	262	
<i>Gantt Charts</i>	263	
<i>PERT Charts</i>	264	
<i>The Critical Path</i>	265	
BASELINE PROJECT PLANNING		265
<i>The Contract Book</i>	265	
<i>Project Task List</i>	266	
<i>Team Staffing and Organization</i>	268	
<i>Project Schedule</i>	269	
<i>Project Budget</i>	270	
<i>Project Risk Areas</i>	271	
<i>Modifying the Baseline Plan</i>	271	
ACCELERATING THE PROJECT		272

PROJECT EXECUTION	274
<i>Coordination Mechanisms</i>	274
<i>Assessing Project Status</i>	276
<i>Corrective Actions</i>	278
POSTMORTEM PROJECT EVALUATION	279
SUMMARY	280
REFERENCES AND BIBLIOGRAPHY	280
EXERCISES	281
THOUGHT QUESTIONS	282

<i>INDEX</i>	283
