

CONTENTS

Summary	1
A. Introduction	3
B. Background	5
C. Sampling and Characterisation of Sediments.....	8
1. Sampling of Sediments.....	8
2. Physical Characteristics.....	8
3. Chemical Characteristics.....	10
D. Fate of Chemicals on Sediments	14
1. Introduction	14
2. Association of Chemicals with Sediments	14
3. Degradation of Chemicals in Sediments	20
4. Fate Models	23
5. Conclusions	24
E. Bioavailability and Toxicity of Chemicals on Sediments	26
1. Introduction	26
2. Important Test Parameters	28
3. Procedures for Toxicity Testing in Sediments	32
4. Interpretation of Results	36
F. Hazard Assessment of Chemicals in Sediments	37
1. Criteria to determine the Need for Benthic Testing of New Chemicals.....	37
2. A Tiered Approach to Benthic Toxicity Testing.....	38
3. Exposure Assessment.....	40
4. Interpretation of Benthic Test Data - Hazard Assessment.....	41
G. Conclusions	43

Tables.....	45
Bibliography.....	49
Appendices.....	56
1. Experimental Methods for the Sampling and Characterisation of Sediments	56
2. Biodegradation Tests in Sediment Systems	61
3. Key Features of Environmental Fate Models	64
4. Members of the Task Force	66
5. Members of ECETOC Scientific Committee	67
