

CONTENTS

Preface	vii
Abbreviations	viii
Chapter One: Introduction	1
1 The background to OPT and current developments	1
1.1 Costs	2
Chapter Two: Manufacturing Philosophies	6
2 Introduction	6
2.1 The importance of the production function	6
2.2 The increasing importance of materials costs	7
2.2.1 Materials management	7
2.2.2 Dependent and independent demand	7
2.2.3 Planning independent demand items	8
2.2.4 Planning dependent demand items	8
2.2.5 Categorising dependent and independent demand items	9
2.3 Manufacturing resources planning (MRP II)	9
2.4 JIT	12
2.4.1 Push versus pull planning of production	14
2.4.2 The push-pull continuum	14
2.5 OPT	15
2.6 OPT, MRP II and JIT	17
Chapter Three: Manufacturing Performance Measurement System	23
3 Introduction	23
3.1 Throughput	23
3.2 Inventory	23
3.3 Operating expense	24
3.4 The role of these measures	24
Chapter Four: Scheduling and Synchronising Manufacturing With OPT	26

4	Introduction	26
4.1	The balanced plant myth	26
4.1.2	Statistical fluctuations	26
4.1.3	Dependent events	26
4.1.4	Summary	27
4.2	Bottlenecks and non-bottlenecks	27
4.2.1	Bottlenecks: limited numbers	28
4.2.2	Bottlenecks and capacity constraining resources	28
4.3	Scheduling and synchronising	29
4.3.1	The drum	32
4.3.2	The buffer	32
4.3.3	The rope	33
4.4	Plant categorisation	33

Chapter Five: OPT's Nine Rules of Manufacturing 37

5	Introduction	37
5.1	Rule 1	37
5.2	Rule 2	39
5.3	Rule 3	39
5.4	Rule 4	39
5.5	Rule 5	40
5.6	Rule 6	40
5.7	Rule 7	41
5.8	Rule 8	42
5.9	Rule 9	42

Chapter Six: OPT Software 45

6	Introduction	45
6.1	Stages in the scheduling process	45
6.2	OPT schedules	47
6.3	OPT scheduling versus MRP	48
6.4	OPT scheduling assumptions	49
6.5	Limitations imposed by the OPT assumptions	50
6.6	Recent developments in OPT software: OPT 21 and OPT 5000	50
6.6.1	OPT 21: building the production model	53
6.6.2	OPT: 21: the OPT network	53
6.6.3	OPT 21; scheduling – drum/buffer/rope	53
6.6.4	OPT 5000: building the production model	54
6.6.5	OPT 5000: the OPT network	54

6.6.6	OPT 5000: output reports	55
6.6.7	OPT 5000: scheduling	55
6.6.8	OPT 5000: mode of operation	55

Chapter Seven: OPT and the Organisation 56

7	Introduction	56
7.1	Implementation issues	56
7.1.1	Time scale	57
7.1.2	Investment	57
7.1.3	Pilot areas and programmes	58
7.1.4	Continual improvement and plant layout	59
7.2	Personnel issues	60
7.2.1	Arrangement of human resources	60
7.2.2	Redundancies	60
7.2.3	Pay system	61
7.2.4	Workforce responsibility	61
7.2.5	Unions	61
7.3	Accountancy measures	61
7.3.1	Local versus global measurement	62
7.3.2	The OPT alternative	63

Chapter Eight: OPT In Action — Case Studies 66

8	Introduction	66
8.1	Perkins Engines	66
8.1.1	Background	66
8.1.2	OPT implementation	67
8.1.3	Data collection and handling	68
8.1.4	Using OPT software	69
8.1.5	Personnel issues	70
8.1.6	Results	71
8.2	Textron Aerostructures	72
8.2.1	Background	72
8.2.2	OPT implementation	72
8.2.3	System selection	75
8.2.4	Merging OPT with MRP II	76
8.3	Allied Automotive Bendix Friction Materials Division	76
8.3.1	Background	76
8.3.2	OPT implementation	78
8.3.3	Future developments	82
8.4	Bendix France	82

8.4.1	Background	82
8.4.2	OPT implementation	83
8.4.3	Expanded use of OPT	84
8.5	Caron Yarn Company	84
8.5.1	Background	84
8.5.2	OPT implementation	87
8.5.3	Future developments	93
8.6	STC Components Semiconductor Division	93
8.6.1	Background	93
8.6.2	OPT implementation	94
8.6.3	The current situation	94
8.7	Implementations: conclusions and summary	96
Chapter Nine: Conclusions		99
9	Introduction	99
9.1	The OPT measurement system	99
9.2	The nine rules of manufacturing	100
9.3	The OPT software	100
9.4	The OPT philosophy	101
9.5	Summary	101
Bibliography		102
