<i>Preface</i>	xv

I INTRODUCTION

1	About Reversal Theory	3
	<i>Kurt P. Frey</i>	
	Metamotivation	4
	The Eight States	5
	Sixteen Primary Emotions	10
	The Reversal Process	12
	Theoretical Roots and Hallmarks of Human Nature	16
	References	18
2	Reversal Theory, Stress, and Health	21
	<i>Michael J. Apter</i>	
	The Varieties of Tension-Stress	22
	The Enjoyment of Stress	23
	Tension-Stress Versus Effort-Stress	25
	The Metamotivational Level of Analysis	28
	Stress and the Dynamics of Reversal	29
	Conclusion	31
	References	31

II THE EFFECTS OF STRESS

3	Paratelic Dominance and the Appraisal of Stressful Events	35
	<i>Kathryn D. Lafreniere</i>	
	The Appraisal of Stressful Events	35
	Method	37
	Investigation Results and What Is Inferred	38
	Conclusion	42
	References	43

4	Tension- and Effort-Stress as Predictors of Academic Performance	45
	<i>Sven Svebak</i>	
	Study 1	49
	Study 2	52
	Conclusion	54
	References	55
5	Back Pain and Work Stress	57
	<i>Sven Svebak, Reidar Mykletun, and Edvin Bru</i>	
	The Tension and Effort Stress Inventory	59
	The Relation Between Muscle Pain and Tension	60
	A Study of Bank Employees	60
	A Study of Female Hospital Staff	62
	Conclusion	66
	References	66
6	The Psychobiology of Telic Dominance and Stress	69
	<i>Rod A. Martin and Sven Svebak</i>	
	Laboratory Studies	70
	EMG Response Patterns	71
	Cardiovascular Response Patterns	74
	Stressful Life Events	75
	Conclusion	79
	References	79
7	Cardiovascular Reactivity and Mode-Dominance Misfit	81
	<i>John Spicer and Antonia C. Lyons</i>	
	Hypertension and Cardiovascular Reactivity	81
	Reversal Theory and Cardiovascular Reactivity	82
	Experimental Method	84
	Results and DBP Reactivity	85
	Discussion of the Findings	87
	Conclusion	91
	References	91

III
PSYCHOLOGY AND PHYSIOLOGY OF SMOKING

8	Relapse Crises During Smoking Cessation	95
	<i>Kathleen A. O'Connell, Mary M. Gerkovich, and Mary R. Cook</i>	
	Method of Exploring the Model	97
	What the Model Determined	98
	Discussing the Meaning Behind the Results	100
	Conclusion	101
	References	102
9	Differential EEG Effects of Smoking in the Telic and Paratelic States	103
	<i>Mary R. Cook, Mary M. Gerkovich, and Kathleen A. O'Connell</i>	
	Study Method	105
	Spectral Analysis	107
	Contingent Negative Variation	108
	Event-Related Potential	113
	Conclusion	114
	References	115

IV
RISK-TAKING BEHAVIOR

10	Gratuitous Risk: A Study of Parachuting	119
	<i>Michael J. Apter and Robert Batler</i>	
	The Pursuit of Excitement	119
	Research Method: The Questionnaire	121
	Characteristics of the Sample	123
	Reasons for Participation	124
	Perception of the Situation	125
	Anxiety-to-Excitement Reversals	126
	Conclusion	129
	References	129
11	Understanding Sexual Risk-Taking Behavior	131
	<i>Mary M. Gerkovich</i>	
	Reported Research Efforts	132
	Relevant Reversal Theory Constructs	135

Proposed Model of Sexual Risk-Taking	138
Conclusion	140
References	140

V

HEALTH-PROMOTING BEHAVIOR

12	Motives for Donating Blood	145
	<i>Michael J. Apter and Naomi Spirn</i>	
	Research Method: Blood Collection	147
	Motivation and Emotion	149
	Examination of the Questionnaire	152
	Conclusion	155
	References	156
13	Resisting Urges and Adopting New Behaviors	157
	<i>Kathleen A. O'Connell and Evelyn Brooks</i>	
	Changing Health Behaviors: Method of the Study	159
	Telic-Paratelic State	165
	Negativistic-Conformist State	166
	Mastery-Sympathy State	166
	Discussion of Study Findings	168
	Conclusion	169
	References	170
14	Humor as a Form of Coping	173
	<i>Sven Svebak and Rod A. Martin</i>	
	The Nature of Cognitive Appraisal in Humor	174
	The Psychobiology of Humor Appreciation	175
	Measures of Sense of Humor	176
	Sense of Humor and Consequences of Stress	177
	Conclusion	182
	References	183
15	Stress, Exercise, and Sport	185
	<i>John H. Kerr</i>	
	Exercise, Sport, and Stress Management	186
	Reversal Theory Research Evidence	188

	Matching Sports and Exercise Activities with Motivational Style	194
	Conclusion	195
	References	196
16	Stress in the Workplace: Causes and Treatments <i>David Fontana and Lucilia Valente</i>	199
	Stress Susceptibility	200
	Reversal Theory Provides an Interactive Model of Stress Vulnerability	200
	Relevance for Domestic Stress	202
	Stress-Management Techniques Derived from Reversal Theory	202
	Consciously Changing Metamotivational Modes	206
	Conclusion	207
	References	207
	<i>Index</i>	209
