Preface	ix
1. Introduction	1
1.1 Introduction	1
1.2 Comparisons at each time	3
1.3 Response feature analysis	5
1.4 Outline of the rest of the book	7
1.5 Further reading	10
Part One: Normal Error Distributions	13
2. Multivariate analysis of variance	15
2.1 Basic ideas	15
2.2 Parameter estimates	18
2.3 Derived variables	19
2.4 More complex repeated measures structures	23
2.5 Multivariate tests	24
2.6 Tests of assumptions	27
2.7 Examples	28
2.8 Further reading	38
3. Univariate analysis of variance	39
3.1 Basic ideas, compound symmetry and sphericity	39
3.2 Tests for and measures of sphericity	42
3.3 Adjusting for non-sphericity	43
3.4 Examples	44
3.5 Further reading	53
4. Regression methods	55
4.1 The model	55
4.2 Estimation and testing	56
4.3 Examples	58

5. Random effects models	65
5.1 The models	65
5.2 Residual maximum likelihood	67
5.3 Examples	67
6. Covariance structures	73
6.1 Regression models with structured covariance	73
6.2 The error matrix E_i	75
6.3 The matrices Z_i and B	78
6.4 Further reading	87
Part Two: Non-normal Error Distributions	89
7. Continuous non-normal measures: Gaussian estimation	91
7.1 Gaussian estimation: theory	91
7.2 Gaussian estimation: some examples	99
8. Nonlinear models	109
8.1 Nonlinear regression	109
8.2 Nonlinear regression with random coefficients	114
8.3 Transformations with Gaussian estimation	123
8.4 Further reading	127
9. Generalized linear models and maximum quasi-likelihood estimation	129
9.1 GLMs and MQLE for univariate data	129
9.2 GLMs and MQLE for repeated measures	134
9.3 Some examples	139
9.4 GLMs with random effects	141
9.5 Further reading	143
10. Binary and categorical measures	145
10.1 Regression models for binary data	145
10.2 Binary data from groups of individuals	148
10.3 Regression models for categorical data	150
10.4 Categorical data from groups of individuals	154
10.5 Further reading	157
Part Three: Comparisons of Methods	161
11. Relationships between methods	163
11.1 Kronecker product and the vec notation	163
11.2 Relationship between manova, anova and regression estimators	164

11.3 Gaussian estimation and maximum quasi-likelihood estimation	168
Appendix A The data sets used in the examples	171
Appendix B Extra data sets	187
References	215
Author index	225
Subject index	229
