Contents

PART I THE THEORY OF FINANCE 1

1 Introduction: Capital Markets, Consumption, and Investment 3

Introduction 3
Consumption and Investment without Capital Markets 4
Consumption and Investment with Capital Markets 9
Marketplaces and Transactions Costs 13
Transactions Costs and the Breakdown of Separation 14
Summary 15
Problem Set 15
References 16

2 Investment Decisions: The Certainty Case 17

Introduction 17
Fisher Separation 18
The Agency Problem 20
Maximization of Shareholders' Wealth 20
Techniques for Capital Budgeting 25
Comparison of Net Present Value with Internal Rate of Return 31
Cash Flows for Capital Budgeting Purposes 36
Summary and Conclusion 41
Problem Set 41
References 44

3 More Advanced Capital Budgeting Topics 46

Introduction 46
Capital Budgeting Techniques in Practice 47
Projects with Different Lives 49
Constrained Capital Budgeting Problems 55
Capital Budgeting Procedures under Inflation 61
The Term Structure of Interest Rates 65
Summary and Conclusions 71
Problem Set 72
References 74

4 The Theory of Choice: Utility Theory Given Uncertainty 77

Five Axioms of Choice under Uncertainty 79
Developing Utility Functions 80
Establishing a Definition of Risk Aversion 85
Comparison of Risk Aversion in the Small and in the Large 90
Stochastic Dominance 92
Using Mean and Variance as Choice Criteria 96

A Mean-Variance Paradox 99
Recent Thinking and Empirical Evidence 102
Summary 103
Problem Set 103
References 107

5 State-Preference Theory **109**

Uncertainty and Alternative Future States 110
Definition of Pure Securities 111
Complete Capital Market 111
Derivation of Pure Security Prices 113
No Arbitrage Profit Condition 115
Economic Determinants of Security Prices 116
Optimal Portfolio Decisions 119
Portfolio Optimality Conditions and Portfolio Separation 122
Firm Valuation, the Fisher Separation Principle, and Optimal Investment Decisions 124
Summary 128
Problem Set 129
References 131
Appendix A to Chapter 5: Forming a Portfolio of Pure Securities 133
Appendix B to Chapter 5: Use of Prices for State-Contingent Claims in Capital Budgeting 135
Appendix C to Chapter 5: Application of the SPM in Capital Structure Decisions 140

6 Objects of Choice: Mean-Variance Uncertainty **145**

Measuring Risk and Return for a Single Asset 146
Measuring Portfolio Risk and Return 153
Optimal Portfolio Choice: The Efficient Set with Two Risky Assets (and No Risk-Free Asset) 166
The Efficient Set with One Risky and One Risk-Free Asset 171
Optimal Portfolio Choice: Many Assets 173
Portfolio Diversification and Individual Asset Risk 184
Summary 188
Problem Set 188
References 192

7 Market Equilibrium: CAPM and APT **193**

Introduction 193
The Efficiency of the Market Portfolio 194
Derivation of the CAPM 195
Properties of the CAPM 198
Use of the CAPM for Valuation: Single-Period Models, Uncertainty 202
Applications of the CAPM for Corporate Policy 204
Extensions of the CAPM 205
Empirical Tests of the CAPM 212
The Problem of Measuring Performance: Roll's Critique 217
The Arbitrage Pricing Theory 219
Empirical Tests of the Arbitrage Pricing Theory 228
Summary 231
Problem Set 231
References 235

8 Pricing Contingent Claims: Option Pricing Theory and Evidence **240**

Introduction 240
A Description of the Factors That Affect Prices of European Options 241
Combining Options, A Graphic Presentation 245
Equity as a Call Option 248

Put-Call Parity 249
Some Dominance Theorems That Bound the Value of a Call Option 251
Derivation of the Option Pricing Formula—The Binomial Approach 256
Valuation of an American Call with No Dividend Payments 269
Pricing American Put Options 277
Extensions of the Option Pricing Model 280
Empirical Evidence on the Option Pricing Model 283
Summary 289
Problem Set 290
References 292
Appendix to Chapter 8: Derivation of the Black-Scholes Option Pricing Model 296

9 Futures Contracts and Markets **300**

Introduction 300
General Characteristics of Futures Contracts 300
The Theory of Futures Markets and Futures Contract Pricing 308
Empirical Evidence 319
Synthetic Futures and Options on Futures 322
Summary 325
Problem Set 325
References 326

10 Efficient Capital Markets: Theory **330**

Defining Capital Market Efficiency 330
A Formal Definition of the Value of Information 332
The Relationship between the Value of Information and Efficient Capital Markets 338
Rational Expectations and Market Efficiency 339
Market Efficiency with Costly Information 343
Statistical Tests Unadjusted for Risk 346
The Joint Hypothesis of Market Efficiency and the CAPM 350
Summary 352
Problem Set 353
References 355

PART II CORPORATE POLICY: THEORY, EVIDENCE, AND APPLICATIONS **357**

11 Efficient Capital Markets: Evidence **361**

Empirical Models Used for Residual Analysis 361
Accounting Information 362
Block Trades 370
Insider Trading 376
New Issues 377
Stock Splits 380
Performance of Managed Portfolios 383
Weekend and Year-End Effects 390
Summary 392
Problem Set 393
References 395

12 Capital Budgeting under Uncertainty: The Multiperiod Case **401**

Introduction 401
Multiperiod Capital Budgeting with "Imperfect" Markets for Physical Capital 402
An Examination of Admissible Uncertainty in a Multiperiod Capital Asset Pricing World 406
Using the Arbitrage Pricing Theory for Multiperiod Capital Budgeting 411
Comparing Risky Cost Structures 414
Abandonment Value 419
Summary 430
Problem Set 431
References 435

13 Capital Structure and the Cost of Capital: Theory **437**

The Value of the Firm Given Corporate Taxes Only 439
The Value of the Firm in a World with Both Personal and Corporate Taxes 451
Introducing Risk—A Synthesis of M-M and CAPM 455
The Cost of Capital with Risky Debt 462
The Maturity Structure of Debt 471
The Effect of Other Financial Instruments on the Cost of Capital 472
Summary 481
Problem Set 481
References 485
Appendix to Chapter 13: Duration and Optimal Maturity Structure of the Balance Sheet 489
Duration 489
Immunization 492
Application of Duration to Debt Maturity Structure 494
References to Appendix 495

14 Capital Structure: Empirical Evidence and Applications **497**

Introduction 497
Possible Reasons for an "Optimal" Mix of Debt and Equity 498
Empirical Evidence on Capital Structure 516
Cost of Capital: Applications 523
Summary 536
Problem Set 536
References 539

15 Dividend Policy: Theory **544**

The Irrelevance of Dividend Policy in a World without Taxes 545
Valuation, Growth, and Dividend Policy 548
Dividend Policy in a World with Personal and Corporate Taxes 556
Toward a Theory of Optimal Dividend Policy 561
Other Dividend Policy Issues 569
Summary 571
Problem Set 572
References 573

16 Dividend Policy: Empirical Evidence and Applications **576**

Behavioral Models of Dividend Policy 577
Clientele Effects and Ex Date Effects 578
Dividend Announcement Effects on the Value of the Firm: The Signaling Hypothesis 584
The Relationship between Dividends and Value 588
Corporate Equity Repurchases via Tender Offer 596
Overview of Empirical Evidence 600
Valuation and Corporate Policy 601
Problem Set 608
References 609

17 The Economics of Leasing **614**

Introduction 614
The Legal and Accounting Treatment of Leases 615
The Theory of Leasing 618
Empirical Evidence on Leasing 632
Summary 633
Problem Set 634
References 635

18 Applied Issues in Corporate Finance **638**

Pension Fund Management 638
Interest Rate Swaps 656
Leveraged Buyouts and Going Private 661
Executive Compensation Plans 665
Summary 672
Problem Set 672
References 673

19 Mergers, Restructuring, and Corporate Control: Theory **676**

Introduction 676
Corporate Restructuring and Control 677
Recent Developments in M&A Activity 680
Theories of M&A Activity 682
Theories of Restructuring 690
Conglomerate Mergers 691
Summary 708
Problem Set 710
References 712

20 Mergers and Restructuring: Tests and Applications **716**

Tests of Merger and Tender Offer Returns 717
Studies of Antitrust Cases 730
Corporate Governance 734
Studies of Other Forms of Restructuring 744
Generalizations from the Studies 753
Terms of Mergers 757
Managerial Policies in a Valuation Framework 763
Summary 769
Problem Set 769
References 773

21 Exchange Rate Systems and Parity Conditions **777**

The Importance of International Finance 777
The International Financial Mechanism 778
The Shift from Fixed to Flexible Exchange Rates 783
Balance of Payments Analysis 788
Fundamental Equilibrium Relationships 790
Summary 803
Problem Set 805
References 806

22 International Financial Management: Tests and Implications **809**

International Diversification 810
Asset Pricing Models 810
Exchange Risk and Purchasing Power Parity 813
Market Efficiency 818
Managerial Aspects of Foreign Exchange Risks 823
Interest Rate and Currency Swaps 829
Foreign Currency Translation 830
Summary 833
Problem Set 834
References 837

Appendix A Discounting **841**

Introduction 841
The Time Value of Money: Discrete Compounding 841
The Time Value of Money: Continuous Compounding 851
Summary 854

Appendix B Matrix Algebra **861**

Matrices and Vectors 861
The Operations of Matrices 862
Linear Equations in Matrix Form 864
Special Matrices 865
Matrix Inversion Defined 865
Matrix Transposition 866
Determinants 866
The Inverse of a Square Matrix 869
Solving Linear Equation Systems 870
Cramer's Rule 870
Applications 871

Appendix C An Introduction to Multiple Regression **877**

Ordinary Least Squares Linear Estimation 877
Simple Hypothesis Testing of the Linear Regression Estimates 881
Bias and Efficiency 886
Summary 892
References 893

Appendix D Calculus and Optimization **894**

Functions 894
Differential Calculus 901
Optimization 911
Taylor and MacLaurin Series 916
Integral Calculus 921
Reference 925

Author Index **927**

Subject Index **933**
