Foreword	xiii
Preface	xv
Part I—Basics of Fuzzy Logic	1
Chapter 1 Introduction to Fuzzy Logic Control, <i>R. Langari and J. Yen</i>	3
1.1 Introduction	5
1.2 Applications of Fuzzy Logic	5
1.2.1 Modus Operandi of Fuzzy Logic	5
1.3 Fuzzy versus Classical Set Theory	9
1.3.1 Problematic Cases of Classical Sets	10
1.3.2 Implications in Decision and Control Problems	10
1.3.3 Fuzzy Sets	13
1.3.4 Continuous versus Discrete Universe of Discourse	15
1.3.5 Algebraic Description of Fuzzy Sets	16
1.3.6 Term Sets or Vocabularies	17
1.3.7 Linguistic Hedges	18
1.3.8 Complement of a Fuzzy Set	18
1.3.9 Conjunction and Disjunction of Fuzzy Sets	19
1.3.10 Linguistic Variable	19
1.3.11 Possibility Distribution	20
1.4 Fuzzy Logic	22
1.4.1 Representation of Rules	22
1.4.2 Inference as Composition of Relations	23
1.4.3 Inference with Multiple Rules	25
1.5 Fuzzy Logic and Its Role in Control Engineering	27
1.6 Paradigm for Fuzzy Control	29
1.7 Fuzzy Control Design	31
1.8 Rationale and Merits of Fuzzy Control	36
1.9 Conclusions	37

References	38
Bibliography	39
Part 2—Fuzzy Logic Applications in Japan	41
Chapter 2 History of Industrial Applications of Fuzzy Logic in Japan, K. Hirota	43
2.1 Beginning of Fuzzy Research in Japan	45
2.2 Activities in IFSA Japan Charter	45
2.3 Industrial Applications and the First Fuzzy Vogue	47
2.4 Two Big National Fuzzy Research Projects	49
2.5 Japan Society for Fuzzy Theory and Systems	52
2.6 Fuzzy Home Electronics and the Second Fuzzy Vogue	53
2.7 Toward a Prosperous Fuzzy Society	54
Chapter 3 Fuzzy Logic Applications at OMRON Corporation, S. Isaka	55
3.1 Introduction	56
3.2 Temperature Controller	56
3.2.1 Introduction	56
3.2.2 Controller Structure	57
3.2.3 Control Parameter Tuning	57
3.2.4 Results	63
3.3 Health-Management System (HMS)	63
3.3.1 Introduction	63
3.3.2 System Organization	64
3.3.3 Health-Management Concept	66
3.4 Conclusions	66
References	67
Chapter 4 Survey of Fuzzy Logic Applications in Image-Processing Equipment, H. Takagi	69
4.1 Introduction	70
4.2 Cameras	71
4.2.1 Canon: Autofocus	71
4.2.2 Minolta: Autofocus, Autoexposure, and Autozoom	73
4.3 Camcorders	75
4.3.1 Sanyo: Autofocus, Autoexposure, and Auto-White-Balancing	75
4.3.2 Canon: Autofocus System for Camcorders	77
4.3.3 Matsushita Electric: Image Stabilization for Camcorders	79
4.4 Photocopying Machines	81
4.4.1 Canon: Electrophotography Process	81
4.4.2 Ricoh: Electrophotography Process	82

4.4.3 Sanyo: Toner Supply Control	83
4.4.4 Matsushita Electric: Autoexposure and Toner Control	85
4.4.5 Sanyo: Color Copying	86
4.5 Television Equipment	86
4.5.1 Sanyo: Television Sets	86
4.5.2 Others	87
4.6 Codecs	87
4.7 Stepper Alignment in Semiconductor Manufacturing	88
4.8 Conclusions	91
Acknowledgments	91
References	91

Chapter 5 Applications of Neural Networks and Fuzzy Logic to Consumer Products, *H. Takagi* **93**

5.1 Introduction	94
5.1.1 Fuzzy Systems	94
5.1.2 Combining Fuzzy Technology with Neural Networks	94
5.1.3 Issues in Consumer Product Design	95
5.2 Types of Applications	95
5.3 Application I: Non-Consumer-Trainable Applications	96
5.3.1 Development Tools	96
5.3.2 Independence of Fuzzy Logic	98
5.3.3 Correcting Mechanisms	99
5.3.4 Cascade Combination	101
5.4 Application II: Consumer-Trainable Neural Nets	101
5.4.1 Reducing Preheating Time	102
5.4.2 Correction According to Personal Preference	102
5.4.3 Adjusting the Control Program to the User's Environment	103
5.4.4 Predicting Precooling Time	103
5.5 Toward Future Systems	104
References	104

Chapter 6 Knowledge Processing Based on Fuzzy Associative Memory and Its Application to a Helicopter Control, *T. Takagi, T. Yamaguchi, and S. Yamamoto* **107**

6.1 Introduction	109
6.2 Fuzzy Associative Memory-Based Knowledge Processing	111
6.2.1 FAMOUS	111
6.2.2 Conceptual Fuzzy Sets	113
6.2.3 Features of Fuzzy Associative Memory-Based Knowledge Processing	116

6.3 The Flying Vehicle System	117
6.3.1 The Experimental System	117
6.3.2 Two-Degree-of-Freedom Fuzzy Model for Flight	118
6.3.3 Hovering Flight by Means of the SFK	119
6.3.4 Circular Flight Using DFK	123
6.4 Conclusions	127
References	127
Part 3—Fuzzy Logic Applications in the United States	129
Chapter 7 Fuzzy Logic Hierarchical Controller for a Recuperative Turboshaft Engine: From Mode Selection to Mode Melding, P. P. Bonissone and K. H. Chiang	131
7.1 Introduction	132
7.2 The Gas Turbine	132
7.2.1 Plant	133
7.2.2 Control Strategies	134
7.2.3 The Current Control Scheme	135
7.3 The Fuzzy Logic Mode Selector	140
7.3.1 Controls and Fuzzy Logic	140
7.3.2 Mode Selector Implementation	141
7.3.3 Tuning	144
7.4 The Fuzzy Logic Low-Level Controllers	146
7.4.1 Conventional PI Controllers	147
7.4.2 Fuzzy Logic PI Controllers	147
7.4.3 Two-Dimensional Sliding Mode Controllers	149
7.4.4 Implementation	150
7.5 Conclusions	153
References	155
Chapter 8 Progress in Research on Autonomous Vehicle Motion Planning, E. H. Ruspini, A. Saffiotti, and K. Konolige	157
8.1 Introduction	158
8.2 Motion Control	161
8.3 Task Execution	165
8.4 Self-Localization	167
8.5 Experiments	168
8.6 Conclusions	171
Acknowledgments	173
References	173

Chapter 9 Autonomous Navigation of a Mobile Robot Using the Behaviorist Theory and VLSI Fuzzy Inferencing Chips, <i>F. G. Pin and H. Watanabe</i>	175
9.1 Introduction	177
9.2 The VLSI Fuzzy Inferencing System	178
9.3 Building Fuzzy Behaviors and Rule Bases	181
9.4 Experiments and Sample Results	185
9.5 Conclusions	189
References	190
Chapter 10 Artificial Intelligence, Fuzzy Logic, and Sensor Clusters, <i>M. AbdelRahman</i>	191
10.1 Background	192
10.2 Enter Artificial Intelligence	193
10.2.1 Knowledge-Based Systems (KBSs)	196
10.2.2 Artificial Neural Systems (ANSs)	197
10.2.3 Fuzzy Logic	198
10.3 New Sensor Products with Fuzzy Logic Rules	200
10.3.1 Color Sensor	200
10.4 Sensor Clusters and Food Processing	201
10.5 Conclusions	205
Chapter 11 Intelligent Sensor Systems for Space Operations, <i>R. N. Lea and Y. Jani</i>	207
11.1 Introduction	208
11.2 Tracking Control for Proximity Operations	209
11.3 Designs of Fuzzy Logic-Based Controllers	212
11.4 Test Cases for Proximity Operations	219
11.5 Results from Software Simulations	221
11.6 Conclusions	224
References	225
Chapter 12 Two Automated Tuning Methods for Fuzzy Logic-Based Process Control, <i>J. Yen, W. C. Daugherty, H. Wang, and B. Rathakrishnan</i>	227
12.1 Introduction	228
12.1.1 Motivations	228
12.1.2 Two Automated Tuning Methods	229
12.2 Description of the Plant	230
12.3 Automated Tuning Using Fuzzy Meta-Rules	230

12.4 Automated Tuning Using Reinforcement-Based Self-Learning	234
12.4.1 Description	234
12.4.2 Design Issues	234
12.4.3 Learning Rules	236
12.5 Evaluation	238
12.5.1 Results of Meta-Rule-Based Automated Tuning	238
12.5.2 Results of Reinforcement-Based Tuning	241
12.5.3 Discussion	244
12.6 Conclusions	245
Acknowledgments	245
References	245
Chapter 13 On Fuzzy Control of Nonchlorofluorocarbon Air-Conditioning Systems, M. Jamshidi	247
13.1 Introduction	248
13.2 Thermoelectric Cells and System Design	249
13.3 Fuzzy Logic	251
13.4 Software Simulations of Fuzzy Controllers	253
13.4.1 A Togai Fuzzy_C Simulation	253
13.4.2 The NeuraLogix Fuzzy Microcontroller Simulation	256
13.5 Hardware Implementation	271
13.6 Conclusions	272
Acknowledgments	273
References	273
Part 4—Fuzzy Logic Applications in Europe	275
Chapter 14 Fuzzy Logic Applications in Europe, C. von Altrock	277
14.1 History of Fuzzy Logic Applications in Europe	278
14.1.1 1974: First Control Applications in Europe	278
14.1.2 1978: Fuzzy Logic in Japan	278
14.1.3 1982: First Decision Support Applications in Europe	279
14.1.4 1988: Japanese Fuzzy Products Reach Europe	279
14.1.5 1990: Fuzzy Logic Awareness in Europe	279
14.2 A Survey of Fuzzy Logic Applications in Europe	283
14.2.1 Areas of Fuzzy Logic Applications	284
14.2.2 Complexity of the Fuzzy Logic Systems	287
14.2.3 Companies' Experiences with Fuzzy Logic	290
14.3 Case Studies	293
14.3.1 Fuzzy European Home Appliances	294
14.3.2 Intelligent NiCd Battery Charger	294

14.3.3	Fuzzy Data Analysis in Fire Detectors	295
14.3.4	Fuzzy Logic State Estimation for a Home Heating System	296
14.3.5	Industrial Sensors Using Fuzzy Logic	296
14.3.6	Fuzzy Logic in Automotive Engineering	297
14.3.7	Robotic Applications in Europe	298
14.3.8	Test Stand Automation	299
14.3.9	Crane Control Using Fuzzy Logic	299
14.3.10	Fuzzy Logic for Chemical Process Control	299
14.3.11	Robust Control of a Waste Incineration Plant	302
14.3.12	Wastewater Treatment Plant Control	302
14.4	Further Development	303
14.4.1	The Limiting Factor of Further Penetration: Education	303
14.4.2	Applications in Decision Support and Data Analysis	304
	References	307
	Bibliography	310
Part 5	—Survey of Tools	311
Chapter 15	Software Tools for Fuzzy Control, S. Chiu	313
15.1	Introduction	314
15.2	CubiCalc	315
15.3	TILShell	318
15.4	<i>fuzzyTech</i>	322
15.5	FIDE (Fuzzy Inference Development Environment)	328
15.6	RT/Fuzzy (Real-Time Fuzzy Logic Block)	331
15.7	Fuzzy Knowledge Builder	335
15.8	Fuzz-C	337
15.9	Conclusions	339
15.10	Disclaimer	339
	References	340
	Company Addresses	340
Index		341
