Introduction	1
Purpose	1
Audience	1
Overview	2
1 Introduction to ISO 9000	3
ISO 9001 and ISO 9000-3	4
ISO 9001 “Shalls” and ISO 9000-3 “Shoulds”	4
2 Overview of Software Engineering	7
Engineering a Software Product	8
The ISO 9000-3 Guideline	10
The Software Engineering Process	11
What Is Software Engineering?	11
Decomposing Systems and Processes	12
A Case for Plans, Specifications, Process, and Procedures	12
Phase 1: System Engineering/System Analysis	13
Phase 2: Software Requirements Analysis	14
Phase 3: Design	14
Phase 4: Implementation	14
Phase 5: Testing	15
Phase 6: Maintenance	15

Configuration Control	15
Reviews, Inspections, and Walk-Throughs	16
Product Quality	16
3 ISO 9000-3: Theory, Concept, Themes, Interpretation, and Critique	19
Theory	19
Concept	19
Themes	20
Interpretation	20
Critique	22
Criticism and Warning	23
4 ISO 9000-3: Scope and Overview	25
1 Scope	26
2 Normative References	27
3 Definitions	27
4 Quality System—Framework	28
4.1 Management Responsibility	28
4.2 Quality System	29
4.3 Internal Quality System Audits	29
4.4 Corrective Action	29
5 Quality System—Life-Cycle Activities	29
5.1 General	29
5.2 Contract Review	30
5.3 Purchaser’s Requirements Specification	30
5.4 Development Planning	30
5.5 Quality Planning	31
5.6 Design and Implementation	32
5.7 Testing and Validation	32
5.8 Acceptance (Testing)	33
5.9 Replication, Delivery and Installation	34
5.10 Maintenance	34
6 Quality System—Supporting Activities	34
6.1 Configuration Management	34
6.2 Document Control	35
6.3 Quality Records	35
6.4 Measurement	35
6.5 Rules, Practices and Conventions	35
6.6 Tools and Techniques	35
6.7 Purchasing	36
6.8 Included Software Product	36
6.9 Training	36
5 Supplier Management Responsibility	37
4 Quality System—Framework	37
4.1 Management Responsibility	37

6 Purchaser Management Responsibility	45
7 The Supplier's Quality System	51
4.2 Quality System	52
4.3 Internal Quality System Audits	54
4.4 Corrective Action	56
8 The Purchaser and Supplier Contract	59
5 Quality System—Life-Cycle Activities	60
5.1 General	60
5.2 Contract Review	60
9 Identify the Purchaser's Requirements	67
5.3 Purchaser's Requirements Specification	67
10 Development Planning	71
5.4 Development Planning	72
Basis of Estimate for Design	74
5.5 Quality Planning	84
11 Design and Implementation	87
5.6 Design and Implementation	87
12 Testing and Validation	93
5.7 Testing and Validation	93
13 Purchaser Acceptance	103
5.8 Acceptance	103
5.9 Replication, Delivery and Installation	106
14 Software Maintenance	111
5.10 Maintenance	111
15 Configuration Management	121
6.1 Configuration Management	122
16 Document Control	133
6.2 Document Control	133
17 Quality Records	139
6.3 Quality Records	139
18 Measurement, Rules, and Tools	143
6.4 Measurement	143
6.5 Rules, Practices and Conventions	147
6.6 Tools and Techniques	147

19 Purchasing and Including Third-Party Products	149
6.7 Purchasing	149
6.8 Included Software Product	152
20 Training	155
6.9 Training	155
21 The Audit Process	157
22 Specifying the Purchaser Requirements	159
23 Configuration Management Process	165
24 The Software Process Handbook as the Quality Manual	171
Introduction	171
1.1. Overview	171
Phase One: Product Specification and Preliminary Planning	173
Purpose	173
Deliverables	173
Exit Criteria	173
Description	174
Step 1. Marketing Requirements Analysis	175
Step 2. Preliminary Budget and Schedules	176
Step 3. Phase Two Detailed Estimates of Software Requirements Specification	177
Phase Two: Engineering Specification and Detailed Planning	178
Purpose	178
Deliverables	178
Exit Criteria	178
Description	178
Step 1. Feasibility Prototyping (Optional)	180
Step 2. Software Requirements Specification	181
Step 3. Software Development Plan	182
Step 4. Documentation Plan	183
Step 5. System Test Plan	184
Phase Three: Product Design	185
Purpose	185
Deliverables	185
Exit Criteria	185
Description	185
Step 1. Software Design Document	186
Step 2. System Test Specification Description	187
Phase Four: Product Implementation	188
Purpose	188
Deliverables	188
Exit Criteria	188

Description	188
Step 1. Code and Unit Tests	189
Step 2. Functional Integration Tests	190
Step 3. Create System Test Cases	191
Phase Five: System Test	192
Purpose	192
Deliverables	192
Exit Criteria	192
Description	192
Step 1. Execute System Test Cases	193
Phase Six: Product Evaluation	194
Purpose	194
Deliverables	194
Exit Criteria	194
Description	194
Step 1. Alpha Evaluation	195
Step 2. Beta Evaluation	196
Phase Seven: Product Release	197
Purpose	197
Deliverables	197
Exit Criteria	197
Description	197
Step 1. Release to Manufacturing	198
Step 2. Release to Customer	199
Phase Eight: Maintenance	200
Attachment A: Marketing Requirements Template	201
Attachment B: Marketing-Engineering Interface	203
Attachment C: Software Requirements Specification Template	205
Attachment D: Project Development Plan	209
Attachment E: Software Design Document Template	210
Attachment F: System Test Specification Template	213
Attachment G: System Test Specification Template	214
Attachment H: Documentation Plan Template	216
Attachment I: Alpha Evaluation Plan	217
Attachment J: Beta Evaluation Plan	219
Attachment K: Version Description Document	221
