## I : SUSTAINABLE DEVELOPMENT IN 21ST CENTURY

---

<b>1. Environment, Economy and Performance : Three Pillars to Prosperity</b>	<b>1</b>
<i>Krishna B. Misra</i>	
1 Introduction	1
2 The Unique Planet - Earth	2
3 The Problems of Planet - Earth	4
4 Environmental Perspective of Development	12
5 Energy-related Problems	37
6 Disruption of Ecological Balance	47
7 Economic Perspective of Development	53
8 Performance Perspective of Development	72
9 New Pathways for Sustainable Development	80
10 Remedial Measures	86
11 Organisation of the Book	104
12 Conclusions	108
References	109
<b>2. Prosperity of Nations in the 21st Century</b>	<b>111</b>
<i>A. M. Gillies</i>	
1 Introduction	111
2 Renewable Resources, Renewable Wealth	113
3 Creating Zero Waste Economies	114
4 Friendly Energy	116
5 Industries of the Future	118
6 Clean and Competitive Manufacturing	118
7 Conclusions	120
References	120
<b>3. Strategic Technological Pathways for Sustainable Development</b>	<b>121</b>
<i>Giancarlo Barbioli</i>	
1 Introduction	121
2 Sustainability and Policy Issues	122
3 The Quest for Strategic Technological Pathways	123
4 Profile of the Proposed Pathways	124
5 Conclusions	156
References	157

---

**II : CLEANER PRODUCTION**

---

<b>4. Basic Concepts of Cleaner Technologies</b>	<b>171</b>
<i>M. Rouston, S. Laigo, J. Caille and C. Roulph</i>	
1 Introduction	171
2 Effect of Industrial Activity on Environment	172
3 Cleaner Technologies	175
4 Users of Cleaner Technologies	176
5 Methodology	177
6 Advantages	180
7 Conclusions	182
References	182
<b>5. Formal Methods for Designing Cleaner Processes</b>	<b>183</b>
<i>W. R. Johns</i>	
1 Introduction	183
2 Environmental Critical Examination	184
3 Computer-aided Design of Clean Processes	194
4 Conclusions	198
References	198
<b>6. Removing Obstacles in the Implementation of Cleaner Production</b>	<b>199</b>
<i>C. M. Lin</i>	
1 Introduction	200
2 A Conceptual Framework for the Classification of Cleaner Production	200
3 Factors Influencing the Adoption of Cleaner Production	205
4 Recommendations	208
5 Conclusions	209
<b>7. An Integrated Approach to Cleaner Production</b>	<b>211</b>
<i>Leo W. Baas</i>	
1 Introduction	211
2 Attitudes toward Environment	212
3 From Environmental Technology to Cleaner Production	213
4 Cleaner Production within European Corporations	217
5 Towards a Cleaner Production Paradigm	222
6 Developments in Orientations of Business Management	224
7 Conclusions	226
References	226

<b>8. Cleaner Production Case Studies</b>	<b>231</b>
<i>Margaret L. Bailey and K. Mayes</i>	
1 Introduction	231
2 The Cleaner Production Demonstration Project	232
3 The Case Studies	236
4 Conclusions	254
References	254
<b>9. Cleaner Production for Electroplating Industry</b>	<b>255</b>
<i>Joo Hwa Tay</i>	
1 Introduction	255
2 Plating Process Sequence	256
3 Sources and Characteristics of Electroplating Waste	258
4 Environmental Impacts	260
5 Material Substitution	260
6 Electroplating Wastes Treatment	261
7 Waste Minimization	265
8 Rinse Water Recycling	268
9 Wastewater Reclamation	273
10 A Case Study	273
11 Conclusion	275
References	277
<b>10. UNIDO Technical Assistance for Cleaner Production</b>	<b>279</b>
<i>Ralph ( Skip) Luken</i>	
1 Introduction	279
2 The Importance of Cleaner Production	280
3 The Role of UNIDO	280
4 UNIDO Activities	281
5 Conclusion	284
References	284

---

### III : ENVIRONMENTAL PERSPECTIVE

---

<b>11. Environmental Impact Statement</b>	<b>285</b>
<i>James R. Pfafflin</i>	
1 Introduction	285
2 Scope of EIS	286
3 Preparation of EIS	287
4 An Outline of a Good EIS	287
5 Interdisciplinary Teamwork	289
6 Future Development	290
7 Conclusions	291
References	291

<b>12. Environmental Disclosure and the U.S. Securities Laws</b>	<b>293</b>
<i>R. H. Feller and Bruce W. Piasecki</i>	
1 Introduction	293
2 Regulatory Framework	294
3 Accounting for Contingent Liabilities	299
4 Review of Sample SEC Filings	301
5 The Reform Agenda at the SEC	305
6 SEC Plan for Implementation	309
7 Alternative Courses of Action	313
8 Summary and Conclusions	315
References	316
<b>13. Environmental Technology and Industrial Development in India</b>	<b>319</b>
<i>P. Khanna and V.S.Kulkarni</i>	
1 Introduction	319
2 Environmental Perspective of Economic Sectors	320
3 Sustainable Development	322
4 Agenda for Sustainable Development	323
5 Structural Economic Change	325
6 Role of Environmental Impact & Risk Assessment and Environmental Audit	326
7 Priority Areas of Environmental Action	327
8 Conclusion	327
9 Acknowledgement	328
References	328
<b>14. Future Role of Anaerobic Digestion in Municipal Waste Management</b>	<b>335</b>
<i>Prabodh B. Mistry</i>	
1 Introduction	335
2 Current Situation	336
3 Waste Composition	336
4 Anaerobic Digestion	338
5 The AD Technology	342
6 Technical and Economic Considerations	349
7 Conclusion	351
References	352
<b>15. Biotechnology Applications in an Environmental Perspective</b>	<b>355</b>
<i>M.C.E. van Dam-Mieras, G. Mijnbeek and E. Middelbeek</i>	
1 Introduction	356
2 Living Nature : Energy, Universal Biomolecules and Exchange of Information	360
3 What is Biotechnology ?	364
4 Biotechnology and Energy : Conversion and Storage of Solar Energy	365

5	Biotechnology and Agriculture : New Possibilities and New Risks ?	369
6	Biotechnology and Industry : About New Products and Processes	374
7	Biotechnology and the Environment : From Clean-up to Preventive Technology	377
8	Conclusions	384
	References	385
<b>16.</b>	<b>Environmental Life Cycle Assessment : A Basis for Sustainable Product Development</b>	<b>387</b>
	<i>Tomas Rydberg</i>	
1	Introduction	387
2	Life Cycle Assessment	388
3	Goal Definition and Scoping	391
4	Inventory Analysis	391
5	Impact Assessment	395
6	Improvement Assessment	398
7	Comparison of Qualitative and Quantitative Assessments	399
8	Application of LCA	400
9	Conclusions and Perspectives	402
	References	404
<b>17.</b>	<b>The Product Life Cycle Analysis Revisited</b>	<b>409</b>
	<i>John P. Ulhoi</i>	
1	Introduction	409
2	The Total Product LCAs and Project EIAs	411
3	Discussion	415
4	Suggetions for Further Investigation	417
5	Conclusions	419
	References	419
<b>18.</b>	<b>Environmental Life Cycle Assessment and Cost Analysis</b>	<b>423</b>
	<i>S. Sankaran and T. Viraraghavan</i>	
1	Introduction	423
2	Current Issues	424
3	Life-cycle Assessment	427
4	Economic Analysis	429
5	Case Studies	433
6	Conclusions	434
	References	435

---

**IV : ECONOMIC PERSPECTIVE**

---

<b>19. Basic Economic Concepts of Cleaner Production</b>	<b>437</b>
<i>Andre Maisseu</i>	
1 Introduction	438
2 Problems of Future Development	439
3 Weaknesses of the Traditional Economic Analysis	441
4 Introducing a New Production Function	444
5 Thermodynamic Interpretation of Economic Process	446
6 Reconciling Economy and Ecology	450
7 Distinction between Waste and Deterioration of Environment	451
8 Conclusions	453
References	454
<b>20. Ecological Economics and Environmental Policies : A European View</b>	<b>457</b>
<i>J. Martinez Alier</i>	
1 Introduction	458
2 Neoclassical and Ecological Views of the Economy	458
3 Indicators, Limits and Instruments	460
4 Internalization of Externalities in Neoclassical Environmental Economics	465
5 Can There be Environmentally-correct Prices ?	466
6 Sustainable Development versus Ecological Economy	469
7 International Implications of Sustainability	471
8 Bottom-up Policies versus Top-down Instruments	473
9 New European Agricultural Policy	474
10 Conclusions	476
References	476
<b>21. Resource Scarcity as a Stimulus for Advantageous Innovations</b>	<b>479</b>
<i>Giancarlo Barbiroli, A. Raggi and M. Fiorini</i>	
1 Introduction	479
2 New Resource Utilization Criteria and Innovation	480
3 Reconciling Enterprises and Benefits to Society	481
4 Case Studies	482
5 Knowledge and Substitution as Strategic Factors	494
6 Conclusions	495
References	496
<b>22. Coupling Strategies and Modelling of Integrated Biomass Refining Concept</b>	<b>501</b>
<i>A. Mughal, J. C. Mora and M. Delmas</i>	
1 Introduction	501
2 Coupling Scenarios for the Valorization of Fibro-energetic Crops	502

3	Mass and Energy Balance of Integrated Biomass Refining of Wheat Crop	504
4	Mass and Energy Balance of Integrated Biomass Refining of Sugarcane Crop	522
5	Mass and Energy Balance of Integrated Refining Sweet Sorghum Crop	536
6	Results and Discussion	536
7	Conclusions	545
	References	546
<b>23.</b>	<b>Raw Material Management as a First Step Towards Sustainability</b>	<b>549</b>
	<i>Hans Schnitzer</i>	
1	Introduction	549
2	Sustainability and Industrial Production	550
3	Material Management in Production Processes	552
4	Economic Considerations in Material Management	563
5	Case Studies	565
6	Conclusions	566
	References	566
<b>24.</b>	<b>Waste Minimisation/Elimination : A Key to Successful Business</b>	<b>569</b>
	<i>Allen H. Aspengren</i>	
1	Introduction	569
2	3P - Program	570
3	3P - Methodology	571
4	Case Studies	573
5	Gains from Various Innovations	575
6	Resource Recovery and Recycling	576
7	Conclusions	578
	References	578
<b>25.</b>	<b>High Performance Sewage Treatment for Reduced Infrastructure Costs</b>	<b>579</b>
	<i>Frank Rogalla</i>	
1	Introduction	580
2	Trade-offs Between Physio-chemical Lamella Separators and Aerated Biofiltration	581
3	Aerated Biofilters : Ten Years Old and Full of Future	592
4	Minimising Nuisances by Covering Compact Sewage Treatment Plants	601
5	Conclusions	607
	References	608
<b>26.</b>	<b>The Energy Audit</b>	<b>613</b>
	<i>R. S. Barratt</i>	
1	Introduction	613
2	Energy Efficiency	614
3	What is the purpose of Energy Use?	615

4	General Energy Management	616
5	The Energy Audit	617
6	Boiler Efficiency	624
7	Improving Energy Efficiency	626
8	The Use of Electricity	627
9	Waste Recovery Options	629
10	Transportation	633
11	Energy Management	634
12	Discharge Management	636
13	Conclusions	637
	References	638
<b>27.</b>	<b>Energy from Municipal Solid Waste : An Economic Analysis</b>	<b>639</b>
	<i>Ernest B. Cohen</i>	
1	Introduction	639
2	Energy from Waste Material	640
3	Economical Alternatives	641
4	Making MSW a Viable Source of Energy	642
5	Proceeding with an MSW-Energy Project	643
6	Implementation	644
7	Conclusions	645
	References	645
<b>28.</b>	<b>Industrial Plant Process Flow/Energy Analysis</b>	<b>647</b>
	<i>Harry L. Brown and Y. T. Shah</i>	
1	Introduction	647
2	Industrial Process Classification	649
3	Methodology for an Industrial Plant Process Flow/Energy Analysis	650
4	Case Study : Fluid Milk Process (SIC 2026)	660
5	Conclusion	683
	References	683
<b>29.</b>	<b>Energy Models and Cost Models for Water Pollution Control</b>	<b>685</b>
	<i>J. C. Wang, D. B. Aulenbach, Lawrence K. Wang and Mu-Hao S. Wang</i>	
1	Introduction	686
2	Mathematical Models of Water Pollution Control Technologies	688
3	Verification, Documentation and Application of Energy and Cost Models	703
4	Conclusions	713
	References	713

---

**V : PERFORMANCE PERSPECTIVE**

---

<b>30. Performance Perspective for Cleaner Production</b>	<b>721</b>
<i>Krishna B. Misra</i>	
1 Introduction	721
2 Quality	723
3 Reliability	730
4 Maintenance	737
5 From Failures to Plant Accidents	739
6 Risk	741
7 Risk Analysis	743
8 Environmental Risk	746
9 Conclusions	749
References	749
<b>31. Evaluating Engineering to Ensure a Sustainable Environment</b>	<b>751</b>
<i>David Walter Schnare</i>	
1 Introduction	751
2 Risk Assessment, Risk Management and Decision-making	756
3 The Mechanics of Trading Risks and Balancing Costs	762
4 Data Presentation and Uncertainty	766
5 Conclusions	767
References	768
<b>32. Reducing Risk by Controlling the Environment</b>	<b>769</b>
<i>Stan Bumble</i>	
1 Introduction	769
2 Mathematical Ecotoxicity	770
3 Control Theory	771
4 The Transfer Function	772
5 Networks and Ecosystems	773
6 Feedback loops and the Environment	775
7 Optimizing Environmental Quality	775
8 Applications	776
9 General Control Equations Expressing Toxicity as a Function of Chemical Structure	778
10 Computer Simulation, Modeling and Control of Environmental quality	779
11 Conclusions	780
References	780

---

**VI : FUTURE STRATEGIES**

---

<b>33. Molecular Manufacturing : A Future Technology for Cleaner Production</b>	<b>783</b>
<i>K. Eric Drexler</i>	
1 Introduction	783
2 Implications of Nanotechnology	784
3 From Nanotechnology to Molecular Manufacturing	787
4 Molecular Engineering : An Approach to Molecular Manipulation	789
5 Possible Applications	795
6 Current Status of R&D	796
7 Conclusions	797
References	798
<b>34. Education and Manpower Development in Cleaner Production</b>	<b>799</b>
<i>M.S. Jorgensen</i>	
1 Introduction	799
2 The Need for Changes in Knowledge and Attitudes	800
3 Training for Cleaner Production in Companies	805
4 Training of Public Authorities in Fostering Cleaner Production in Companies	813
5 University Education for Cleaner Production	815
6 Cleaner Production in Engineering Curricula	816
7 Cleaner Production in Business, Management and Social Science Curricula	821
8 How to Develop Cleaner Production Activities at Universities	826
9 Conclusion	828
References	829
