<b>1 Introduction: does the free market produce enough skills?</b>	<b>1</b>
<i>Alison L. Booth and Dennis J. Snower</i>	
1 Are market incentives sufficient?	1
2 The case for a free market in training	4
3 Market failures in training	5
4 Empirical consequences of skills gaps	7
5 Government failures in training	10
6 Empirical consequences of government failure and policy issues	13
<b>PART I: MARKET FAILURES: THE CAUSES OF SKILLS GAPS</b>	
<b>2 Transferable training and poaching externalities</b>	<b>19</b>
<i>Margaret Stevens</i>	
1 Introduction	21
2 Interpretations of general and specific training	24
3 Transferable training	26
4 Investment in transferable training	29
5 A simple illustrative model	31
6 An extension of the model	34
7 Conclusion	37
<b>3 Credit constraints, investment externalities and growth</b>	<b>41</b>
<i>Daron Acemoglu</i>	
1 Introduction	43

2	Investment in skills with complete markets	45
3	Investment in skills with capital market constraints	51
4	Human capital accumulation with ex post bargaining over wages	54
5	The importance of institutions in human capital investments	55
6	Comparison of different models and policy implications	58
<b>4</b>	<b>Education and matching externalities</b>	<b>63</b>
	<i>Kenneth Burdett and Eric Smith</i>	
1	Introduction	65
2	An overview of the bargaining process and the education decision	66
3	The model	68
4	Bargaining	70
5	Equilibrium	73
6	Comparative statics	75
7	Conclusions	77
	Appendix	77
<b>5</b>	<b>Dynamic competition for market share and the failure of the market for skilled labour</b>	<b>81</b>
	<i>David Ulph</i>	
1	Introduction	83
2	The model with no skill differences	88
3	Skill gaps	96
4	Conclusions	105
<b>6</b>	<b>The low-skill, bad-job trap</b>	<b>109</b>
	<i>Dennis J. Snower</i>	
1	Introduction	111
2	The background	114
3	The interaction between training and good jobs	116
4	Policy implications	121
 <b>PART II: EMPIRICAL CONSEQUENCES OF SKILLS GAPS</b>		
<b>7</b>	<b>Changes in the relative demand for skills</b>	<b>127</b>
	<i>Stephen Machin</i>	
1	Introduction	129
2	Changes in the structure of manufacturing industry employment	130

3	Establishment-level changes in the employment structure, 1984–90	136
4	Explaining the 1980s shift in demand	138
5	Concluding remarks	143
<b>8</b>	<b>Skill shortages, productivity growth and wage inflation</b>	<b>147</b>
	<i>Jonathan Haskel and Christopher Martin</i>	
1	Introduction and summary	149
2	The skills gap and skill shortages	151
3	The effect of skill shortages on productivity	153
4	The effect of skill shortages on wages	159
5	Conclusion	163
6	Data appendix	164
7	Technical appendix	166
<b>9</b>	<b>Workforce skills, product quality and economic performance</b>	<b>175</b>
	<i>Geoff Mason, Bart van Ark and Karin Wagner</i>	
1	Introduction	177
2	Output, employment and trade performance	178
3	Productivity and product quality	179
4	Machinery selection and utilisation	182
5	Workforce skills and product quality	185
6	Summary and assessment	189
	Appendix A: Selection of national samples of plants	192
	Appendix B: Age of machinery in national samples	193
	Appendix C: Estimates of 'quality-adjusted' productivity levels	193
<b>10</b>	<b>Workforce skills and export competitiveness</b>	<b>199</b>
	<i>Nicholas Oulton</i>	
1	Introduction	201
2	Relative skill levels in Britain and Germany	203
3	UK and German exports	209
4	Exports and skills: theory	212
5	Exports and skills: empirical assessment	218
6	Conclusions	224
 <b>PART III: GOVERNMENT FAILURES AND POLICY ISSUES</b>		
<b>11</b>	<b>Market failure and government failure in skills investment</b>	<b>233</b>
	<i>David Finegold</i>	

1	Introduction	235
2	Market failure	236
3	Government failure – supply side	238
4	Government failure – demand side	243
5	Market failures in the market analogue	245
6	Problems inherent in the supply of education	247
7	Conclusion and policy recommendations	248
<b>12</b>	<b>Training implications of regulation compliance and business cycles</b>	<b>255</b>
	<i>Alan Felstead and Francis Green</i>	
1	Introduction	257
2	Theoretical links between the economic cycle and training	259
3	Training during the last major recession	261
4	Training in the early 1990s recession: the national picture	262
5	Determinants of employers' training decisions in the recession	270
6	Conclusions	278
<b>13</b>	<b>On apprenticeship qualifications and labour mobility</b>	<b>285</b>
	<i>Alison L. Booth and Stephen Satchell</i>	
1	Introduction	287
2	The data source and the explanatory variables	290
3	Who starts an apprenticeship in their first job?	291
4	The impact of apprenticeship qualifications on mobility	293
5	Conclusion	298
	Appendix: Variable definitions	298
<b>14</b>	<b>Evaluating the assumptions that underlie training policy</b>	<b>303</b>
	<i>Ewart Keep and Ken Mayhew</i>	
1	The assumptions that lie behind policy	305
2	The link between VET and economic success	306
3	The nature of the UK's future work and occupational structure	307
4	The need for a highly trained workforce	310
5	Market-based approaches to training	314
6	The primacy of the employer in the new system	320
7	Conclusions	327
<b>15</b>	<b>Conclusions: government policy to promote the acquisition of skills</b>	<b>335</b>
	<i>Dennis J. Snower and Alison L. Booth</i>	
	<i>Index</i>	351

# Figures

---

2.1	The relationship between labour market and the external problem	<i>page</i> 29
2.1	The retention probability, as a function of a wage difference	32
4.1	<i>(No caption)</i>	76
4.2	<i>(No caption)</i>	76
4.3	<i>(No caption)</i>	76
6.1	The low-skill, bad-job trap and the high-skill, good-job equilibrium	119
7.1	Shares of non-manual labour and wage costs in UK manufacturing, 1948–90	132
7.2	Non-manual/manual relative wages in UK manufacturing, 1948–90	132
8.1	Shortages of skilled and unskilled labour	152
12.1	Trainees in manufacturing industries, Great Britain	262
12.2	Trends in expected training expenditure during the recession of the early 1900s	264

# Tables

---

5.1	Outputs conditional on innovative success	<i>page</i> 94
5.2	Payoffs conditional on innovative success and past history	95
7.1	Shares of non-manual labour and wage costs and relative wages in UK manufacturing, 1948–90	131
7.2	Changes in the structure of employment in UK manufacturing in the 1980s and between and within industry decompositions	134
7.3	Changes in the structure of employment in 402 establishments, 1984–90	137
7.4	Changes in employment shares and R&D intensity in 16 two-digit manufacturing industries, 1982–89	140
7.5	Changes in employment shares and innovation in 16 two-digit manufacturing industries, 1980–85	142
7.6	Changes in employment shares and introduction of computers, 1984–90	144
8.1	Productivity regressions: estimates of equation (1) for 81 industries	156
8.2	Productivity regressions: estimates of equation (2) for subpanel	158
8.3	Decomposition of productivity growth, 1983–1989	159
8.4	Wage regressions: panel data estimates of equation (3) for 81 industries	161
8.5	Wage regressions: estimates of equation (3) for 33 industries	162
8.6	Decomposition of wage growth, 1983–89	164
9.1	Estimated percentage changes in output, employment and labour productivity in national biscuit industries, 1980–90	180
9.2	Biscuit export and import shares, 1980 and 1990	180
9.3	'Quality-adjusted' measures of labour productivity levels in biscuit manufacturing in Britain, The Netherlands, Germany and France	182
9.4	Estimated average age of machinery in biscuit plant samples	184

9A.1	Distribution of plant sizes in national samples of biscuit manufacturers	192
9B.1	Distribution of ages of machinery in biscuit plant samples	193
9C.1	Distribution of output by quality-grade in national samples of biscuit manufacturers	194
10.1	Comparable levels of vocational qualification in the UK and Germany	204
10.2	Skill levels of the manufacturing workforce, by sector: UK, 1987	205
10.3	Panel regressions, 1981–87	206
10.4	Skill levels of the manufacturing workforce, by sector: Germany, 1987	207
10.5	Correlations between skill levels, UK and Germany, 1987	208
10.6	Mean skill proportions in manufacturing, 1987	208
10.7	Skill levels and sectoral characteristics: UK and Germany, 1987	209
10.8	Value and UK and German exports, non-manufacturing and manufacturing, by country, 1978 and 1987	211
10.9	Mean RUVs, SITC 5–8, by country and year	213
10.10	Determinants of relative UK and German exports to five major markets	220
10.11	Determinants of relative UK and German exports to five major markets	221
10.12	Determinants of relative UK and German exports per employee to five major markets	223
10.13	Ratio of UK to German manufacturing exports, by market, 1978 and 1987	225
12.1	Anticipated movements in training expenditures: Industrial Society evidence	264
12.2	Trends in job-related training received by employees of working age and the number on an apprenticeship in the four weeks before the survey, Great Britain	266
12.3	Trends in the numbers of employees of working age receiving job-related training in the four weeks before the survey, by social class, Great Britain	267
12.4	Trends in the numbers of employees of working age receiving job-related training or on an apprenticeship in the four weeks before the survey, by industry	268
12.5	Length of training course, by social class, Great Britain	269
12.6	Trends in training which leads to a qualification, Great Britain	270

12.7	Length of training course by outcome of training, Great Britain	270
12.8	The decline in training: ordered probit analysis	274
13.1	Conditional logit estimates of the probability of entering an apprenticeship	292
13.2	Predicted apprenticeship probabilities conditional on leaving school at age 16	293
13.3	Competing risks estimates with time-varying covariates	295
13.4	Competing risks estimates with completed apprenticeship variables combined	297
