

TABLE OF CONTENTS

PRINCIPAL CONCLUSIONS	13
EXECUTIVE SUMMARY	15
1. Current situation	15
2. Lessons from past experience	17
3. A continuation of present policies	20
4. What should be done?	22

Part I

BACKGROUND TRENDS AND PROBLEMS

1. INTRODUCTION	29
1. Towards sustainable development	29
2. Urban travel and sustainable development	30
2. ECONOMIC, SOCIAL AND URBAN TRENDS	33
1. A century of rising incomes	33
2. Car ownership	34
3. Changing households	38
4. Changing lifestyles	39
5. Advances in telecommunications	39
6. Urban structure	40
7. Urban car traffic	44
8. Road freight	46
9. Concluding remarks	47
3. PROBLEMS EXPERIENCED	49
1. Congestion	49
2. Road casualties	52
3. Inaccessibility and car dependence	57
4. Air pollution	60
5. Water pollution	63
6. Noise and vibration	63
7. Severance and traffic domination	66
8. Energy consumption and global warming	67
9. Imbalance of economic activity	69

10. High land and property prices	69
11. Decaying urban fabric	70
12. Urban sprawl and peripheral development	70
13. Concluding remarks	70

Part 2

POLICY ANALYSIS

4. POLICY LEVERS AVAILABLE	75
1. Policies and measures in current use	75
2. Interactions between policies	79
3. Adaptability of people and firms	81
4. Social implications of policies	81
5. Policy mix – participation and acceptance	83
6. Concluding remarks	83
5. LAND-USE PLANNING POLICIES	85
1. Established policies	85
2. Recent policy initiatives	92
3. The results of studies	93
4. Effectiveness of land-use planning policies in practice	97
5. Concluding remarks	102
6. TRANSPORT POLICIES	103
1. Public transport	103
2. Cycling and walking	109
3. Traffic restraint	111
4. Making more efficient use of the road system	116
5. Investment in roads and parking	117
6. Urban freight distribution	119
7. Environmental standards and targets	120
8. Measures to reduce fuel consumption and CO ₂ emissions	124
9. Road safety standards and targets	130
10. Concluding remarks	132
7. PAST ACHIEVEMENTS AND NEW OBJECTIVES	133
1. Policy objectives	133
2. Policy impacts	134
3. Future prospects	140
4. Concluding remarks	143

Part 3

POLICIES FOR THE 1990s AND BEYOND

8. COMBINING LAND-USE AND TRANSPORT POLICY	147
1. A new approach	147
2. Strand 1: The adoption of best practice policies	150

3. Likely effects of best practice	151
4. Strand 2: Innovations in policies	152
5. Likely effects of the policy innovations strand	154
6. Strand 3: Sustainable urban development	154
7. Likely effects of measures to achieve sustainable development	155
8. Comparative assessment of the various strands of the package	159
9. Concluding remarks	162

Annexes

1. URBAN TRAVEL AND ENVIRONMENTAL TRENDS	165
1. Introduction	165
2. The changing pattern of travel and underlying trends	165
3. Urban transport problems: congestion, noise and pollution	176
4. Urban transport and land use policies	190
5. Conclusions	194
2. SUMMARY OF NATIONAL STRATEGIC PLANNING POLICIES	197
1. Introduction	197
2. Main aspects of policy of participating countries	197
3. Summary and conclusions of Overviews analysis	206
3. SUMMARY OF CASE STUDIES	209
1. Introduction	209
2. Case Study summaries	209
3. Overall results	221
4. Concluding remarks	229
BIBLIOGRAPHY	231
DEFINITIONS AND ABBREVIATIONS	237

LIST OF FIGURES

2.1. Trends in GDP in OECD countries	34
2.2. Car ownership trends in a selection of countries	35
2.3. Car ownership in different parts of German cities	36
2.4. Car ownership trends in towns and cities	37
2.5. Travel in different car-owning households	37
2.6. Changes in household size	38
2.7. Dominance of leisure trips over other vehicle uses in Germany	39
2.8. Changes in the proportion of people living in the inner areas of cities	43
2.9. Percentage change in traffic levels: trends and forecasts	45
2.10. Freight traffic trends in ECMT countries	47
3.1. Perceived concerns over congestion in a sample of cities	51
3.2. Changes in speed over time	51
3.3. Road death rate in the European Union, 1990	52
3.4. Road traffic mortality, 1991	53
3.5. Trends in road deaths in a number of countries, 1980-1991	55
3.6. Overall trends in road accidents in ECMT countries	56

3.7.	Overall trends in road accidents in Central and Eastern Europe	56
3.8.	Public transport use in Norwegian and Swiss cities	59
3.9.	Trends in pollution levels in the United Kingdom	62
3.10.	Perceived severity of air pollution problems in cities	62
3.11.	Noise nuisance to people in their homes	64
3.12.	Perceived noise problems in cities	65
3.13.	Regional shares of motor vehicle emissions, 1990	71
4.1.	Past and future policies in a selection of towns and cities	79
5.1.	The share of travel by walking, cycling and car in the Federal Republic of Germany, 1989	86
5.2.	Fuel use per person versus population density, 1980	96
6.1.	Comparison of fuel prices, 1990	126
7.1.	Trends in vehicle-km and fuel consumed in OECD countries	141
7.2.	Likely impacts of the continuation of present policies by year 2015	142
8.1.	Effect on vehicle-km and fuel consumed in OECD countries of the joint OECD/ECMT policy package	160
8.2.	Target dates and major effects of the three policy strands	161
8.3.	Comparative assessment of proposed OECD/ECMT policies with a continuation of present policies for the year 2015	161
A1.1.	Car ownership: trends and forecasts	167
A1.2.	Modal shares in transport, 1990	170
A1.3.	Car's share of mechanised modes	171
A1.4.	Changes in the proportion of people living in the inner area	174
A1.5.	Changes in the proportion of jobs in the CBD	177
A1.6.	Changes in trip lengths by car, bus/coach, and metro/rail	180
A1.7.	Percentage change in traffic levels: trends and forecasts	181
A1.8.	Perceived severity, spread and trend of transport problems	182
A1.9.	Comparison of speeds by time of day and area	186
A1.10.	Changes in observed speeds: morning peak period	188
A1.11.	Changes in observed speeds: inter-peak period	189
A1.12.	Perceived effectiveness of policies in tackling congestion	193
A1.13.	Future measures planned	195

LIST OF TABLES

2.1.	Changes in purchasing power in the United Kingdom, 1971-1992	34
2.2.	Travel modes for the journey to work in cities of different densities, 1980	41
3.1.	City size and severity of congestion	50
3.2.	Fatality rates by vehicle user, United Kingdom	54
3.3.	Proportion of pollutants from road traffic in the European Union in 1985	60
3.4.	Contamination of surface water, Netherlands	63
3.5.	Percentage of population living with noise levels > 65 dB (A)	65
3.6.	Effects of various emissions on global warming, United Kingdom	68
3.7.	Car-km and energy use in different OECD regions in 1990	71
4.1.	Policies and measures in current use	76
4.2.	Popularity of measures in Case Studies	78
5.1.	Total distance travelled by mode and settlement population size in the United Kingdom, 1985/86	97

6.1.	Patronage changes in selected German cities before and after the introduction of metro systems	104
6.2.	Previous modes used by users of new metro and tram systems	105
6.3.	Effect of doubling the level of bus operation in Danish towns and cities	106
6.4.	Variation in mode use in different cities and countries	109
6.5.	Bicycle use in a selection of countries	110
6.6.	Trends in cycling in Norway	110
6.7.	Interaction of emission control technologies and fuel consumption	122
6.8.	Energy consumption in passenger transport in four EU countries, 1987	124
7.1.	Potential achievements of land-use and transport policies	135
7.2.	Policy impacts in Case-Study cities	136
8.1.	Policy instruments for sustainable development	148
A1.1.	Number and size of cities responding from each country	166
A1.2.	Per cent of cities at different levels of car ownership	169
A1.3.	Cities categorised by average trip lengths	179
A1.4.	Distribution of trip lengths by modes, 1990	179
A1.5.	Perceived congestion versus observed speeds	181
A1.6.	City size and the severity of congestion, noise and air pollution	183
A1.7.	Perceived severity of congestion in different countries	184
A1.8.	Number of cities in different speed bands, 1990	185
A1.9.	Types of policies implemented and number of responses	190
A1.10.	Policies implemented by cities in OECD/ECMT countries	191
A2.1.	Canadian assessment study of sustainable urban travel: initiatives and interactions	199
A3.1.	Basic characteristics of cities	222
A3.2.	Severity of problems as perceived by cities	223
A3.3.	Main policies and measures tried	225
A3.4.	Novel measures tried and their success	227
A3.5.	Achievement of broad objectives	228
