PREFACE	xiii
ACKNOWLEDGEMENTS	xv
LIST OF ABBREVIATIONS	xvi
<b>1</b>	
<b>HEALTH-RELATED QUALITY OF LIFE: A DISCUSSION OF THE CONCEPT, ITS USE AND MEASUREMENT</b>	<b>1</b>
Background: The 'quality of life'	1
What is quality of life and health-related quality of life? A review of the concepts and some attempts at measurement	2
A concept of health	7
The public's view of health	7
Recent interest and developments in measuring health-related quality of life	9
The need to operationalize health-related quality of life	10
Quality of life assessment and research on health care outcomes	11
Utility assessments and quality of life assessment	12
Generic, domain- and disease-specific measurement scales	14
Satisfaction with care and outcome	16
Who should rate quality of life?	16
<b>2</b>	
<b>CANCERS</b>	<b>20</b>
The importance of measuring the quality of life of cancer patients	20
What has been measured in studies of the quality of life of cancer patients?	20
What should be measured?	21
Recommended measurement scales	21
Review articles on quality of life measurement and cancer	22

The domains of measurement	22
The measurement scales	27
Scales measuring physical functioning, pain and symptoms	27
Functional status scales used with cancer patients	27
The Karnofsky Performance Index	27
Other versions of the Karnofsky Scale	30
The World Health Organization Functional Scale	30
The Zubrod Scale (or, the Eastern Cooperative Oncology Group Performance Scale: ECOGP)	30
Pain scales	31
The McGill Pain Questionnaire (MPQ)	31
Other symptom scales	31
Symptom Distress Scale	32
Lasry Sexual Functioning Scale for Breast Cancer Patients	32
Summary of other symptom scales	33
World Health Organization (WHO) Symptom Checklist	33
Medical Research Council (MRC) UK Scale	33
The Qualitator	33
Disease-specific quality of life scales	34
European Organization for Research on Treatment of Cancer (EORTC) Modular Approach	34
Rotterdam Symptom Checklist	34
Functional Living Index – Cancer (FLIC)	38
Functional Living Index – Emesis (FLIE)	40
Cancer Inventory of Problem Situations (CIPS) and the Cancer Rehabilitation Evaluation System (CARES)	42
Visual Analogue Scales	43
Spitzer Quality of Life (QL) Index	45
Linear Analogue Self-Assessment (LASA) Scale	45
Other visual analogue scales	48
Ontario Cancer Institute/Royal Marsden Linear Analogue Self-Assessment Scale	49
Padilla Quality of Life (QL) Scale and variants, including the Multidimensional Quality of Life Scale – (MQOLS-CA)	49
Holmes and Dickerson	51
Global Quality of Life Scale (Coates)	52
Quality of Life Index	53
Breast Cancer Chemotherapy Questionnaire (BCCQ)	53
Visual Analogue Scale (VAS) for Bone Marrow Transplant Patients	54
European Neuroblastoma Study Group Quality of Life Assessment Form – Children (QLAF-C)	55
Brief Details of Other Scales	56
Cancer Leukaemia Group B Studies (CALGB)	57
Ability Index	57
Burge Quality of Life Severity Scale	57
Anamnestic Comparative Self-Assessment (ACSA)	58
World Health Organization Quality of Life Assessment Instrument (WHOQOL)	58
TWiST	58
Conclusion	58
	59

<b>3</b>	<b>PSYCHIATRIC CONDITIONS AND PSYCHOLOGICAL MORBIDITY</b>	<b>61</b>
	Quality of life research and psychiatric and psychological morbidity	61
	Measuring quality of life in institutions	61
	Community indicators of quality of life	62
	Measuring quality of life in individuals: The domains of measurement	63
	Subjective accounts and the value of patients' ratings	66
	<b>THE MEASUREMENT SCALES</b>	
	<b>Part I Symptom scales</b>	
	Background	66
	Symptom questionnaires	69
	Hopkins Symptom Checklist (SCL) and the Symptom Checklist-90	69
	Brief Symptom Inventory (BSI)	71
	Symptom Rating Test (SRT)	72
	Center for Epidemiological Studies of Depression Scale (CES-D)	73
	Rand Depression Screener	74
	Hospital Anxiety and Depression (HAD) Scale	76
	Goldberg's General Health Questionnaire (GHQ)	76
	Beck Depression Inventory (BDI)	78
	Hamilton Depression Scale (HDS)	80
	Zung Self-Rating Depression Scale	82
	State-Trait Anxiety Inventory (STAI)	84
	Profile of Mood States (POMS)	85
	Scales for children	87
	Conclusion	88
	<b>Part II Quality of life instruments</b>	
	Condition-specific quality of life scales	88
	Quality of Life Scale (QLS)	89
	Lehman Quality of Life Interview	90
	Lancashire Quality of Life Profile	93
	SmithKline Beecham Quality of Life Scale (SBQOL)	95
	Oregon Quality of Life Self-Report Questionnaire and Semi-structured Interview Rating Version	96
	Quality of Life Index for Mental Health (QLI-MH)	98
	Index of Health-Related Quality of Life	101
	Piloting of the Health of the Nation Outcome Scales	102
	Team for the Assessment of Psychiatric Services (TAPS) Measures	103
	General Well-Being Schedule (GWBS)	106
	Scales for assessing needs	108
	Key Informant Survey Scales	108
	The MRC Needs for Care Assessment	109
	Wyke's Assessment of Need Questionnaire	113
	Services Needed, Available, Planned, Offered, Rendered Instrument	114
	Patient attitude scales	114
	Social Problem Questionnaire	115
	Client Satisfaction Questionnaire (CSQ)	115

Satisfaction with Life Domains Scale	117
Conclusion	117
<b>Part III Role functioning and related instruments</b>	
Role functioning, performance and social behaviour scales	118
Social Functioning Schedule	119
Social Role Performance Schedule (SRPS)	120
Social Behaviour Schedule (SBS)	121
Rehabilitation Evaluation (REHAB)	123
Social Behaviour Assessment Schedule (SBAS)	124
WHO Psychiatric Disability Assessment Schedule (WHODAS)	126
Global Assessment Scale (GAS)	127
Global Assessment of Functioning Scale (GAFS)	128
Adjustment and adaptation scales for use with psychiatrically and/or physically ill people	128
Social Dysfunction Rating Scale	129
Structured and Scaled Interview to Assess Maladjustment (SSIAM)	129
Vineland Adaptive Behaviour Scales	131
Social Adjustment Scale-II (SAS-II) and Self-Report Version	132
Katz Adjustment Scales	134
Psychosocial Adjustment to Illness Scale (PAIS)	134
Global Adjustment to Illness Scale (GAIS)	136
Acceptance of Illness Scale	136
Reintegration to Normal Living (RNL) Index	137
Stress and coping scales for use with psychiatrically and/or physically ill people	137
Ways of Coping Scale	139
Health and Daily Living Form	141
Stress in Life Coping Scale	142
COPE	144
Control over life	145
Rotter's Internal-External Locus of Control Scale	145
Multidimensional Health Locus of Control Scales	146
Conclusion	148

<b>4 RESPIRATORY CONDITIONS</b>	149
Quality of life in respiratory disease sufferers	149
The domains of measurement	149
Measurement scales	153
Symptom-specific scales: Dyspnoea	153
The Fletcher Scale and the MRC Dyspnoea Grade and Respiratory Symptoms Questionnaire	155
Other variations	156
American Thoracic Society (ATS) Respiratory Questionnaire and Grade of Breathlessness Scale	156
Horsley Respiratory Symptoms Questionnaire	157
Summary of other indices of dyspnoea	158
American Lung Association Severity of Disability (COAD)	158
Feinstein's Index of Dyspnoea	158
Severity of Symptoms Visual Analogue Scale (VAS)	159
Oxygen Cost Diagram	159

The 6 and 12 Minute Walking Tests and Stair Climbing	160
Borg Ratio of Perceived Exertion	160
Mahler Baseline and Transition Dyspnoea Index	161
Disease-specific quality of life measures	162
Quality of life assessment in COPD/COAD patients: Disease-specific scales	162
Guyatt's McMaster Chronic Respiratory Questionnaire (CRQ)	162
St. George's Respiratory Questionnaire (SGRQ)	164
Chronic Disease Assessment Tool (CDAT)	166
Health Outcomes Institute TyPE Scales (HOI-TyPE) – COPD	167
Quality of life assessment in asthma patients: Disease-specific scales	167
Asthma Severity Scale	168
Living with Asthma Questionnaire	168
Outcome Measures in Ambulatory Care (Asthma and Diabetes) (OMAC)	169
Health Outcomes Institute TyPE Scales (HOI-TyPE) – Asthma Form	170
Asthma Quality of Life Questionnaire	171
Asthma Symptom Checklist	172
Summary of other scales which await full psychometric testing	173
Asthma Self-Efficacy Scale	173
Attitudes to Asthma Scale	173
Conclusion	174

## 5 NEUROLOGICAL CONDITIONS 175

Measuring health-related quality of life in neurology	175
Cerebrovascular accident (CVA/stroke)	176
The domains of measurement	176
Measurement scales	179
Stroke scales	179
Rankin Handicap Scale	179
National Institute of Health Stroke Scale	181
Canadian Neurological Scale (CNS)	181
Hemispheric Stroke Scale	181
Disease-specific measures of quality of life: Functional ability	182
Barthel Index	182
Nottingham Extended Activities of Daily Living Questionnaire	185
Frenchay Activities Index	186
Rivermead Mobility Index (RMI)	186
Disease-specific measures of quality of life: Stroke	187
Health Outcomes Institute TyPE Scales (HOI-TyPE) – Acute Stroke	187
Kudos Battery for Stroke Patients	189
Epilepsies	189
The domains of measurement	190
What instruments have been used?	190
Measurement scales	193
A severity measurement scale	193
Seizure Severity Scale	193
Disease-specific quality of life scales: Epilepsy	193
Washington Psychosocial Inventory	194
Epilepsy Surgery Inventory	194

Katz Adjustment Scales (revised for use with epilepsy)	196
Other	197
Health-Related Quality of Life Model	197
General tests of neurophysiological functioning	198
Trail-Making Test	198
Wechsler Scales	198
Wechsler Memory Scale (WMS)	198
Wechsler Adult Intelligence Scale (WAIS)	199
Scales for children	200
Tests for cognitive impairment in elderly people	201
Abbreviated Mental Test Score (AMTS)	201
Mini-Mental State Examination (MMSE)	202
Mental Status Questionnaire (MSQ)	204
Older Americans' Resources and Services Schedule (OARS) mental health measures	204
Brief Cognitive Functioning Scale (SIP sub-scale)	206
Geriatric Mental State (GMS) and Comprehensive Assessment and Referral Evaluation (CARE)	206
Conclusion	207

## **6 RHEUMATOLOGICAL CONDITIONS**

---

Quality of life in people with joint disorders	209
The domains of measurement	209
The measurement scales	214
Disease severity and functional classifications	214
Disease-specific scales: Physical functioning	215
Stanford Arthritis Center Health Assessment Questionnaire (HAQ)	215
Arthritis Impact Measurement Scales (AIMS)	218
Functional Status Index (FSI)	220
Western Ontario and McMaster Universities Arthritis Index (WOMAC)	222
Office of Population Censuses and Surveys (OPCS) Disability Scale	223
Rheumatoid Arthritis (RA) Impact on the Homemaker Questionnaire	224
Broader disease-specific quality of life scales	225
MACTAR (McMaster-Toronto Arthritis) Patient Function Preference Questionnaire	225
Hörnquist's Quality of Life Status and Change Scale	226
Schedule for the Evaluation of Individual Quality of Life (SEIQoL)	228
Health Outcomes Institute TyPE (HOI-TyPE) – Joint Conditions	228
Rand Joint Problems Battery	230
Summaries of other scales	231
Arthritis Helplessness Index (AHI)	231
EURIDISS (European Research on Incapacitating Diseases and Social Support)	232
Conclusion	232

## **7 CARDIOVASCULAR DISEASES**

---

Heart disease	234
Trends in measuring quality of life in people with heart disease	234
Most and least frequently used indicators	235

What should be measured?	235
The domains of measurement	236
The measurement scales	242
Categorizations and measures of physical activity	242
New York Heart Association Functional Classification Scale	242
Olsson Ranking Scale	243
Canadian Cardiovascular Society Functional Classification for Angina Pectoris	243
Specific Activity Scale (SAS)	243
Rankin Handicap Scale	245
Symptom questionnaires	245
Dyspnoea scales	245
Fletcher Questionnaire and the Rose (WHO) Questionnaires: The London School of Hygiene Dyspnoea Questionnaire and Cardiovascular Questionnaire (Angina of Effort)	245
Other scales	247
Feinstein Index of Dyspnoea	247
Ratio Property Scale	248
Disease-specific quality of life scales: Heart disease	248
Health Outcomes Institute TyPE Scales (HOI-TyPE) – Angina	248
Rand Congestive Heart Failure (Shortness of Breath/Enlarged Heart/Heart Failure) Battery and Rand Chest Pain (Angina) Battery	249
Guyatt's Chronic Heart Failure Questionnaire (CHQ)	250
Ferrans and Powers' Quality of Life Index (CARDIAC)	251
Rehabilitation Questionnaire	252
Circulatory disease	252
Trends in measuring quality of life in people with circulatory disease: Hypertension	252
What should be measured?	253
Disease-specific quality of life scales: Hypertension	254
Palmer's Symptom Checklist and Battery	254
Health Outcomes Institute TyPE Scales (HOI-TyPE) – Hypertension	254
Bulpitt's Hypertension Questionnaire and Batteries	255
Quality of Life Impairment Scale – Hypertension	256
Rand Health Insurance Study Blood Pressure Battery	257
Conclusion	258

---

## **8 OTHER DISEASE- AND CONDITION-SPECIFIC SCALES** 259

---

Other developments in the measurement of disease-specific quality of life	259
Health Outcomes Institute TyPE Scales (HOI-TyPE)	260
Popular generic measures used to supplement disease-specific scales	260
Disease-specific measures of quality of life	261
Diabetes	261
Outcome Measures in Ambulatory Care (Asthma and Diabetes) (OMAC)	261
Diabetes Impact Measurement Scales (DIMS)	262
Quality of Life Status and Change (QLSC)	263
Health Outcomes Institute TyPE Scales (HOI-TyPE) – Diabetes	264
Rand Diabetes Mellitus Battery	265
Diabetes Quality of Life Measure (DQOL)	266
Renal disease	267

Functional classification	267
The use of generic scales and domain-specific batteries	267
Haemodialysis Quality of Life Questionnaire (HQQLQ)	268
Leicester Uraemic Symptom Scale (LUSS)	268
Quality of Life Assessment	269
Bowel diseases	270
Inflammatory Bowel Disease Questionnaire (IBIQ)	270
Rand Surgical Conditions Battery: Haemorrhoids	271
Human Immunodeficiency Virus (HIV) and Acquired Immune Deficiency Syndrome (AIDS)	271
HIV Overview of Problems–Evaluation System (HOPES)	272
AIDS Health Assessment Questionnaire	273
Varicose veins	273
Varicose Veins Questionnaire	273
Rand Surgical Conditions Battery: Varicose Veins	274
Back pain	276
Clinical Back Pain Questionnaire	276
Children	278
Elderly people	278
A popular core (generic) measure for use in disease-specific studies in adults: The Short Form-36 (SF-36)	281

## **9 COMMENTS ON MEASUREMENT ISSUES AND SOURCES OF INFORMATION** 286

Study design	286
Questionnaire format	288
Response format and response scales	288
Types of measurements	290
Reliability and validity	291
Factor structure	293
Social desirability bias	293
Cross-cultural applicability	294
Time references	294
Place of interview and the interviewer	295
Contamination of results by hospital setting	295
Criteria for scale selection	295
Databases, clearing houses, and scale distributors	296

APPENDIX: A SELECTION OF USEFUL SCALE DISTRIBUTORS AND ADDRESSES	298
REFERENCES	304
INDEX	367
