

## Table of Contents

Editors' Preface	v
<b>Editorial and Invited Papers</b>	
Business process re-engineering: information systems opportunity or challenge? Opening Address <i>Bernard Glasson (Australia)</i>	1
Widening our views of information systems development Invited Speaker IFIP WG 8.1 <i>Mats Lundeberg (Sweden)</i>	7
Reengineering the role of IS professionals Invited Speaker IFIP WG 8.2 <i>Niels Bjorn-Andersen &amp; Angele Cavaye (Denmark)</i>	17
I/S challenges and opportunities: DSS and EDM Invited Speaker IFIP WG 8.3 <i>Ralph Sprague (United States)</i>	27
Re-engineering towards the meeting of the future Invited Speaker IFIP WG 8.4 <i>Doug Vogel (United States)</i>	35
A revisionist view of re-engineering Invited Speaker IFIP WG 8.5 <i>John King (United States)</i>	47
From re-equipment to people architecture: the modernisation of the Australian Taxation Office Panel Introduction <i>Bruce Wilson, Michael Cebalo, Cath Jolly &amp; Patsy Segall (Australia)</i>	57

The FRISCO announcement and its analysis Panel Introduction <i>E.D. Falkenberg, R.K. Stamper (The Netherlands)</i>	59
A methodology for business process re-engineering? Invited Speaker, Applications Track <i>Graeme Simsion (Australia)</i>	61
A new second information systems course: personal productivity with information technology Invited Speaker, Education Track <i>Gordon B. Davis &amp; J. David Naumann (United States)</i>	71
The challenge of transferring software and information technology Invited Speaker, Development Track <i>Priscilla J. Fowler (United States)</i>	79
Improving the quality of IS research: key issues for debate Panel Introduction <i>Ernest Jordan (Hong Kong)</i>	89
Relevance and rigour in Information Systems Research: some personal reflections on issues facing the Information Systems research community Invited Speaker, Research Track <i>R.D. Galliers (United Kingdom)</i>	93
False prophecies, successful practice and future directions in IT management Closing Address <i>Philip W. Yetton (Australia)</i>	103
<b>Submitted Papers</b>	
Toward conceptual clarity of outsourcing <i>S Ang (Singapore)</i>	113
Business process re-engineering and decision support systems: a cautionary tale <i>D R. Arnott &amp; P A. O'Donnell (Australia)</i>	127

Integration of data or information? An example from the police <i>G Bjerknes (Norway)</i>	137
The role of I/T in facilitating BPR: observations from the literature <i>C Butler (Australia)</i>	147
An advanced BPR methodology with integrated, computer based tools <i>P Calvert (Australia)</i>	161
A success factors model for inter-organisational systems <i>A L M Cavaye (Denmark) &amp; P B Cragg (New Zealand)</i>	171
Business process redesign as the reconstruction of a communicative space <i>D Cecez-Kecmanovic (Australia)</i>	181
Mobil Oil Australia's strategic electronic card marketing system <i>J Chu (Australia)</i>	191
Top down and bottom up management of BPR <i>J F Craig &amp; P W Yetton (Australia)</i>	201
A higher order "commuting loop" structure that supports very large information system data and process architecture <i>C N G (Kit) Dampney, M Johnson; P Dazeley &amp; V Reich (Australia)</i>	211
Scholarship and practice: the contribution of ethnographic research methods to bridging the gap <i>L J Davies (Australia) &amp; M D Myers (New Zealand)</i>	223
Modelling business processes for the purpose of redesign <i>J L G Dietz (The Netherlands)</i>	233
Methodology for reducing the complexity of large hypermedia projects <i>J Dospisil &amp; T Polgar (Australia)</i>	243

Distributable computing and organizational democratization: examining a powerful myth <i>D Dunkle, J N Perry, K L Kraemer &amp; J L King</i> <i>(United States)</i>	257
Using IT to support MIS planning: a literature review <i>Y Gao &amp; H J Oppelland (The Netherlands)</i>	269
Business modeling based on logistics to support business process re-engineering <i>H Gerrits (The Netherlands)</i>	279
Using workgroup modeling as a basis for re-engineering business processes <i>I T Hawryszkiewicz (Australia)</i>	289
If outsourcing IT is the answer - what is the question? <i>W G Hewett (Australia)</i>	299
CSCW as opportunity for business process re-engineering <i>A Hutchison (Switzerland)</i>	309
Establishing measurement for software quality improvement <i>R Jeffery (Australia), V Basili (United States), &amp;</i> <i>M Berry (Australia)</i>	319
The business information technology program at UNSW: meeting the needs of industry? <i>S Jones &amp; G Dick (Australia)</i>	331
IS outsourcing evaluations: lessons from the field <i>M C Lacity &amp; R Hirschheim (United States)</i>	343
Individual user satisfaction within user-led development: a longitudinal study <i>M Lawrence &amp; G Low (Australia)</i>	357
Decision support systems for the forecasting task: design issues and challenges <i>M Lawrence &amp; M O'Connor (Australia)</i>	367
Coupling core competencies - wiring information technology into the business <i>H P Lehmann (New Zealand)</i>	377

Implementing EDI at the University of Western Sydney, Macarthur: a case study in business process re-engineering <i>L Lim &amp; J Fletcher (Australia)</i>	387
Re-engineering the information systems curricula through integrated research: a Hong Kong model <i>L C K Ma &amp; J M Burn (Hong Kong)</i>	397
Business process development projects: the role of the top manager <i>M Mahring (Sweden)</i>	409
Workflow support for re-engineered case management in an English law firm <i>A Martin (United Kingdom)</i>	421
IT-Enabled business re-engineering: a study of Singapore's trade clearance process <i>B S Neo (Singapore)</i>	433
Expanding methodologies to handle distributed systems <i>T W Olle (United Kingdom)</i>	443
Business re-engineering and management alignment - a review of structural re-engineering in the public sector and the problem of management alignment with enterprise objectives <i>B Parker (Australia)</i>	459
A case for more case study research in group support systems <i>G P Pervan (Australia)</i>	469
Business process re-engineering as an enabling factor for lean management <i>O Petrovic &amp; H Zsifkovits (Austria)</i>	481
An MCDM based interactive support system with application to business process redesign <i>M A Quaddus (Australia)</i>	493
Accomplishing process change in the information systems organization: two contemporary challenges <i>N C Ramiller (United States)</i>	503

Some classic theories of organizational change, and their implications for business process innovation and re-engineering <i>A Rouse &amp; D Watson (Australia)</i>	513
'Information systems for reengineering? No problem!' - configuring resources for the information systems development process for different forms of business process reengineering <i>C Sauer (Australia)</i>	525
People centred process re-engineering: an evaluation perspective to office systems re-design <i>M Sherwood-Smith (Ireland)</i>	535
Automation policy implementation: re-engineering from within public administration <i>I Th M Snellen (The Netherlands)</i>	545
A study of TQM practice on software development in Singapore <i>M Tan &amp; C Y Yap (Singapore)</i>	557
Modeling information systems in business development: alternative perspectives on business process re-engineering <i>J Tolvanen &amp; K Lyytinen (Finland)</i>	567
Towards a research framework for business engineering <i>J W van Meel, P W G Bots &amp; H G Sol (The Netherlands)</i>	581
Integration requirements for tool-based generation of information system documentation <i>A A Verrijn-Stuart (The Netherlands)</i>	593
Business process reengineering: the need for a methodology to re-vision the organization <i>R Vidgen, J Rose, B Wood &amp; T Wood-Harper (United Kingdom)</i>	603
Software design for the automation of unadjusted function point counting <i>G E Wittig &amp; G R Finnie (Australia)</i>	613
Effective integration of multiple tools in a loosely-coupled tool interfacing paradigm for CASE <i>Y. Yang (Australia)</i>	625
On operation synchronisation in cooperative editing environments <i>Y Zhang &amp; Y Yang (Australia)</i>	635
