Contents

Part I: Introduction 1

Chapter 1 The Nature of SPSS 3

1.1 Getting Started with SPSS for Windows 3
1.2 Managing Data and Files 7
1.3 Transforming Variables and Data Files 15
1.4 Examining and Printing Output 23
1.5 Missing Values 24
Chapter Exercises 25

Part II: Descriptive Statistics 27

Chapter 2 Organization of Data 29

2.2 Organization of Categorical Data 29
2.3 Organization of Numerical Data 33
Chapter Exercises 39
Appendix II: SPSS Syntax for Organization of Data 40

Chapter 3 Measures of Location 41

3.1 The Mode 41
3.2 The Median and Other Percentiles 43
3.3 The Mean 44
Chapter Exercises 48
Appendix III: SPSS Syntax for Measures of Location 50

Chapter 4 Measures of Variability 51

4.1 Ranges 51
4.2 The Mean Deviation 52
4.3 The Standard Deviation 53
4.5 Some Uses of Location and Dispersion Measures Together 54
Chapter Exercises 56
Appendix IV: SPSS Syntax for Measures of Variability 58

Chapter 5 Summarizing Multivariate Data: Association Between Numerical Variables 59

5.1 Association of Two Numerical Variables 59
5.2 More than Two Variables 67
Chapter Exercises 68
Appendix V: SPSS Syntax for Summarizing Multivariate Data: Association Between Numerical Variables 71

Chapter 6 Summarizing Multivariate Data: Association Between Categorical Variables 73

6.1 Two-by-Two Frequency Tables 73
6.2 Larger Two-Way Frequency Tables 77
6.3 Three Categorical Variables 79
6.4 Effects of a Third Variable 83
Chapter Exercises 86
Appendix VI: SPSS Syntax for Summarizing Multivariate Data: Association Between Categorical Variables 88

Part III: Probability 89

Chapter 7 Basic Ideas of Probability 91

7.3 Probability in Terms of Equally Likely Cases 91
7.8 Random Sampling; Random Numbers 93
Chapter Exercises 93
Appendix VII: SPSS Syntax for Basic Ideas of Probability 94

Chapter 8 Probability Distributions 95

8.5 Family of Standard Normal Distributions 95
Chapter Exercises 97
Appendix VIII: SPSS Syntax for Probability Distributions 98

Chapter 9 Sampling Distributions 99

9.1 Sampling from a Population 99
9.2 Sampling Distribution of a Sum and of a Mean 100
9.5 The Normal Distribution of Sample Means 101
Chapter Exercises 103

Part IV: Statistical Inference 105

Chapter 10 Using a Sample to Estimate Characteristics of One Population 107

10.1 Estimation of a Mean by a Single Number 107
10.2 Estimation of Variance and Standard Deviation 109
10.3 An Interval of Plausible Values for a Mean 109
10.4 Estimation of a Proportion 112
10.5 Estimation of a Median 112
10.6 Paired Measurements 113
Chapter Exercises 114
Appendix X: SPSS Syntax for Using a Sample to Estimate Characteristics of One Population 115

Chapter 11 Answering Questions About Population Characteristics 117

11.1 Testing a Hypothesis About a Mean 117
11.3 Testing Hypotheses About a Mean when the Standard Deviation is Unknown 119
11.4 P Values: Another Way to Report Tests of Significance 121
11.5 Testing Hypotheses About a Proportion 122
11.6 Testing Hypotheses About a Median: The Sign Test 124
11.7 Paired Measurements 126
Chapter Exercises 129
Appendix XI: SPSS Syntax for Answering Questions About Population Characteristics 131

Chapter 12 Differences Between Two Populations 133

12.1 Comparison of Two Independent Sample Means when the Population Standard Deviations are Known 133
12.2 Comparison of Two Independent Sample Means when the Population Standard Deviations are Unknown but Treated as Equal 134
12.3 Comparison of Two Independent Sample Means when the Population Standard Deviations are Unknown and not Treated as Equal 137
12.4 Comparison of Two Independent Sample Proportions 137
12.5 The Sign Test for a Difference in Locations 139
Chapter Exercises 141
Appendix XII: SPSS Syntax for Differences Between Two Populations 143

Chapter 13 Variability in One Population and in Two Populations 145

13.1 Variability in One Population 145
13.2 Variability in Two Populations 146
Chapter Exercises 148
Appendix XIII: SPSS Syntax for Variability in One Population and in Two Populations 149

Part V: Statistical Methods for Other Problems 151

Chapter 14 Inference on Categorical Data 153

14.1 Tests of Goodness of Fit 153
14.2 Chi-Square Tests of Independence 156
14.3 Measures of Association 158
Chapter Exercises 162
Appendix XIV: SPSS Syntax for Inference on Categorical Data 165

Chapter 15 Simple Regression Analysis 167

15.1 The Scatter Plot and Correlation Coefficient 167
15.2 SPSS for Simple Regression Analysis 169
15.3 Another Example: Inverse Association of x and y 175
Chapter Exercises 180
Appendix XV: SPSS Syntax for Simple Regression Analysis 181

Chapter 16 Comparisons of Several Populations 183

16.1 One-Way Analysis of Variance 183
16.2 Which Groups Differ from Which, and by How Much? 188
16.3 Analysis of Variance of Ranks 190
Chapter Exercises 192
Appendix XVI: SPSS Syntax for Comparisons of Several Populations 194

Appendix Data Files 195
