Contents

Preface ix

Part I Why Operations Research?

1 The Systems Approach: Rational, Systematic, Objective Approaches to Problem Solving

What is a System? 2
The Library as a System 3
Defining the Systems Approach 5
Summary 10
Questions 10

2 Overview of Library Operations Research

The Role of Operations Research 11
Models and Modeling 12
The Definition of an Algorithm 19
Inventory of Operations Research Techniques 19
The History of Operations Research in Libraries 21
Problems of Implementation 24
Library Goals and Performance Measures 25
Summary 28
Questions 28

Part II Problem Solving Techniques

3 Decision Theory

The Decision 30
Examples of Library Decisions 30
Elements of a Decision 31

Scales of Measurement 35
Evaluation of Alternatives 37
Decision Theory Applied to Library Problems 42
Game Theory 48
Giving It a Try 50
Summary 50
Questions 50

4 Resource Allocation

Decision Variables and Parameters 52
Objective Functions and Constraints 53
Linear Programming 54
Nonlinear Programming Considerations 66
Integer Programming and Cost–Benefit Analysis 68
Multiple Objective Functions 69
Summary 70
Questions 70

5 Graph Theory and Library Networks

Definitions 73
Graphs and Information Structures 75
Scheduling Library Operations 76
Library Networks 81
Summary 84
Questions 84

6 Queuing Theory

Nondeterministic Processes 85
Queues 86
Steady-State 91
The Deterministic Queue 92
The M/M/1 Queue 92
Multiple Server Queues 96
Other Queuing Situations 98
Queuing Networks 99
Queuing Theory in Libraries 100
Summary 101
Questions 101

7 Stochastic Processes and Library Models

Terminology 104
Markov Chains 107
A General Model of Productivity 110
Productivity and Usage 118

A Markovian Analysis 119
Summary 122
Questions 122

8 Modeling and Simulation

Walter G. Rudd and Bert R. Boyce

Introduction 123
An Example 124
Simulation as a Management Tool 125
Yet Another Example 127
Why Simulate? 128
Simulation for a Management Game 131
A Practical Example 131
Summary 134
Questions 135

Part III Library Implementation

9 Library Management Information Systems

Introduction 136
An Example 137
Data Identification and Collection 138
Data Analysis 145
Report Generalization and Question/Answer Systems 145
Summary 146
Questions 146

Appendix 147

Bibliography 167

Index 189
