
CONTENTS

Contributors **xiii**

Preface **xv**

Chapter 1. The History of LCA **1.1**

- 1.1. Overview *1.1*
- 1.2. The Systemic Nature of Industry *1.2*
- 1.3. Early Applications of LCA *1.3*
- 1.4. The LCA Model *1.3*
- 1.5. Terminology *1.4*
- 1.6. Why Is LCA Important? *1.5*
- 1.7. Pollution Prevention *1.5*
- 1.8. Life-Cycle Assessment as a Tool *1.6*
- 1.9. Streamlining *1.7*
- 1.10. Life-Cycle Design *1.7*
- 1.11. Costing *1.7*
- 1.12. Development of Public Policy *1.8*
- 1.13. International Views of LCA Applications *1.8*
- 1.14. The Future of LCA *1.8*
- References *1.9*

Chapter 2. LCA Methodology **2.1**

- 2.1. Overview *2.1*
- 2.2. Goal Definition and Scoping *2.2*
 - 2.2.1. Defining the Purpose *2.2*
 - 2.2.2. Defining Boundary Conditions *2.4*
- 2.3. Inventory Methodology *2.8*
 - 2.3.1. Introduction *2.8*
 - 2.3.2. Steps to Perform an LCI *2.9*
 - 2.3.3. Variable Practices for Performing LCI Studies *2.19*
- 2.4. Impact Methodology *2.26*
 - 2.4.1. Conceptual Framework *2.28*
 - 2.4.2. Classification *2.28*
 - 2.4.3. Characterization *2.30*
 - 2.4.4. Application Issues *2.35*
 - 2.4.5. Implications for LCI Data Development *2.35*
 - 2.4.6. Conclusion *2.36*
- References *2.37*

Chapter 3. Software Systems and Databases **3.1**

- 3.1. User Needs and Requirements for LCA Software *3.2*
- 3.2. Definition of LCA Software Classes *3.3*
- 3.3. General Structure and Function of LCA Software *3.6*

3.3.1. Inventory Analysis Software	3.6
3.3.2. Impact Assessment Software	3.9
3.3.3. Improvement Assessment Software	3.10
3.4. Evaluating LCA Software	3.11
3.4.1. Overall Structure and System Representation	3.11
3.4.2. Embedded Data and Databases	3.13
3.4.3. Data and Methodology Quality Assessment	3.13
3.4.4. Reports, Results Analysis, and Archiving	3.14
3.4.5. Hardware and Operating System Choices	3.15
3.4.6. Financial Considerations	3.15
3.5. Public Databases	3.15
3.6. Future Developments	3.18
References	3.20
Further Information	3.22

Chapter 4. Streamlining

4.1

4.1. Why Streamline?	4.1
4.2. What Is Streamlining?	4.3
4.3. Approaches to Streamlining LCA Methods	4.3
4.3.1. Limiting or Eliminating Life-Cycle Stages	4.4
4.3.2. Focusing on Specific Environmental Impacts or Issues	4.5
4.3.3. Eliminating Specific Inventory Parameters	4.5
4.3.4. Limiting or Eliminating Impact Assessment	4.6
4.3.5. Using Qualitative as Well as Quantitative Data	4.6
4.3.6. Using Surrogate Data	4.6
4.3.7. Establishing Criteria to Be Used as “Show Stoppers” or “Knockouts”	4.7
4.3.8. Limiting the Constituents Studied to Those Meeting a Threshold Quantity	4.7
4.3.9. Combining Streamlining Approaches	4.7
4.4. Selecting an Approach	4.8
4.4.1. How Will the Study Be Used?	4.8
4.4.2. What Alternatives or Actions Will Be Considered as a Result of the Study?	4.8
4.4.3. What Information Is Needed to Support the Uses of the Study?	4.9
4.4.4. What Level of Specificity Is Required?	4.9
4.4.5. What Data Quality Objectives Must Be Met?	4.9
4.4.6. How Much Is Already Known?	4.9
4.4.7. How Well-Defined and Specific Is the Product or Process under Study?	4.10
4.5. Case Studies	4.10
4.5.1. Qualitative and Quantitative Approach for Studies of Building Materials	4.10
4.5.2. Pollution Prevention Factors Approach	4.12
4.5.3. Matrix Approaches to Abridged Life-Cycle Assessment	4.13
4.5.4. Application of Life-Cycle Concepts to Product Stewardship	4.14
4.5.5. ATHENA—Environmental Assessment Model for the Building and Design Community	4.15
4.6. The Future of Streamlining Efforts	4.16
References	4.16

Chapter 5. Applications of Life-Cycle Assessment

5.1

5.1. Introduction	5.1
5.2. Case Studies of Product Improvement	5.2
5.3. Case Studies of Product Comparisons	5.7
5.4. Case Studies in Strategic Planning	5.11
5.5. Case Studies of Public Sector Uses	5.11
5.6. Summary	5.17
Bibliography	5.17

Chapter 6. Life-Cycle Design**6.1**

- 6.1. Introduction 6.1
- 6.2. Terminology 6.2
- 6.3. Definition of the Product System 6.3
 - 6.3.1. Life-Cycle Stages 6.3
 - 6.3.2. Product System Components 6.4
- 6.4. Life-Cycle Framework and Goals 6.5
 - 6.4.1. Life-Cycle Design Goals 6.6
- 6.5. Life-Cycle Management 6.8
 - 6.5.1. Internal Elements 6.9
 - 6.5.2. External Factors 6.9
- 6.6. Life-Cycle Development Process 6.10
- 6.7. Needs Analysis and Project Initiation 6.12
 - 6.7.1. Define Project Scope and Purpose 6.12
 - 6.7.2. Set System Boundaries 6.12
 - 6.7.3. Evaluate Baseline and Benchmark Competitors 6.13
 - 6.7.4. Identify Opportunities and Vulnerabilities 6.13
- 6.8. Product System Requirements 6.14
 - 6.8.1. Design Checklists 6.14
 - 6.8.2. Requirements Matrices 6.14
- 6.9. Design Strategies and Solution 6.21
 - 6.9.1. Design Strategies 6.21
 - 6.9.2. Design Solution 6.25
- 6.10. Design Evaluation 6.26
 - 6.10.1. LCA and Its Application to Design 6.27
 - 6.10.2. Other Design Evaluation Approaches 6.29
- 6.11. Summary 6.30
 - 6.11.1. Life-Cycle Design Principles 6.30
- References 6.32

Chapter 7. Life-Cycle Costing: Concepts and Applications**7.1**

- 7.1. Conceptual Framework 7.1
- 7.2. Total Cost Assessment 7.4
 - 7.2.1. Comprehensive Cost Inventory 7.4
 - 7.2.2. Appropriate Cost Allocation 7.6
 - 7.2.3. Time Horizon 7.8
 - 7.2.4. Financial Indicators 7.8
- 7.3. Case Study 7.8
 - 7.3.1. Company Background 7.8
 - 7.3.2. Project Background 7.8
 - 7.3.3. Project Description 7.9
 - 7.3.4. Project Financial Analysis 7.9
 - 7.3.5. Company and TCA Analyses 7.9
- 7.4. Life-Cycle Costing 7.11
 - 7.4.1. Methods of Developing Monetary Values 7.12
 - 7.4.2. Example of Life-Cycle Costing 7.14
- 7.5. Conclusions 7.16
- References 7.17
- Further Reading 7.17

Chapter 8. Public Policy Applications of Life-Cycle Assessment**8.1**

- 8.1. Introduction 8.1
- 8.2. Overview of Current Uses and Potential Applications 8.2
 - 8.2.1. Life-Cycle Assessment in Europe and the United States 8.2
 - 8.2.2. Framework for Life-Cycle Assessment Potential 8.3

- 8.3. Potential Public Policy Applications of Life-Cycle Concepts 8.3
 - 8.3.1. Legislation 8.3
 - 8.3.2. Regulatory Development: A Case Study 8.4
 - 8.3.3. Executive Order on Federal Acquisition, Recycling, and Waste Prevention: Another Case Study 8.5
 - 8.3.4. Federal Trend toward Commercialization 8.6
- 8.4. Issues 8.7
 - 8.4.1. Methodological 8.7
 - 8.4.2. Trade Implications 8.7
 - 8.4.3. Need for International Standards 8.8
- 8.5. Where Do We Go from Here? 8.8
 - 8.5.1. Life-Cycle Concepts and Environmental Management Systems 8.8
 - 8.5.2. Taking on the Life-Cycle Challenge 8.9
- References 8.10

Chapter 9. European Perspective

9.1

- 9.1. Introduction 9.1
- 9.2. Use in European Legislation 9.1
 - 9.2.1. Ecolabel Regulation 9.1
 - 9.2.2. Packaging and Packaging Waste Directive 9.3
 - 9.2.3. Other Examples 9.4
- 9.3. Data 9.5
 - 9.3.1. Openly Accessible Databases 9.5
 - 9.3.2. Subscription Databases 9.7
 - 9.3.3. Centralized Database Systems 9.8
- 9.4. Impact Assessment 9.9
 - 9.4.1. Nonvaluative Approaches 9.10
 - 9.4.2. Valuative Approaches 9.11
- References 9.13

Chapter 10. Materials in LCA

10.1

- Overview 10.1
- 10.1. Materials in LCA 10.1
 - 10.1.1. Materials Are Fundamental to LCA 10.1
 - 10.1.2. LCA's Importance to Materials Producers 10.2
- 10.2. Methodological Considerations 10.2
 - 10.2.1. Dimensions of LCA 10.2
 - 10.2.2. Methodological Issues 10.3
- 10.3. Materials Information for LCA 10.5
 - 10.3.1. Multimaterial Projects 10.6
 - 10.3.2. Steel 10.7
 - 10.3.3. Aluminum 10.7
 - 10.3.4. Other Metals 10.7
 - 10.3.5. Plastics 10.7
 - 10.3.6. Pulp and Paper 10.8
- 10.4. Discussion 10.8
 - 10.4.1. LCA as Environmental Mapping 10.8
 - 10.4.2. Life-Cycle Design 10.10
 - 10.4.3. Future Needs 10.11
- 10.5. Conclusions 10.12
- References 10.12

Chapter 11. Application of Life-Cycle Assessment to Business Performance

11.1

- 11.1. Introduction 11.1
- 11.2. Definition of Life-Cycle Assessment 11.2

11.3. SETAC's Role in LCA Development	11.3
11.3.1. Technical Framework for LCA	11.3
11.3.2. Impact Assessment	11.3
11.4. ISO TC-207 LCA Standards	11.5
11.4.1. Summary of Standards	11.6
11.4.2. Status of Activities	11.6
11.5. Design for Environment—A Path Forward	11.6
11.6. Examples of Application of Life-Cycle Principles to Product Evaluation	11.7
11.7. Applications of LCA	11.11
References	11.12

Chapter 12. Life-Cycle Assessment: A System Analysis

12.1

12.1. Introduction	12.1
12.2. LCA's Application in Product Design: A Case Study	12.2
12.2.1. Background	12.3
12.2.2. Description of Project	12.3
12.2.3. Results and Conclusions	12.6
12.3. Process Design: The Example of Waste Management	12.8
12.3.1. Private Company Case Study: IBM	12.9
12.3.2. Policy-Making Case Study: The European Directive on Packaging and Packaging Waste	12.15
12.3.3. Conclusions	12.18
12.4. Enhancing Life-Cycle Assessment	12.19
12.4.1. Addressing and Exploiting Variability and Uncertainty in LCA	12.19
12.4.2. From Analyzing a System to Assessing Its Impact on the Environment	12.21
12.4.3. Streamlining the LCA Resource Requirements	12.23
12.5. Conclusions	12.28
References	12.28

Chapter 13. Valuation as a Step in Impact Assessment: Methods and Case Study

13.1

13.1. Valuation as Part of Life-Cycle Assessment	13.1
13.2. Valuation Methods	13.4
13.2.1. Ecoscarcity Methodology	13.4
13.2.2. Environmental Theme Methodology	13.5
13.2.3. Method of Environmental Priority Strategies	13.5
13.2.4. Conclusions Based on Existing Methods	13.5
13.3. Elements of Valuation	13.6
13.3.1. Element 1: Results of Inventory Analysis, Classification, and Characterization	13.7
13.3.2. Element 2: Specific Contribution to the Impact Category	13.7
13.3.3. Element 3: Ecological Significance of the Impact Category	13.7
13.3.4. Integrating the Elements	13.7
13.4. Valuation Approach of the German Federal Environmental Agency	13.8
13.4.1. Impact Assessment Results	13.8
13.4.2. Weighting of the Results	13.9
13.4.3. Weighting by Specific Contribution	13.9
13.4.4. Weighting by Ecological Importance	13.9
13.4.5. Verbal-Argumentative Overall Evaluation	13.10
13.4.6. Summary of Ecological Importance of Impact Categories	13.11
13.5. Case Study on Beverage Containers	13.11
Bibliography	13.14

Chapter 14. Integrating Life-Cycle Assessments in Product Development and Management **14.1**

- 14.1. Introduction *14.1*
- 14.2. An Integrated Approach to Sustainable Product Development *14.3*
 - 14.2.1. The Main Concept *14.3*
 - 14.2.2. Customer Requirements and Quality Function Deployment *14.5*
 - 14.2.3. Life-Cycle Economy and Life-Cycle Cost Analysis *14.5*
 - 14.2.4. Environmental Performance and Life-Cycle Assessment *14.6*
 - 14.2.5. Main Project Activities in Sustainable Product Development *14.7*
- 14.3. Experiences from Case Projects *14.9*
 - 14.3.1. Development of New Light Fittings *14.9*
 - 14.3.2. Development of New Lining Paste for Ferroalloy Plants *14.13*
 - 14.3.3. Development of New Electric Cable Systems *14.20*
- 14.4. Experiences with the LCA Method Applied in Product Development *14.27*
 - 14.4.1. Goal and Scoping *14.27*
 - 14.4.2. Inventory *14.31*
 - 14.4.3. Impact Assessments *14.35*
 - 14.4.4. Improvement Assessment *14.38*
- 14.5. General Experiences from the Project *14.40*
 - 14.5.1. Concluding Remarks *14.42*
- Bibliography *14.42*

Chapter 15. Application of Life-Cycle Assessment to Solid Waste Management Practices **15.1**

- 15.1. Introduction *15.1*
- 15.2. Overview of Life-Cycle Assessment *15.2*
 - 15.2.1. Inventory Analysis *15.3*
 - 15.2.2. Impact Assessment *15.6*
 - 15.2.3. Improvement Assessment *15.8*
- 15.3. Presentation of Results *15.8*
- 15.4. Applications of LCA *15.8*
- 15.5. Interpretation of the Results *15.9*
- 15.6. Applying LCA to Waste Management Scenarios and Using the Results to Set Policy Options *15.9*
 - 15.6.1. Software Tools and Databases *15.9*
 - 15.6.2. Formulating an Environmental Policy Based on Results of LCA Studies *15.10*
- 15.7. Conclusions *15.12*
- Appendix A: Checklist to Determine the "Usefulness" of LCI and LCA Reports *15.12*
- Appendix B: Checklist of Points for Consideration in Conduct of LCI or LCA Study *15.13*

Chapter 16. Integrating Life-Cycle Assessment within an Overall Framework for Environmental Management **16.1**

- 16.1. Introduction *16.1*
- 16.2. Using LCA for Environmental Decision Making *16.2*
 - 16.2.1. LCA—What Does It Stand For? *16.2*
 - 16.2.2. Using the Life-Cycle Inventory *16.3*
 - 16.2.3. Interpreting Life-Cycle Inventory Results *16.5*
- 16.3. An Overall Environmental Management Framework *16.7*
 - 16.3.1. Human and Environmental Safety *16.7*
 - 16.3.2. Regulatory Compliance *16.10*
 - 16.3.3. Efficient Resource Use and Waste Management *16.10*

- 16.3.4. Addressing Societal Concerns 16.11
- 16.3.5. The Decision-Making Process 16.12
- 16.4. Conclusions 16.14
- References 16.14

Chapter 17. Beginning LCA: A Dutch Guide to Environmental Life-Cycle Assessment

17.1

-
- 17.1. Introduction 17.2
 - 17.2. Possible Approaches to Environmental Questions 17.3
 - 17.3. Goal Definition 17.5
 - 17.4. Inventory Part 1: Process Flowchart 17.8
 - 17.5. Inventory Part 2: Collection of Data 17.11
 - 17.6. Inventory Part 3: System Boundaries 17.17
 - 17.7. Inventory Part 4: Processing Data 17.20
 - 17.8. Impact Assessment Part 1: Classification and Characterization 17.25
 - 17.9. Impact Assessment Part 2: Valuation 17.34
 - 17.10. How to Complete an LCA Study 17.37
 - Bibliography 17.40

Chapter 18. Future Perspective

18.1

-
- 18.1. Overview 18.1
 - 18.2. Drivers 18.1
 - 18.3. Regulations 18.2
 - 18.3.1. Executive Orders 18.3
 - 18.3.2. Congressional Action 18.4
 - 18.3.3. Tools 18.5
 - 18.4. Software Tools and Future Enhancements 18.6
 - 18.4.1. Data and Databases 18.8
 - 18.5. Environmental Risk Assessment and Analysis 18.10
 - 18.6. Organizational and TQM Changes 18.12
 - 18.6.1. Possible Scenarios 18.12
 - 18.6.2. Business as Usual 18.13
 - 18.6.3. Lead Organization 18.14
 - 18.6.4. Multipartnership Venture 18.15
 - References 18.15

Appendix. Life-Cycle Assessment Case Studies and Related Studies Table

A.1

- Index 1.1
