Preface	xviii
Acknowledgements	xx

PART I DESIGN ISSUES 1

1 Validating Evidence	1
<i>Roger Sapsford and Victor Jupp</i>	
Counting Cases: Measurement and Case Selection	2
Examples from Government Statistics	2
Three Kinds of Crime Survey	4
A Study of Mothers	10
Comparing Groups: the Logic of Design	13
Quasi-experimental Analysis: Road Traffic Fatalities	14
An Experiment: the Treatment of Depression	17
Establishing Boundaries in Qualitative Studies	21
Conclusion	22
Further Reading	23
2 Survey Sampling	25
<i>William Schofield</i>	
Sampling	25
Defining the Population to be Sampled	26
Sampling Units	27
The Sampling Frame	27
Selecting a Sample	28
Simple Random Sampling	30
Stratified Random Sampling	32
Cluster Sampling	34
Quota Sampling	36
Estimation of Population Parameters	38
Means, Variance and Standard Deviations	38
How Sample Means are Distributed	43

Error, Sample Size and Non-response	47
Sample Size	49
Non-response	49
Conclusion	52
Answers to Activities	52
Further Reading	54
PART II DATA COLLECTION	57
3 Observational Research	57
<i>Peter Foster</i>	
Using Observation	57
Advantages and Limitations	58
Structure in Observation	60
Relationships and Roles	64
Negotiating Access	64
Developing Relationships	70
The Researcher's Role	73
Managing Marginality	77
What to Observe	78
Focusing Research	78
Representative Sampling	79
Recording Observations	81
More-structured Observation	81
Less-structured Observation	83
Using Technology	86
Assessing the Validity of Observations	88
Threats to Validity	88
Ways of Assessing Validity	90
Conclusion	92
Further Reading	93
4 Asking Questions	94
<i>Michael Wilson</i>	
Comparison of Methods	94
Interview and Questionnaire Methods	94
Procedural/Structural Factors	95
Contextual Factors	96
Choosing between Methods	98
Highly Structured Methods	99
Interview Schedules	99
Open-ended Questions in Standardized Interview Schedules	101
Self-administered Questionnaires	102
Piloting	103

Asking More Complex Questions	107
Factual Questions	108
Retrospective Questions	109
Composite Measurement	109
Unstructured Methods	111
Less-structured Methods	112
Unstructured Methods of Interviewing	113
Interviewer Control in Unstructured Interviews	116
Conclusion	117
Further Reading	120
5 Statistical Sources and Databases	121
<i>Ray Thomas</i>	
Statistics as Facts about Society	122
Problems in Using Statistics	125
Unemployment	126
Homelessness	127
Poverty	128
Limited but Indispensable	129
The Impact of New Technology	129
Access to Online Databases	130
Secondary Analysis and Microdata	131
Local Availability of Administrative Data	132
Geographical Information Systems	133
Optical Storage	134
Conclusion	136
Further Reading	137
6 Using Documents	138
<i>Ruth Finnegan</i>	
Documentary Sources	139
Some Initial Distinctions	141
Primary Versus Secondary Sources	141
'Direct' and 'Indirect' Uses	142
How Documentary Sources Come into Being	143
Further Questions to Ask	146
Conclusion	149
Further Reading	150
PART III DATA ANALYSIS	153
7 Preparing Numerical Data	153
<i>Betty Swift</i>	
Establishing the Nature of the Problem	154
Prior Structure, Method of Recording and Sample Size	157
Prior Structure	157

Method of Recording	161
Sample Size	162
Getting the Data into Shape for Analysis	162
Getting the Pre-coding Right	165
Coding Open-ended Questions	166
Coding Data from Unstructured Interviews	169
Three Approaches to Coding	171
Correcting Errors	174
Data Manipulation During Analysis	176
Coping with Missing Values	176
Re-coding Variables	177
Conclusion	179
Answers to Activities	179
Further Reading	181
Appendix	181
8 Extracting and Presenting Statistics	184
<i>Roger Sapsford</i>	
The Right Figure for the Job	184
Frequencies	185
Two-way Distributions	195
Simplifying Tabular Data	201
Introducing a Third Variable	212
Postscript: the Element of Chance	218
Answers to Activities	219
Further Reading	222
Appendix	223
9 Statistical Techniques	225
<i>Judith Calder</i>	
Different Kinds of Data	226
Approaches to Analysis	228
Looking at Variables	228
Two Types of Statistics	230
Descriptive Measures	230
Measures of Central Tendency	230
Measures of Spread	231
Measures of Location	234
Inferential Statistics	235
Types of Error	235
Chi-square	238
z and t tests	244
Analysis of Variance	248
Measuring Association	252
Correlation Coefficients	252
Simple Linear Regression	254

Conclusion	260
Answer to Activity	260
Further Reading	261
10 Multivariate Analysis	262
<i>Judith Calder and Roger Sapsford</i>	
Analysis of Variance and Related Techniques	263
Tabular Techniques	263
More on Analysis of Variance	266
Regression Techniques	268
Further Multivariate Approaches	274
Log-linear Analysis	274
Discriminant Function Analysis	275
Factor Analysis	277
Further Reading	280
11 Analysis of Unstructured Data	282
<i>David Boulton and Martyn Hammersley</i>	
Complementary Perspectives of Reader and Researcher	283
Types of Qualitative Data	284
The Process of Analysis	285
Data Preparation	286
Starting the Analysis	288
Reflexivity and the Assessment of Validity	294
Conclusion	296
Further Reading	296
12 Documents and Critical Research	298
<i>Victor Jupp</i>	
Documents, Texts and Discourse	299
Types of Document	300
A Typology of Documents	303
Critical Social Research	303
Critical Analysis of Documents	305
Case Study 1: A Proposal for Critical Analysis	307
Case Study 2: Critical Analysis of a Public Document	310
Case Study 3: Critical Analysis of Decision-making	311
Case Study 4: Critical Analysis of a Research Report	313
Conclusion	315
Further Reading	316
 PART IV CONCLUSION	 317
13 Ethics, Politics and Research	317
<i>Roger Sapsford and Pamela Abbott</i>	

Ethics and Research	318
Politics and Research	322
Intelligence and the Politics of 'Race'	322
Social Class and the Politics of Gender	327
Intelligence, Achievement and the Politics of Class	331
Politics, Ideology and 'Research Style'	335
Conclusion	339
Further Reading	341
References	343
Index	353

Figures

1.1	Diagrammatic representation of simple action research	14
1.2	Connecticut traffic fatalities, 1951–1959	15
1.3	Control series design comparing Connecticut fatalities with those in four comparable states	16
1.4	Diagrammatic representation of comparative research using a treatment group and a control group	16
2.1	Distribution of heights in a sample of 1,052 mothers	39
2.2	Mothers' heights: histogram and superimposed normal curve	40
2.3	Mothers' heights expressed in deviation and z-score units	40
2.4	Distribution of mothers' heights in a single simulated random sample, mean = 62.49, SD = 2.45	44
2.5	Distribution of mean heights from a hundred simulated random samples, mean = 62.498, SD = 0.074	44
2.6	Distribution of mean heights from a hundred simulated random samples, scaled for more detailed display	45
3.1	Theoretical social roles for fieldwork	73
8.1	Distribution of wards of the Plymouth Health Authority District on the Material Deprivation Index	189
8.2	Bar graph of Material Deprivation Index scores	190
8.3	Line graph of Material Deprivation Index scores	191
8.4	Effects of varying scale on a line graph	192
8.5	Pie chart showing share of votes in a fictional constituency	194
8.6	Health Index by Material Deprivation Index	200
8.7	Health and Material Deprivation Indexes (%)	200
8.8	Deaths from lung cancer, cerebrovascular disease (CVD) and ischaemic heart disease (IHD) in St Peter's and South Hams	201
8.9	Population, 1861–1981, by gender	210
9.1	Distribution of retention interval frequencies in a study of memory	231
9.2	Low variability (a) and high variability (b)	233
9.3	Standard normal distribution: each shaded area represents $\alpha/2$	237
9.4	Lines of best fit	256
9.5	Linear regression line and the regression coefficient	258
9.6	Linear regression line showing the residual	258
9.7	Correlation as a measure of variance explained	259
10.1	A model of multiple regression	270

10.2	Proportions of variance explained	270
10.3	A model of path analysis	273
10.4	A model of discriminant function analysis	276
10.5	A model of factor analysis	278
10.6	Rotation in factor analysis	279

Tables

2.1	Proportionate and disproportionate stratified random sampling from 6,000 school leavers	33, 53
2.2	Interlocking quota sampling design for a survey project	37
2.3	Proportion of households with at least one person over 14 years of age at home, by day and time of day	51
8.1	Ranked Material Deprivation Index scores for the wards of the Plymouth Health Authority District	188
8.2	Material Deprivation Index scores in the Plymouth Health Authority District: raw data	193
8.3	Material Deprivation Index scores in the Plymouth Health Authority District: percentages	194
8.4	Location of Plymouth wards by Material Deprivation Index and Health Index	196–7
8.5	Location of wards by Material Deprivation Index and Health Index: raw numbers	198
8.6	Location of wards by Material Deprivation Index and Health Index: row percentages	198
8.7	Location of wards by Material Deprivation Index and Health Index: column percentages	199
8.8	Deprivation indicators: Greater London Council Area and Plymouth Health Authority District	202
8.9	Population present on Census night, England and Wales, 1861–1981 (thousands): age by marital status by gender	203–8
8.10	Population size by gender and marital status, 1861–1981	209
8.11	Population growth by gender and marital status, 1861–1981	209
8.12	Population composition by gender and marital status, 1861–1981	211
8.13	Ratio of males to females, 1861–1981	211
8.14	Ratio of single to married people, 1861–1981	211
8.15	Private household families and dependent children, 1981	213–15
8.16	The effects of light therapy in dentistry (fictional data)	216
8.17	The pay-off of education by gender	217
8.18	Distribution of Health Index in the Plymouth study	219
8.19	Health and Material Deprivation Indices in the Plymouth study	219
8.20	Type of household and number of children, 1981	220
8.21	Size of household and number of families, 1981	220

8.22	Number of children by type of household (married-couple families), 1981	221
8.23	Number of children by type of household (married-couple families): percentaged by number of children	221
8.24	Number of children by type of household (married-couple families), including households with no children	221
8.25	Health, material deprivation and type of area Data-set: health and material deprivation in the Plymouth Health Area	222
9.1	Types of data and levels of measurement	223
9.2	Subject totals and means by retention interval for age, grade and contact in a study of memory	226
9.3	Types of error	229
9.4	Degrees of freedom for a 2×2 table	236
9.5	Degrees of freedom: a second example	242
9.6	Mean percentage correct response, by age, in a study of memory	242
10.1	Wages and educational qualifications: in total and by gender	250
10.2	Wages and educational level by gender and job status	264
10.3	Wages and educational level by gender: full-time workers	265
10.4	Wages and educational level by gender (full-time workers) and marital status	265

Boxes

3.1	Flanders' interaction analysis categories	62
5.1	Selected major surveys in the UK	124
5.2	Selected CD-ROM databases relevant to social research	135
6.1	Summary of types of source for the contemporary and recent UK	140
7.1	Methods of data collection	158
7.2	A matrix of holiday information	163
7.3	A research data matrix	164
7.4	An example of a coding frame	165
7.5	A coding frame with examples of typical answers	168
8.1	A glossary of statistical terms	186–7
9.1	Mean, median and mode	232
9.2	Standard deviation	233
9.3	Z-scores	234
9.4	Chi-square test	239
9.5	Calculating degrees of freedom	241
9.6	Calculating χ^2 : an example	243–4
9.7	Alternative measures based on χ^2	245
9.8	Hypothesis testing using z or t	246
9.9	One-way analysis of variance	249
9.10	Pearson's correlation coefficient	253
9.11	Using t to test the significance of Pearson's r	256
9.12	Regression lines	257
10.1	Main and interaction terms in analysis of variance for more than two independent variables	269
10.2	Using F to test the significance of R^2	272
11.1	Two records of an interaction	287
11.2	Reflexive analysis	289
11.3	Labelling phenomena	293
12.1	A classification of documents	303
12.2	A discourse-analytic research agenda	306
12.3	A research proposal	308–9
13.1	Discourse and ideology	332
