List of boxes	x
Acknowledgements	xiv
1 Thinking about research	1
Introduction	1
What is research?	2
Why research?	10
What is original?	13
Truth, power and values	14
How to use this book	17
Summary	19
Further reading	19
2 Getting started	21
Introduction	21
Choosing a topic	22
What to do if you can't think of a topic	30
Focusing	34
Finding and choosing your supervisor	42
Individual and group research	44
Keeping your research diary	48
Summary	49
Further reading	52

3 Thinking about methods	53
Introduction	53
Everyday research skills	54
Families, approaches and techniques	58
Action research	63
Case studies	66
Experiments	68
Surveys	70
Which methods suit?	71
Deciding about methods	77
Sampling and selection	79
Summary	80
Further reading	82
4 Reading for research	92
Introduction	92
Why read?	93
Coping with the research literature	94
Basic reading strategies	95
Using libraries	99
Good enough reading	102
Reading about method as well as subject	106
Recording your reading	108
The literature review	109
Issues in reading	111
Summary	116
Further reading	116
5 Managing your project	117
Introduction	117
Managing time	118
Mapping your project	120
Piloting	121
Dealing with key figures and institutions	124
Sharing responsibility	128
Using wordprocessors and computers	132
Managing not to get demoralized when things do not go as planned	135
Summary	137
Further reading	138
6 Collecting data	141
Introduction	141
Access and ethical issues	142
Applying techniques to data collection	148
Documents	150

Interviews	152
Observations	156
Questionnaires	160
Recording your progress	161
The ups and downs of data collection	166
Summary	169
Further reading	169
7 Analysing data	173
Introduction	173
The shape of your data	174
The nature of data	176
Managing your data	183
The process of analysis	185
Analysing documents	186
Analysing interviews	187
Analysing observations	191
Analysing questionnaires	193
Interpretation	197
Summary	200
Further reading	201
8 Writing up	207
Introduction	207
Drafting and redrafting	208
How to argue	213
How to criticize	216
Who am I writing for?	220
Grammar, punctuation and spelling	226
Using tables, diagrams and other illustrations	226
Panics	227
Summary	230
Further reading	231
9 Finishing off	232
Introduction	232
Planning to finish?	233
The penultimate and final drafts	234
Added extras	237
The process of assessment	240
What do I do now?	246
Summary	249
Further reading	249
References	255
Index	261

LIST OF EXERCISES

1	Your own understanding of research	4
2	Reasons for undertaking research	11
3	Originality in research	13
4	The context for your research	15
5	Space and time	25
6	Costing your research	27
7	Resources for research	28
8	Seeking support	28
9	Your research questions	36
10	Concepts, issues and contexts	37
11	Metaphors for the research process	40
12	Producing a research outline	41
13	What do you want from your supervisor?	44
14	Advantages and disadvantages of group research	46
15	Looking at your life	54
16	Is action research qualitative research?	65
17	Types of case studies	68
18	Designing social experiments	70
19	Using the survey approach	73
20	Everyday and research skills	75
21	Your research methods	78
22	Your research methodology	78
23	Which sampling strategy and why?	81
24	Starting reading	95

25	Using your library	100
26	Five-minute reading	102
27	What methods do researchers use?	108
28	How many references?	114
29	Thinking about time	118
30	Scheduling your research	123
31	Piloting your research	123
32	Drawing up a research contract	127
33	Managing group research	131
34	Your view of technology	132
35	Computer skills and resources check	133
36	Making mistakes	137
37	Issues to consider before seeking access	143
38	Continually negotiating access	144
39	Dealing with ethical problems	147
40	Going to the field	150
41	Why use secondary data?	152
42	Asking sensitive questions	156
43	Wording questions	162
44	Place, space and time for analysis	176
45	Thinking about your data	177
46	The meanings of numbers	180
47	The meanings of words	181
48	Some fearful words	185
49	Doing documentary analysis	189
50	The general applicability of your research project	200
51	Context and themes	215
52	Organizing your argument	218
53	Voice and style	223
54	What's wrong with these references?	225
55	Avoidable and unavoidable delays	234
56	Writing an abstract	240

LIST OF BOXES

1	Research in the headlines	3
2	Twenty views of research	4
3	Twenty things you didn't know about research	5
4	Examples of research	6
5	Representations of the research process	8
6	The research spiral	10
7	Reasons for researching	12
8	Fifteen definitions of originality	14
9	Twelve issues to bear in mind when choosing a research topic	22
10	The costs of research	27
11	Ten ways to think of a research topic	31
12	A spider diagram of research interests and relations	34
13	Six research-focusing techniques	35
14	Refining research questions	36
15	Concepts, issues and contexts	37
16	All focus and no context	39
17	Doughnuts and jam roly-polies	40
18	Students' and supervisors' expectations	45
19	Individual or group research?	46
20	Key issues for group researchers	47
21	The four sections of the research diary according to Schatzman and Strauss	49
22	Examples of research diaries	50
23	Everyday life skills for research	55

24	Research families, approaches and techniques	59
25	Six characteristics of qualitative research	61
26	Two examples of action research projects	64
27	Criteria distinguishing action research	65
28	Two examples of case study research	67
29	Two examples of experimental research	69
30	Two examples of survey research	71
31	Advantages and types of surveys	72
32	Eight issues to consider in choosing your research methods	73
33	Sampling strategies	79
34	Sampling strategies illustrated	80
35	Examples of research sampling strategies	82
36	Twenty reasons for reading for research	93
37	Reading at different stages and for different purposes	94
38	Sources, types and levels of research literature	97
39	Eight stages for finding what you need to read	99
40	Sources of information in the library	101
41	Getting to the gist: some hints and tips	103
42	SQ3R and SQ4R: strategies for reading	104
43	Critical processes in reading	105
44	What is a critical reading?	106
45	Nine reasons for reading about method	107
46	Some examples of methods journals	107
47	What to put on your index cards	110
48	Literature review functions and typologies	111
49	Doing a literature review	112
50	Journal referencing practices	115
51	Use and abuse of references	115
52	Attitudes to time	118
53	Speaking of time	119
54	Using time for research	120
55	Scheduling research using a grid	121
56	Scheduling research using a table	122
57	Handling your supervisor or manager	125
58	Examples of research contracts	126
59	Advantages and disadvantages of research contracts	127
60	What you need to know from your institution	129
61	Consensus meetings	130
62	Managing informal relationships	131
63	Useful facilities available on wordprocessors	134
64	Databases and communications networks	135
65	Major packages and programs	136
66	Twenty things that can go wrong	136
67	Responses to adversity	137
68	Researchers coping with problems and changes	138
69	How to increase your chances of gaining access	143

xii List of boxes

70	Strategies to consider if access is refused	144
71	Common ethical issues	148
72	Ethical principles and biases	149
73	Examples of the use of documents in research	152
74	Reasons for using secondary data	153
75	Alternative interview techniques	154
76	Examples of using interviews in research	155
77	Different ways of asking sensitive questions	157
78	Examples of the use of observation in research	158
79	Issues in observation	159
80	Examples of the use of questionnaires in research	160
81	Types of survey questions	161
82	Hints on wording questions	162
83	Hints on questionnaire layout and presentation	163
84	Keeping research records	165
85	Ordered or chaotic data?	175
86	From chaos to order, and back again	175
87	Examples of quantitative data	178
88	Examples of qualitative data	179
89	Techniques for managing data	184
90	Issues in documentary analysis	187
91	Examples of documentary analysis	188
92	Examples of interview analysis	190
93	Examples of observation analysis	192
94	Mixing observation with other techniques	193
95	Examples of questionnaire analysis	194
96	Levels of quantitative analysis	195
97	Descriptive statistics	195
98	Examples of inferential statistics	195
99	Types of quantitative data	196
100	Significance, generalizability, reliability and validity	200
101	Twenty forms of procrastination	209
102	Twenty suggestions for overcoming procrastination	210
103	How to contract your writing	212
104	How to expand your writing	213
105	Possible forms for an academic thesis	217
106	Possible forms for a work report	218
107	Writing styles	222
108	Views on non-discriminatory writing	224
109	Some tips on grammar and punctuation	227
110	When to use illustrations	228
111	Twenty good reasons for not handing your report or thesis in on time	233
112	Checking your penultimate draft	234
113	Dedications we have known	239
114	Common academic assessment practices	243

115	Common work assessment practices	243
116	What to do before presenting your research	245
117	Responding to criticism	245
118	Twenty things to do now that you've finished your research	247
119	Research in the public domain	248
