

Table of Contents

A	User Benefits of ARIS	1
A.I	Benefits for Business Administration and Organizational Processes	2
A.II	User Benefits for Developing Information Systems	5
B	Basic Business Process Model in ARIS	10
B.I	The Initial Business Process Model	10
B.I.1	Responsible Entities and their Relationships	10
B.I.2	Function Flow	11
B.I.3	Output Flow	13
B.I.4	Information Flow	15
B.I.5	Consolidated Business Process Model	16
B.II	The ARIS Business Process Model	18
B.II.1	The Expanded Example Process	18
B.II.2	The Generalized Business Process Model	26
C	Developing the Architecture of Integrated Information Systems (ARIS House)	32
C.I	ARIS Views	33
C.II	ARIS Phase Model	38
C.III	Preliminary ARIS Information Model	43
C.IV	Preliminary ARIS Procedural Model	48
D	Business Process Management Using ARIS (ARIS House of Business Engineering)	54
D.I	Engineering Business Processes	58
D.I.1	Modeling Product and Business Processes	59
D.I.2	Reference Models	61
D.I.3	Knowledge Management	63
D.I.4	Process Evaluation	66
D.I.5	Process Benchmarking	70
D.I.6	Simulation	71
D.I.7	Quality Assurance	73
D.I.8	Process Warehouse	74
D.II	Planning and Controlling Business Processes	76
D.II.1	Process Monitoring	77

D.II.2	Scheduling and Capacity Control	77
D.II.3	Executive Information Systems (EIS)	80
D.II.4	Continuous Process Improvement – Adaptive Business Process Engineering	83
D.III	Workflow Control	87
D.IV	Application Systems	92
D.IV.1	Traditional Standard Software Solutions	93
D.IV.2	Componentware	99
D.IV.2.1	Objects	99
D.IV.2.2	Business Objects	101
D.IV.2.3	Java Applets	102
D.IV.2.4	Standardization Efforts	105
D.V	Frameworks	109
D.V.1	The Framework Concept	109
D.V.2	Realization Concepts	111
D.V.2.1	ARIS-Framework	111
D.V.2.2	SAP-Framework	113
D.V.2.3	SNI-ComUnity	114
D.V.2.4	IBM's San Francisco Project	115
D.V.3	Effects on the Software Industry	116
E	Modeling Standards in ARIS	119
E.I	Generally Accepted Modeling Principles	119
E.II	Modeling Levels	120
E.III	Degrees of Granularity and Detailing	126
E.IV	Model Variants	129
F	Comparing ARIS with Other Concepts	132
F.I	Object Oriented Modeling	133
F.II	CIMOSA	137
F.III	IFIP - Information System Methodology (ISM)	140
F.IV	Zachman Framework	142
F.V	Research Results of the University of St. Gallen, Switzerland	144
F.VI	Other Architectures	145
G	Deploying ARIS - Practical Procedures	147
G.I	ARIS Model Based Business Process Reengineering	147
G.I.1	Process Oriented Enterprise Engineering	147
G.I.2	Procedural Model for Business Process Optimization	149
G.I.3	Phases of Business Process Optimization	150

G.I.3.1	Preparatory Measures	150
G.I.3.2	Strategic Planning	150
G.I.3.3	As-is Study	150
G.I.3.4	Target Concept	151
G.I.3.5	Design Specification	152
G.I.3.6	Implementation	152
G.I.3.7	Regular Monitoring and Continuous Process Improvement	152
G.I.4	Summary	153
G.II	ARIS Model Based ISO 9000 Certification	154
G.II.1	ARIS Based Process Oriented Quality Management	154
G.II.2	Procedural Model for ISO Certification	155
G.II.2.1	Procedural Model: An Overview	155
G.II.2.2	Procedural Model: Benefits	155
G.II.3	Phases of the Procedural Model	157
G.II.3.1	Strategic Planning	157
G.II.3.2	Prep Phase for Quality Management	157
G.II.3.3	As-is Study of the Quality Management System	158
G.II.3.4	“ARIS Based ISO 9000”: Target Concept	158
G.II.3.5	Structuring the QM System	159
G.II.3.6	Applying and Reviewing QM Systems	160
G.II.3.7	Certification	161
G.II.3.8	Outlook and Framework: Total Quality Management	161
G.III	Using ARIS Models for Knowledge Management	162
G.III.1	Using Knowledge to Your Competitive Advantage	162
G.III.2	Knowledge Process Reengineering Procedures	163
G.III.3	The Phases of Knowledge Process Reengineering	164
G.III.3.1	Strategic Knowledge Planning	164
G.III.3.2	As-is Study of Knowledge Processing	164
G.III.3.3	Analyzing the As-is Status	166
G.III.3.4	Target Concept of Knowledge Processing	166
G.III.3.5	Enterprise and Staff Implementation Concept	167
G.III.3.6	IT Implementation Concept	167
G.III.3.7	Realizing Implementation Concepts	168
