<i>Preface</i>	xix
<i>List of contributors</i>	xxi
<i>Foreword</i>	xxiii
1 Introduction	1
<i>Francisco Torres and Francesco Giavazzi</i>	
1 Fiscal policy, geography and politics	2
2 Inflation convergence in fixed exchange rate regimes	4
3 Financial market integration and capital taxation	6
4 The Maastricht Treaty	8
2 Economic and monetary union: critical notes on the Maastricht Treaty revisions	9
<i>Niels Thygesen</i>	
1 Introduction	9
2 Stage II as agreed at Maastricht: commencement and content	11
3 Stage II: how does it end?	15
4 An interpretation of the monetary content of Stage II	20
5 Conclusions	25
Discussion	
<i>Lorenzo Bini Smaghi</i>	28
<i>Vitor Gaspar</i>	37
<i>José Viñals</i>	41
3 The design of optimal fiscal rules for Europe after 1992	46
<i>Giancarlo Corsetti and Nouriel Roubini</i>	
1 Introduction	46

2	Fiscal arithmetic at Maastricht	50
3	Tests of public sector solvency for the EC countries: the empirical evidence	53
4	Political determinants of budget deficits: a survey of the theory	63
5	Political determinants of fiscal deficits: the empirical evidence	67
6	A comparison of alternative fiscal rules	71
7	Concluding remarks: an evaluation of the EC fiscal guidelines	74
	Appendix: Alternative fiscal rules in a political equilibrium	76
	Discussion	
	<i>Axel A. Weber</i>	83
4	Contracts, credibility and common knowledge: their influence on inflation convergence	93
	<i>Marcus Miller and Alan Sutherland</i>	
1	Introduction	93
2	Wage contracts and inflation persistence	95
3	Calvo contracts and lack of credibility	104
4	Lack of common knowledge	107
5	Conclusion	111
	Appendix 4A: The stable path with Taylor contracts	112
	Appendix 4B: Fischer contracts	113
	Appendix 4C: Bayesian learning about the realignment probability	113
	Discussion	
	<i>David Backus</i>	116
	<i>Michael Dooley</i>	123
5	Inflation in fixed exchange regimes: the recent Portuguese experience	128
	<i>Sérgio Rebelo</i>	
1	Introduction	128
2	An economy with capital controls	130
3	Introducing free movement of capital	141
4	Explaining the nominal facts	142
5	Summary and conclusions	144
	Discussion	
	<i>Michael Moore</i>	149
	<i>Guido Tabellini</i>	153

6	Models of economic integration and localized growth	159
	<i>Giuseppe Bertola</i>	
1	Introduction and overview	159
2	Investment and macroeconomic growth	161
3	Economic integration and endogenous growth	165
4	Geographic linkages	167
5	Labour mobility	170
6	Europe, and directions for further research	176
	Discussion	
	<i>João César das Neves</i>	179
	<i>Charles Wyplosz</i>	189
7	Shocking aspects of European monetary integration	193
	<i>Tamim Bayoumi and Barry Eichengreen</i>	
1	Introduction	193
2	Optimum currency areas: theory and evidence	195
3	Methodology	200
4	Data	202
5	Results	207
6	Summary and implications	221
	Discussion	
	<i>Giorgio Basevi</i>	230
	<i>Patrick Minford</i>	235
8	Lessons of Massachusetts for EMU	241
	<i>Paul Krugman</i>	
1	Introduction	241
2	Integration, regional specialization and regional stability	243
3	Evidence on integrated markets and monetary unions	249
4	Integration, monetary union and stabilization policy	255
5	Development and regional inequality	258
6	Summary and conclusions	259
	Discussion	
	<i>Alessandra Casella</i>	261
	<i>Paul de Grauwe</i>	266
9	Financial and currency integration in the European monetary system: the statistical record	270
	<i>Jeffrey Frankel, Steven Phillips and Menzie Chinn</i>	
1	Introduction	270
2	How rapidly have country barriers diminished?	272
3	Has the exchange risk premium diminished?	273

4	The EMS target zone	279
5	Have expected future exchange rates fallen inside the bands since 1988?	283
6	Reassessing the performance of target zone models	286
7	Estimation of the realignment term	292
8	Conclusions	294
	Appendix 9A: Interest rate differentials	300
	Appendix 9B: EMS developments, 1986–91	302
	Discussion	
	<i>Rudiger Dornbusch</i>	306
	<i>Paolo Onofri</i>	312
10	Currency substitution: from the policy questions to the theory and back	318
	<i>Matthew Canzoneri, Behzad Diba and Alberto Giovannini</i>	
1	Introduction: from the policy questions to the theory	318
2	The case of a single currency	319
3	A two-currency economy	324
4	Relationship with previous results	329
5	Back to the policy questions	330
	Discussion	
	<i>Lucas Papademos</i>	333
	<i>António S. Mello</i>	338
11	Coordination of capital income taxes in the economic and monetary union: what needs to be done?	340
	<i>Peter B. Sørensen</i>	
1	The issues	340
2	The taxation of income from capital in the European Community	341
3	Tax competition versus tax harmonization	360
4	Some proposals for coordination of capital income taxes in the EC	365
5	The size and distribution of efficiency gains from tax harmonization	372
6	Conclusions	377
	Discussion	
	<i>Alberto Giovannini</i>	382
	<i>Index</i>	385

Figures

	<i>page</i>
D.3.1 Sustainability of German real public debt: recursive coefficient estimates and stability test results (1968, Q.1 – 1990, Q.4)	85
D.3.2 Sustainability of French real public debt: recursive coefficient estimates and stability test results (1968, Q.1 – 1990, Q.4)	86
D.3.3 Sustainability of Belgian real public debt: recursive coefficient estimates and stability test results (1968, Q.1 – 1990, Q.4)	88
D.3.4 EC fiscal guidelines and degree of fiscal convergence achieved in 1989 and 1990	89
4.1 Taylor contracts before and after entry	96
4.2 Fischer contracts before and after entry	101
4.3 Entry rates to avoid recession (N) or to end inflation (D)	102
4.4 Lack of credibility and learning	105
4.5 $\phi = 0.5$	109
4.6 $\phi = 0.1$	110
D.4.1 Rates of inflation: Germany, Netherlands, and France, 1960–90	117
D.4.2 Inflation rates, three US cities, 1976–90	117
D.4.3 Rates of inflation: USA and Canada, 1960–90	118
D.4.4 Rates of inflation: Germany, Italy, and Portugal, 1960–90	118
D.4.5 Real exchange rates: Netherlands and France in relation to Germany, 1960–90	119
D.4.6 Real exchange rates: Italy and Portugal in relation to Germany, 1960–90	120
D.4.7 Real exchange rates: Canada in relation to USA, 1960–90	120
D.4.8 Prices and nominal exchange rates	124
5.1 Exchange rates, interest rates and inflation in Portugal, 1980–92	129

5.2	Alternative shock paths	140
D.5.1	Labour share of income, manufacturing sector, Portugal relative to other OECD countries	155
D.5.2	Labour share of income, manufacturing sector, Italy relative to other OECD countries	156
D.5.3	Labour share of income, manufacturing sector, Spain relative to other OECD countries	156
D.5.4	Labour share of income, manufacturing sector, United Kingdom relative to other OECD countries	157
D.5.5	Labour share of income, manufacturing sector, average of Denmark, France, Germany, Belgium and the Netherlands relative to other OECD countries	157
6.1a	Private equilibrium	172
6.1b	Private equilibrium	173
6.2a	Planner's equilibrium	174
6.2n	Planner's equilibrium	175
D.6.1	Relative growth rate differentials, 1960–91, selected EC countries	183
D.6.2	Relative growth rate differentials, 1960–85, EC–USA, Canada–USA, Mexico–USA, Haiti–USA	184
D.6.3	Correlation between annual growth rates, selected EC countries	186
D.6.4	Correlation between annual growth rates, EC–USA, Canada–USA, Mexico–USA, Haiti–USA	187
7.1	The aggregate demand and supply model	199
7.2	Impulse-response functions for the European Community and the USA	208
7.3	Aggregate demand and supply shocks for the European Community and the USA	210
7.4	Correlation of demand and supply shocks with anchor areas	213
7.5	The size and correlation of the demand and supply disturbances	218
7.6	Impulse-response functions – supply shocks	220
7.7	Impulse-response functions to a demand shock	222
8.1	Geographical concentration	245
8.2	Annual rates of employment growth, Ohio and Belgium	252
8.3	Adjusted rates of employment growth, Ohio and Belgium	253
9.1	EMS currencies, March 1979 – December 1991	280
9.2	One-year expectations based on interest rate differentials, March 1979 – January 1987	282
9.3	EMS spot exchange rates, February 1988 – December 1991	284

9.4	Twelve-month expectations, using interest rate differentials, February 1988 – December 1991	285
9.5	One-month forecasts, February 1988 – December 1991	287
9.6	Three-month forecasts, February 1988 – December 1991	288
9.7	Twelve-month forecasts, February 1988 – December 1991	289
9.8	Five-year forecasts	290
9.9	q estimates: expected rate of realignment against the Deutschmark – 12-month horizon, annualized (Based on CFD survey)	295
9.10	q estimates: expected rate of realignment against the Deutschmark – 12-month horizon, annualized (Based on uncovered interest parity)	296
D.9.1	Three-month interest differential (Finland and Belgium relative to Germany)	310
D.9.2	Italy and France: value added per head in the service sector, 1980–89	315
D.9.3	Italy and France: relative price of service and industrial goods, 1980–91 (Q.1)	316
D.9.4	Italy and France: relative value added of service sector and industrial sector, 1980–91 (Q.1)	316
10.1	Organization and timing of markets and transactions	321

Tables

	<i>page</i>	
2.1	An overall indicator of convergence	19
D.2.1	Use of monetary policy instruments	32
D.2.2	Selected features of inter-bank payment systems	35
3.1	Net debt to GDP ratio	54
3.2	Inflation-adjusted, seigniorage-adjusted deficit (overall and current)	58
3.3	Testing for solvency of the public sector in EC countries: test results for the series of discounted general government net interest-bearing liabilities	61
3.4	Panel data regression of deficit with political variables	69
D.3.1	Convergence judged by selected economic indicators, 1990	91
5.1	Rates of growth of selected economic variables and GDP ratios, Portugal 1980–91	131
5.2	Parameters used in baseline scenario	135
5.3	Alternative shock paths	138
5.4	Economy with capital controls: differences between inflation rates of tradables and non-tradables	139
5.5	Economy with free capital mobility: differences between inflation rates of tradables and non-tradables	142
D.6.1	Evolution of real gross domestic product ratio	181
D.6.2	Real gross domestic product ratio	182
D.6.3	Correlation coefficients of real GDP growth rates	185
7.1	Standard deviations and correlation coefficients with anchor areas	204
7.2	Percentage of variance explained by the first principal component across different groups of countries: raw data	205
7.3	Percentage of variance explained by the first principal component across different groups of US regions	206

7.4	Correlation coefficients between anchor areas and other regions: underlying shocks	211
7.5	Percentage of variance explained by the first principal component for geographic groupings	214
7.6	Standard deviations of aggregate supply and aggregate demand shocks	216
8.1	Indices of industrial specialization	250
8.2	Industrial specialization, 1985	251
8.3	Distribution of automobile production	251
8.4	Annual rates of employment growth, EC and USA, 1960-88	255
D.8.1	Divergences in regional and national growth rates of output	268
9.1	Average absolute interest rate differentials	271
9.2	Time trends in absolute covered interest rate differentials from September 1982	274
9.3	Time trends in absolute risk premium, February 1988 - December 1991	277
9.4	Mean 12-month expectations (from interest rates) as deviations from Deutschmark central rates	286
9.5	Correlation coefficients: spot position in band and expected change over 12-month horizon	291
9.6	Expected mean reversion within the band, estimates of β_1	293
9.7	Test of $\beta_2 = \beta_3 = 0$: marginal significance	294
9.8	Magnitude of expected rates of mean reversion	297
A.1	Trends in absolute interest rate differentials from September 1982	300
D.9.1	Euro-interest differentials relative to Germany, January 1987	310
11.1	Personal tax rates (all levels of government) on capital income in the European Community, 1991	346
11.2	Corporate tax rates and methods of double taxation relief in the European Community, 1991	348
11.3	Depreciation allowances and general investment reliefs in the European Community, 1991	350
11.4	The cost of capital in domestic and transnational direct investment in the European Community, 1991	357
11.5	Estimated effects on output levels of corporate tax harmonization in the European Community	374
