INTRODUCTION

LOW PAY AND EARNINGS MOBILITY

1. Methodological and Econometric Issues in the Measurement of Low Pay and Earnings Mobility
P.J. Sloane and I. Theodossiou 3

PART ONE

LOW-PAID EMPLOYMENT: THE LONG-RUN HORIZON

2. Earnings Mobility in the Italian Economy
B. Contini, M. Filippi and C. Villosio 15
3. Long-Term Earnings Mobility of Low-Paid Workers in Finland
T. Eriksson 32
4. Low-Wage Mobility in a Working-Life Perspective
A. McKnight 47

PART TWO

LOW-PAID EMPLOYMENT: THE SHORT-RUN HORIZON

- | | | |
|----|--|-----|
| 5. | Wage Mobility for Low-Wage Earners in Denmark and Finland
<i>R. Asplund, P. Bingley and N. Westergård-Nielsen</i> | 79 |
| 6. | An Econometric Analysis of Low Pay and Earnings Mobility
in Britain
<i>P.J. Sloane and I. Theodossiou</i> | 103 |
| 7. | The Earnings Mobility of Low-Paid Workers in Britain
<i>M.B. Stewart and J.K. Swaffield</i> | 116 |

PART THREE

LOW-PAID EMPLOYMENT: SOME FURTHER PERSPECTIVES

- | | | |
|-----|--|-----|
| 8. | Low Pay, A Matter of Occupation
<i>M. Arai, R. Asplund and E. Barth</i> | 139 |
| 9. | The Effects of Unemployment on Future Earnings: Low-Paid Men
in Britain 1984–94
<i>M. Gregory and R. Jukes</i> | 165 |
| 10. | Working Poor? An Analysis of Low-Wage Employment in Italy
<i>C. Lucifora</i> | 185 |
| 11. | Wage Growth of Low- and High-Skilled Workers in the
Netherlands
<i>R. van Opstal, R. Waaijers and G. Wiggers</i> | 209 |

PART FOUR

LOW-PAID EMPLOYMENT IN THE OECD COUNTRIES:
AN INTERNATIONAL COMPARISON

- | | | |
|-----|---|-----|
| 12. | The Incidence and Dynamics of Low-Paid Employment in OECD
Countries
<i>M. Keese, A. Puymoyen and P. Swaim</i> | 223 |
|-----|---|-----|

List of Figures

Figure 2.1	Annual wage distribution in the sample in 1986 and 1990 – earnings in 1986 currency	17
Figure 4.1	Gross weekly earnings distributions of male employees, LFS, FWLS and NES 1994/95	50
Figure 4.2	Gross weekly earnings distributions of female employees, LFS, FWLS and NES 1994/95	51
Figure 4.3	Age/employment profiles of males by age cohort	53
Figure 4.4	Age/employment profiles of females by age cohort	53
Figure 4.5	Work histories of males and females in low-wage employment at the time of the survey and those in better-paid employment, for five age cohorts	55
Figure 4.6	Ranked average gross weekly earnings of male full-time employees by SOC minor groups	58
Figure 4.7	Ranked average gross weekly earnings of female full-time employees by SOC minor groups	58
Figure 4.8	Percentage of males in full-time employment whose earnings are below 68 per cent of the male gross mean wage	59
Figure 4.9	Percentage of females in full-time employment whose earnings are below 68 per cent of the male gross mean wage	59
Figure 4.10	Evolution of the percentage of employment in low-wage occupations	64
Figure 4.A1	Occupational earnings differentials of male full-time employees, after controlling for age and region of residence	75
Figure 4.A2	Occupational earnings differentials of female full-time employees, after controlling for age and region of residence	75
Figure 5.1	Wage mobility distribution	87
Figure 5.2	Wage mobility distribution over time among those who are for the first time observed in the lowest quintile	89
Figure 5.3	Trends and persistence in long-run wage mobility among those who are for the first time observed in the lowest quintile	91

Figure 5.A1	Goodness of fit	97
Figure 8.1	Uncontrolled occupational wage premia: deviation from mean hourly wage	148
Figure 8.2	Occupational wage premia controlled for differences in human capital and industry affiliation: deviation from mean hourly wage	149
Figure 8.3	Incidence of low-wage employment by occupational category: underrepresentation (–) and overrepresentation (+) in D1	151
Figure 8.4	Age-wage profiles of six low-pay occupations relative to the overall median: age effect	153
Figure 8.5	Age-wage profiles relative to the median wage for cross-sections and quasi-panel estimations – Finland 1989 and 1993	154
Figure 8.6	Age-wage profiles relative to the median wage for cross-sections and quasi-panel estimations – Norway 1987 and 1991	155
Figure 8.7	Age-wage profiles relative to the median wage for cross-sections and quasi-panel estimations – Sweden 1981 and 1991	156
Figure 9.1	Average earnings by unemployment in the previous 12 months	168
Figure 9.2	Numbers of men in the survey 1984–94	172
Figure 9.3	Unemployment in previous 12 months	173
Figure 9.4	Duration of unemployment among low- and high-paid men	174
Figure 9.5	Survivor rates in employment	176
Figure 10.1	Proportion of low-wage workers in OECD countries	189
Figure 10.2	Incidence of low pay	194
Figure 10.3	Incidence of low pay by gender	195
Figure 10.4	Low pay by educational levels	195
Figure 10.5	Transition matrix (1975–88)	201
Figure 10.6	Ascending and descending jumps by deciles	203
Figure 11.1	Wage patterns for fictitious workers (at 1994 levels) as a result of accumulating general experience	213
Figure 12.1	Median and low earnings of full-time workers 1994: annual gross earnings, expressed in US\$ using PPPs for private consumption	225
Figure 12.2	Incidence of low pay and earnings inequality, mid-1990s	228
Figure 12.3	Trends in the incidence of low pay, 1975–96	229
Figure 12.4	Trends in the risk of low pay for women relative to men, 1975–96	231
Figure 12.5	Statutory minimum wages and low pay, mid-1990s	235

Figure 12.6	Incidence of low pay and employment–population ratios, mid-1990s	239
Figure 12.7	Incidence of low pay and unemployment rates, mid-1990s	240
Figure 12.8	Changes in wage dispersion and labour market outcomes over 10 years to mid-1990s	243
Figure 12.9	Upward mobility of low-paid workers and overall earnings inequality	251
Figure 12.10	Alternative incidence measures for low-paid employment, 1986–91	252
Figure 12.11	Two views of the persistence of low pay 1986–91: continuously employed full-time workers	254
Figure 12.12	Distribution of low-paid employment by age and sex, 1986–91: weekly/monthly earnings of continuously employed full-time workers	256

List of Tables

Table 2.1	Annual wage distribution in the sample in 1986 and 1990	17
Table 2.2	Descriptive statistics of low- and high-paid workers in 1986	18
Table 2.3	Transition matrix between low and high pay, 1986–90	20
Table 2.4	Correlation coefficients between W_t and $W_{(t+5)}$	20
Table 2.5	Logit estimation	23
Table 2.6	Logit estimation for manual workers	25
Table 2.7	Logit estimation for non-manual employees	26
Table 2.8	Mean predicted probabilities of persisting in low pay and moving from high to low pay – individual and firm characteristics	28
Table 2.9	Mean predicted probabilities of persisting in low pay: stayers and movers	29
Table 3.1	Mobility out of the bottom quintile, both sexes	37
Table 3.2	Mobility out of the bottom quintile, males	38
Table 3.3	Mobility out of the bottom quintile, females	39
Table 3.4	Mobility out of the bottom quintile by age groups	40
Table 3.A1	The bottom quintile, some characteristics	46
Table 3.A2	Mobility of the third quintile, 1975 and 1985	46
Table 3.A3	Characteristics of stayers from the 1975 bottom quintile	46
Table 4.1	The SOC minor groups defined as low occupational wage groups	60
Table 4.2	Earnings distributions showing the comparison between individuals identified as being in LOW employment with those not in LOW employment	61
Table 4.3	Origin and destination states of completed spells for males	66
Table 4.4	Origin and destination states of completed spells for females	66
Table 4.5	Estimates of the logit model of the probability of a spell of low-wage employment terminating, by age cohort, for males	70

Table 4.6	Estimates of the logit model of the probability of a spell of low-wage employment terminating, by age cohort, for females	72
Table 4.A1	Classes of occupational groups	76
Table 5.1	Mobility out of the lowest quintile	86
Table 5.2	Number of periods before and after being observed in the lowest quintile	88
Table 5.3	Summary of estimation results for the lowest quintile	94
Table 5.A1	Danish panel wage mobility 1981–91: model estimates	98
Table 5.A2	Finnish panel wage mobility 1980–94: model estimates	99
Table 6.1	Sample means – low pay defined as 66 % of the median 1993	106
Table 6.2	Transitions from low-paid work 1991–3, all workers	107
Table 6.3	Results of multinomial logistic and nested probit regressions	111
Table 7.1	Alternative low-pay cut-offs	118
Table 7.2	NES-based low-pay cut-offs for use with BHPS, October averages for each year	121
Table 7.3	Patterns of low pay over the three waves	121
Table 7.4	Patterns of low pay over the four waves 1991–4	122
Table 7.5	Probabilities of low pay conditional upon previous low-pay experience	124
Table 7.6	Patterns of low pay and employee-employment over three waves	125
Table 7.7	Mobility between labour market states t to $t-1$	126
Table 7.8	Transition probabilities	129
Table 7.9	Bivariate probit models with endogenous selection for the probability of being low paid in year t given low paid in $t-1$	131
Table 7.10	Bivariate probit models with endogenous selection for the probability of being low paid or not an employee in year t given low paid in year $t-1$	132
Table 8.1	Wage dispersion in selected OECD countries	140
Table 8.2	Occupational position relative to the median occupational category	142
Table 8.3	Average schooling years and shares of young and female employees by occupation	144
Table 8.4	Industry and occupational wage dispersion	146
Table 8.5	Estimation results for the wage structure of four low-wage occupations	157
Table 8.A1	Calculated occupational wage premia and employment shares	162

Table 8.A2	Ranking of occupations according to calculated wage premia	163
Table 8.A3	Distribution of employees in the lowest decile (D1)	164
Table 9.1	Probit estimates of the probability of presence in the sample	177
Table 9.2	The impact of unemployment on earnings	181
Table 10.1	Incidence and concentration of low pay by selected characteristics and gender	196
Table 10.2	ML estimates of the probability of low pay (1987): marginal effects	198
Table 10.3	Conditional probability of being low paid: INPS and SHIW data, 1987	200
Table 10.4	Indicators of mobility	202
Table 11.1	Average annual wage growth, deflated by contractual wage increases, by skill level, workers 23–64 years, market sector	212
Table 11.2	Estimated annual earnings growth with accumulating general experience	212
Table 11.3	Estimated annual earnings growth with accumulating firm-specific experience	214
Table 11.A1	Wage growth of low-skilled workers aged 16–22, market sector 1994	217
Table 11.A2	Estimation results for first step; dependent variable: first difference of hourly wage, workers 23 years and older, market sector	218
Table 11.A3	Estimation results for second step; dependent variable: estimated hourly wage at the start of the present job, workers 23 years and older, market sector	219
Table 12.1	Overview of low-pay data sources	227
Table 12.2	Incidence and distribution of low-paid employment by sex, age and education	230
Table 12.3	Institutional settings, low pay and labour market outcomes	234
Table 12.4	Changes in institutional settings, wage dispersion and labour market outcomes	236
Table 12.5	Low pay, employment–population ratios and government employment	242
Table 12.6	Overview of longitudinal data sets used in earnings mobility analysis	246
Table 12.7	Five-year earnings mobility of low-paid workers	249
Table 12.8	Average cumulative years in low-paid employment during 1986–91 among low-paid workers in 1986: continuously employed full-time workers	255
