Contents

Preface xvii

PART ONE
THE SCOPE AND METHOD OF ECONOMICS

1. The Scope of Economics 3
   Economics Defined: Ends and Means 4
   The Neutrality of Economics 12
   Economics and Public Policy 13

2. The Method of Economics 17
   Science and Generalisation 17
     Pure and Applied Science 18
     Economic Theory, Abstraction and Generalisation 21
     Theory versus Tautology 22
     Experiment, Ceteris Paribus and Statistics 24
     Economic Data 28
     The Master Economist 32

Appendix to Chapter 2 33
Functions, Graphs and Slope 33
   Functions 33
   Dependent and Independent Variables 34
   Functions of Many Independent Variables 34
   Equations 34
   Variables and Parameters 34
   Standard Form of Linear Equations in Two Variables 34
   The Rectangular Co-ordinate System 35
   The Slope of a Line 36
   Linear Equations: More Than Two Variables 37
   Non-linear Equations: The Slope of a Curve 37
   Convexity and Concavity 38
   Inequalities: Notation 38
PART TWO
SUPPLY AND DEMAND

3. Introductory
   The Allocation Problem 41
   Economic Goods, Productive Activities and the Market 44

4. Supply and Demand in Perfectly Competitive Markets 46
   Market Demand 48
   Market Supply 51
   Price Determination by Supply and Demand 54
   "Change in Demand" and "Change in Quantity Demanded" 57

5. Elasticities of Supply and Demand 58
   Price Elasticity of Demand 58
   Price Elasticity of Demand and Changes in Total Revenue 62
   Determinants of Price Elasticity of Demand 62
   Income Elasticity of Demand 63
   Cross Elasticity of Demand 65
   Elasticity of Supply 65
   Momentary, Short-run and Long-run Equilibrium 67

6. General Applications of Supply and Demand Analysis 69
   Taxes on Transactions 69
   The Relevance of Elasticities 72
   Per Unit Taxes and Government Tax Revenue 75
   Price Elasticities of Tradable Goods and Tax Revenue in Small Open Economies 77
   Direct Price Controls 79
   Minimum Prices 81
   Price Control, Allocation and Equity 82

7. Supply and Demand Applied to Agriculture
   by Alan Matthews 84
   The Farm Problem 85
   Government Intervention to Restrict Supply 88
   Supply Control in an Open Economy 92
   Government Intervention to Raise Demand 93
   Open Economy Interventions 95
   Price Instability 98
   Statics and Dynamics 99
   An Example of Dynamics: The Cobweb Model 99
   Price Stabilisation Schemes 102
8. Agricultural Policy in the European Union

by Alan Matthews

The Common Agricultural Policy 107
Price and Markets Policy 108
The MacSharry CAP Reforms 111
World Market Effects of CAP Support 113
The GATT Uruguay Round 118

PART THREE
MACROECONOMIC ANALYSIS

9. The National Accounts 123

Identity of National Income, Product and Expenditure 123
National Product and National Income 124
National Product and National Expenditure 125
Final Goods and Intermediate Goods: Double-counting 125
Value Added and Transfer Payments 126
Further Concepts in National Income Accounting 127
Investment 127
Foreign Trade and National Expenditure 128
Government Services 130
Depreciation, GNP and NNP at Market Prices 130
NNP at Factor Cost ("National Income") 130
National Product versus Domestic Product 131
Other Income Aggregates 132
The Irish National Accounts 133
Nominal GNP and Real GNP 136
The Consumer Price Index and the GNP Deflator 136
Further Important National Accounting Identities 137
A. A Simple Closed Economy without Government 137
B. Introduction of a Government Sector 138
C. An Open Economy with Government 140
Reconciliation with the Irish National Accounts: A Digression 142

The Consumption and Savings Functions 146
The Consumption Function 147
The Savings Function 149
The Simplest Model 151
Equilibrium Conditions versus Identities 156
Generalisation and Qualification 156
11. Extensions of the Simple Model

The Model including Government and Taxes 166
   The Equilibrium Conditions 168
   A Graphical Treatment 169
   The Balanced Budget Multiplier 171
   Changes in Autonomous Demand and Policy-Induced Expenditure Shifts 173
   Endogenous Tax Receipts 174
   The Balanced Budget Multiplier Theorem Once Again 177

The Model with Foreign Trade 178
The Model with Savings, Tax and Import Leakages Combined 181
Excess Capacity and Public Policy 183
   Demand Deficiency and Public Policy 184
The Goods Market Models: Observations on Methodology 186

12. The Money Market 189

Functions of Money and Determination of the Rate of Interest 189
   Functions of Money 190
   Liquidity 191
   The Demand for Money 192
   The Equilibrium Rate of Interest 196
   Interest Rates 197

The Supply of Money: Details 198
   Central Banking 198
   Commercial Banking and Deposit Money 199
   Two Qualifications 202
   Further Qualification: Open Economy, Fixed Exchange Rates 203

The Instruments of Monetary Policy 205

13. Inflation: An Incomplete Analysis 209

The Demand for Money and Inflation 210
Correlation between Inflation and Monetary Expansion 213
Inflation in Closed Economies 216
   Demand-Pull 216
Contents

Cost-Push .......................... 219
Breaking Inflationary Expectations .... 220
Mixed Cost-Push and Demand-Pull ..... 221
Inflation in Small Open Economies with Fixed Exchange Rates 221

Demand-Pull and Cost-Push Pressures under
Fixed Exchange Rates .................. 225
Inflation, Money Wages, Productivity and Unemployment 228

Aggregate Demand and Aggregate Supply 229
Irish Inflation and Fixed Exchange Rates 229

Money Supply and Inflation in Small Open Economies
under Fixed Exchange Rates .......... 231
Inflation and Floating Exchange Rates 231

14. Interaction of Aggregate Supply and Aggregate Demand:
The Main Issues ........................ 232
Aggregate Supply ........................ 233

Aggregate Supply and Aggregate Demand ........ 235
A More Formal Treatment ................. 237

Money Wages, Productivity and Unemployment .... 242

Money Wages, Inflation and Unemployment ........ 243
Further Supply-side Issues: Terms of Trade and Taxes 244

Different Kinds of Unemployment .................. 246

Demand-Deficient or Cost-Constrained Unemployment 246
Structural Unemployment .................. 249
Frictional Unemployment .................. 250

The Extent of Unemployment in Ireland .......... 251
Aggregate Supply and Aggregate Demand: Digression on
an Alternative Approach ................. 252

15. The Balance of International Payments and Exchange Rates .......... 255
The Balance of International Payments .......... 255
Determination of Exchange Rates .............. 258

Deflationary Fiscal Policies ................. 264
Restrictive Monetary Policies ................. 264
Restrictive Commercial Policies .............. 264
Supply-side Policies ...................... 264

Automatic Effects of Balance of Payments Deficits .......... 265
Fixed versus Freely Floating Exchange Rates .......... 265
Buffer Stocks and Managed Floating .......... 266
Exchange Rate Arrangements: A Spectrum .......... 267
16. Policy Issues in Small Open Economies
   Policies under Fixed Exchange Rates
     Fiscal Policy 270
     Monetary Policy 273
   Policies under Freely Floating Exchange Rates
     Fiscal Policy 275
     Monetary Policy 276
   Money Supply and Inflation in Small Open Economies 277
   Devaluation as a Stabilisation Policy Instrument in a Small Open Economy 280

PART FOUR
HIGHER LEVEL MACROECONOMIC THEORY

17. Demand-side in a Closed Economy: IS and LM
   Goods Market Equilibrium: The IS Curve 285
   Money Market Equilibrium: The LM Curve 286
   Interaction of IS and LM: Simultaneous Solution 290
   Adding Government to the Model 293
   Monetarists versus Keynesians: A Sterile Debate 295

18. Demand-side in an Open Economy: IS, LM and BP
   The Balance of Payments Equilibrium Locus, BP 300
   Full Demand-side Equilibrium 301
     Leaning against the Wind: Meddling with the Money Supply 303
     Effectiveness of Monetary and Fiscal Policies Once Again 305
     Monetary Policy 308
     Fiscal Policy 309

19. Derivation of the Aggregate Demand Function, AD = AD(P)
   The Aggregate Demand Function in a Closed Economy 311
   A Small Open Economy, Fixed Exchange Rates 315

20. Aggregate Supply Once Again (and Aggregate Demand)
   Downward Money Wage Rigidity in a Closed Economy 321
   Real Wage Rigidity in a Closed Economy 328
   Productivity Growth (Technical Change), Real Wages and Aggregate Supply 329
   Unemployed Capital and Aggregate Supply: Largely a Digression 331
PART FIVE
MONEY AND BANKING,
AND MACROECONOMIC POLICY ISSUES IN IRELAND

21. Monetary Policy in Ireland: Analytical Considerations
    by Martin Kenneally
    Money: Definition, Prices and Quantity
       Definition
       Prices
       Nominal Interest Rate Parity
       The Quantity or Stock of Money in an Open Economy
    The Determination of Money Prices and Quantities in an SOE
       Fixed Exchange Rates
       The Monetary Approach to the Balance of Payments
       Floating Exchange Rates

22. Monetary Policy in Ireland: Operational Considerations
    by Martin Kenneally
    Historical Developments in Money and Banking
       The Banking System
       The Currency System
       A Note on Historical Sources
    Money Supply Determination
       A Commercial Bank's Balance Sheet
       The Commercial Bank's Aggregate Balance Sheet
       The Central Bank's Balance Sheet
       The Consolidated Banking System's Balance Sheet
       An Algebraic Model of Money Supply Determination
       and Control
       Monetary Control in a Closed Economy
       The Process of Monetary Expansion and Contraction
    A Brief Introduction to Official Irish Money Supply Statistics
       The Money Supply and Counterparts
       The Counterparts of the Money Supply
The Monetary Base and Bank Liquidity 405
Market Liquidity, the EBR and the Balance of Payments 407
Funding the EBR 408
The Balance of Payments 410
System Liquidity 411

23. Aspects of Demand-side and Supply-side Policies in Ireland 413
   Public Finance in Ireland 413
      The Public Sector 413
      The Budget 414
      The Public Capital Programme 417
      Public Sector Borrowing 417
   Mismanagement through Aggregate Demand 421
      Ideas and Institutions 421
      Policy Responses to Supply-side Shocks 423
   On National Wage Agreements, Aggregate Supply 428
      and Exchange Rates 428
      Preliminary Remarks 430
      On the Wage/Price Crisis, late 1992 434
   Non-traded Services are Important for Competitiveness 436

PART SIX
MICROECONOMIC ANALYSIS

24. The Theory of Demand 441
   Marginal Utility Theory 441
      The Paradox of Value 441
      Total Utility and Marginal Utility 442
      The Law of Diminishing Marginal Utility 442
      The Paradox of Value Resolved 443
      The Consumer’s Allocation Problem 443
      The Consumer’s Demand Curve 444
      Some Problems 445
   Indifference Curve Analysis 445
      Indifference Curves 446
      Properties of Indifference Curves 448
   The Consumer’s Allocation Problem Once Again 449
   Changes in Consumer Equilibrium 451
      The Income Effect 452
Contents

*The Substitution Effect* 454
*The Price Effect* 454

The Price Effect is a Combination of Income and Substitution Effects 456
*Inferior Goods* 457
*Giffen Goods* 458
*The Demand Curve Once More* 458

25. The Firm: Production and Costs 460

Profit Maximisation 460
*Cost and Profit* 460

The Production Function 461
*Isoquants* 462
*Properties of Isoquants* 464
*Marginal Physical Products and MRTS* 464
*Isocost Curves* 465
*Cost Minimisation* 466

The Expansion Path 467
*All Inputs Variable* 467
*Some Inputs Fixed, Some Variable* 469

The Short Run and the Long Run 469
*Returns to Scale* 470

Derivation of Long-Run Cost Curves 472

The Short-Run Cost Structure of the Firm 476
Relationships between the LRAC and SRAC Curves 479

26. Equilibrium of the Firm and Industry under Perfect Competition 482

Demand in Perfectly Competitive Markets 482
Short-Run Equilibrium of the Perfectly Competitive Firm 483
The Short-Run Supply Curve of the Perfectly Competitive Firm 485
*Normal Profits and Economic Profits* 486
Long-Run Equilibrium of the Firm, and Industry Equilibrium 487
*External Economies and Diseconomies* 488
*Industry Equilibrium in an Increasing-Cost Industry* 489
*Industry Equilibrium in a Decreasing-Cost Industry* 490
Perfect Competition, Efficiency and Income Distribution 492
*Resource Allocation* 492
*Income Distribution* 493
27. Departures from Perfect Competition

Pure Monopoly

Demand under Pure Monopoly
The Sources of Monopoly
Price and Output under Monopoly
Non-existence of Supply Curves under Monopoly

Some Issues in Assessing Monopoly

Resource Allocation
“Excess Capacity”, Price and Output
Income Distribution

Regulation of Monopoly: Some Extensions
Marginal Cost Pricing and Profits
State Ownership

Imperfect Competition

Equilibrium of the Firm and Industry under Imperfect Competition
Resource Allocation
Income Distribution: Erosion of Supernormal Profits
Competitive Advertising

Oligopoly
Market Structure and the Irish Economy

28. Economic Law and Competition Policy in Ireland

by Patrick McNutt

Price Control and the Prices Act, 1958
Monopolisation and the Restrictive Practices Act, 1972
Big Firms and the Mergers, Takeovers and
Monopolies (Control) Act, 1978
The Definition of Monopoly pre-1991
Précis on Competition Policy pre-1991
Précis on the 1987 Groceries Order
Regulation of Business and the Irish Competition Act, 1991
Price-Fixing Agreements
On Mergers
Summary

29. The Factor Market and Distribution Theory

Marginal Productivity
Pricing in Perfectly Competitive Factor Markets
Wage Determination in Perfectly Competitive Labour Markets
Non-competing Groups
30. Overview of the Market Mechanism

The Market Mechanism

Efficiency in Resource Allocation, and Market Failure

Partial Equilibrium Analysis and General Equilibrium Analysis

PART SEVEN

INTERNATIONAL ECONOMICS

31. The Gains from International Trade

Production, Consumption and Economic Welfare in a Closed Economy

Production, Consumption and Economic Welfare in an Open Economy

Two Open Economies

The Terms of Trade

Generalisation

Free Trade and Protection

32. Evolution of the International Monetary System

The Gold Standard

The Bretton Woods System

The Collapse of the Bretton Woods System

The Present International Monetary System

The Snake, and the Goal of Monetary Union in the EEC

The EMS, 1979
33. European Integration  
*by Rory O'Donnell*

1. Introduction 574
2. The Formation and Development of the European Union 575
3. The Economic Analysis of Market Integration 577
   - Three Models of Economic Integration 577
   - Identifying and Measuring the Effects of Integration 577
4. Ireland’s Adjustment to Membership of the European Union 582
   - Overall Economic Performance 582
   - Trade Creation and Diversion 583
   - The Cold-Shower Effect 584
   - Some Intra-Industry Adjustment 584
   - A Large Inter-Industry Adjustment 584
   - Reduction in Firm Size 585
   - Interpretation 586
5. The Internal Market Programme 587
   - The Crisis of the Community and the Costs of “Non-Europe” 587
   - The 1992 Project: Completing the Internal Market 587
   - Conceptualising the Internal Market 589
   - Direct Effects of Market Completion 591
   - Indirect Effects of Market Completion 591
   - Firm Size, the Internal Market and Europe’s Competitiveness 593
   - The Internal Market Programme in Perspective 594
   - Integration of Mixed Economies: The “Economic Order” 595
6. The Cohesion Issue and EU Structural Policies 596
   - Introduction 596
   - The Cohesion Policies of the European Union 597
   - EU Cohesion Policies in Economic Context 598
7. Regional Effects of Economic and Monetary Integration 599
   - Changing Perspectives on the Regional Effects of Integration 599
   - Regional Tendencies in an Economic Union:
     - Trade and Factor Mobility 601
   - Regional Aspects of Monetary Union 605
8. Economic and Monetary Union 608
   - EMU in the Treaty of Rome and the Single European Act 608
   - The European Monetary System (EMS) 609
   - EMU in the Treaty on European Union 612
   - EMU after the Crisis of 1992–93 615

Glossary 619
