CONTENTS

Preface v

Part I: The Basic Model

Chapter 1: Introduction 5
1.1 Equilibrium and Increasing Returns 5
1.2 The Pricing Rule Approach 7
1.3 The Setting 8
1.4 Final Comments 11

Chapter 2: Consumers 13
2.1 Consumption Sets 13
2.2 Preferences 15
2.3 The Utility Function 23
2.4 Wealth Restrictions 26
2.5 Consumer's Behaviour 30
2.6 Final Comments 35
2.7 Appendix: The Existence of a Continuous Utility Function 35

Chapter 3: Firms 39
3.1 Production Sets 39
3.2 Returns to Scale 42
3.3 Attainable Production Plans 44
3.4 The Behaviour of Firms 45
3.5 Final Comments 48

Chapter 4: Equilibrium 49
4.1 Introduction 49
4.2 The Model 50
4.3 The Existence of Equilibrium 54
4.4 Final Comments 61
4.5 Appendix: The Tietze-Urysohn Extension Theorem 61

Part II: Marginal Pricing and the Efficiency Problem

Chapter 5: Marginal Pricing 67
5.1 Introduction 67
5.2 Preliminaries 68
5.3 The Marginal Pricing Rule 76
5.4 Final Comments 78
5.5 Appendix: Marginal Pricing and Bounded Losses 79

Chapter 6: Two-Part Marginal Pricing 83
6.1 Introduction 83
6.2 Two-Part Marginal Pricing 84
6.3 The Brown-Heller-Starr Model 87
6.4 Final Comments 89

Chapter 7: Efficiency 93
7.1 The Second Welfare Theorem 93
7.2 The Efficiency Problem 98
7.3 The Core 103
7.4 Final Comments 104

Part III: Loss-Free Pricing Rules and Private Ownership Market Economies

Chapter 8: Basic Results 111
8.1 Generalities 111
8.2 Competitive Equilibrium 113
8.3 Average Cost Pricing 118
8.4 Final Comments 120

Chapter 9: Constrained Profit Maximization 121
9.1 Introduction 121
9.2 Input-Constrained Profit Maximization 122
9.3 Input-Distributive Sets 125
9.4 Output-Constrained Profit Maximization 130
9.5 Final Comments 133

Chapter 10: Classical Equilibrium 135
10.1 Introduction 135
10.2 The Model 137
10.3 Canonical Classical Equilibrium 143
10.4 Positive Profits 146
10.5 Final Remarks 148
