<i>Preface</i>		xi
Introduction		1
I Income inequality and poverty in Britain and Europe		
1 What is happening to the distribution of income in the UK?		15
2 Income distribution in European countries (with Lee Rainwater and Tim Smeeding)		41
3 Poverty, statistics and progress in Europe		64
4 Comparing poverty rates internationally: recent studies in OECD countries		78
5 Two nations in early retirement? The case of Britain (with Holly Sutherland)		95
II Analysis of the Welfare State		
6 Is the Welfare State necessarily a barrier to economic growth?	121	
7 A national minimum? A history of ambiguity in the determination of benefit scales in Britain		132
8 The development of state pensions in the United Kingdom		152
9 Income maintenance for the unemployed in Britain and the response to high unemployment		168
10 Institutional features of unemployment insurance and the working of the labour market		184
11 Social insurance		205

III Targeting and the future of social security policy

12	On targeting and family benefits	223
13	The Western experience with social safety nets	262
14	Towards a European social safety net?	277
15	Beveridge, the national minimum and its future in a European context	290
16	State pensions for today and tomorrow	305
	<i>Notes</i>	324
	<i>Bibliography</i>	337
	<i>Name index</i>	358
	<i>Subject index</i>	363

Figures

1.1	Income parade 1975 and 1985	page 21
1.2	<i>Economic Trends</i> estimates 1977–88	26
1.3	Per cent of income from work	29
1.4	Per cent of household heads at work	30
1.5	Pension as per cent of net earnings	33
1.6	Distribution in relation to SB level	35
1.7	Earnings distribution 1975–90	37
2.1	Bottom (a) and top (b) decile as per cent of median	50–51
2.2	Relative incomes at different percentiles	52
2.3	Rankings of countries (Hasse diagram)	55
2.4	Trends in inequality I	59
2.5	Trends in inequality II	62
3.1	Poverty in Europe: comparison of results with national and Community-wide poverty lines	72
4.1	Illustration of different units of analysis	87
5.1	Male labour force participation rate in Great Britain 1961–85	96
5.2	The life experience of the two cohorts	102
5.3	Labour market status by two-year age groups	104
5.4	Sources of income of the early retired	107
5.5	(a) Distribution of relative net resources 1975	
	(b) Distribution of relative net resources 1985	112
5.6	Comparison of the sick/retired for 1975 and 1985	113
5.7	Distribution among those in work 1975 and 1985	114
5.8	Comparison of whole cohort 1975 and 1985	114
5.9	Comparison of distributions of sick/retired and those in work scaled down by replacement rate of 0.57 for 1985	115
5.10	Cumulative proportions above specified levels: comparison of sick/retired and those in work scaled down by replacement rate of 2/3	116
6.1	Social security transfers as a percentage of GDP	124

7.1	Choice of benefit constrained by the maximum acceptable contribution rate	143
7.2	Choice of benefit constrained by the less eligibility criterion (required margin between benefit and income in work)	144
10.1	Structure of dual labour market model with efficiency wages and imperfect matching	195
10.2	Effect of introducing unemployment insurance	200
12.1	Measuring target efficiency: hypothetical example	227
12.2	Three special cases of transfer programmes	230
12.3	Effect of variation in poverty objective on relative efficiency of different types of transfer programmes	231
12.4	Relative efficiency of uniform benefit and minimum income guarantee in different situations ($\alpha = 2$)	234
12.5	Proportions in poverty with different equivalence scales	236
12.6	Income-related benefits in France and the UK (couple and three children aged under 11)	246
13.1	Composition of low-income families in former USSR 1989	268
13.2	Receipt of social assistance in Great Britain 1948–91	270
13.3	Maximum AFDC/Food stamp benefit as a percentage of official poverty line, USA 1992	272
16.1	The three pillar approach	308
16.2	The UK pension structure	309
16.3	Basic National Insurance pension as per cent of average income	310
16.4	Growth in pensioners' real incomes at different points in the distribution 1979–1990/1	315
16.5	Pensioners below 50 per cent of average income 1979–1990/1	316
16.6	The savings trap for pensioners	318
16.7	Cost and benefit of minimum guarantee	322
16.8	Gain from £80 a week minimum guarantee	322

Tables

1.1	Blue Book estimates of the distribution of personal after tax income in the UK 1949–84/5	page 17
1.2	Summary measures of income inequality in the UK 1975–88	25
1.3	Decomposition of inequality measures	27
1.4	Decomposition of individual distribution of family net resources in the UK 1975, 1985 and 1988	31
1.5	Earnings inequality by industry: all full-time employees paid on adult rates (earnings not affected by absence) Great Britain	38
2.1	International comparison by Sawyer 1976	44
2.2	Sources of data used	45
2.3	Income distribution in 1980s: percentiles of median and decile ratio	47
2.4	Decile ratios for European countries on two different bases	48
2.5	Income distribution in European countries 1980s: cumulative decile shares of total income (per cent)	53
2.6	Lorenz comparisons (based on decile points)	54
2.7	Summary measures of inequality	55
2.8	Trend over time in income distribution: percentiles of median	56
2.9	Trend over time in income distribution: cumulative decile shares of total income (per cent)	57
2.10	National studies of income distribution: Gini coefficients from 1970	60
3.1	Poverty in the European Community under different assumptions about objectives and growth	74
4.1	Poverty and low-income studies in selected OECD countries	80
4.2	Proportion of population with income below 50 per cent of the median: results for different equivalence scales (Luxembourg Income Study)	90
5.1	Numbers in different age groups	99

5.2	Labour market status of two FES cohorts	103
5.3	Early retired and semi-retired in two cohorts	106
5.4	Total income (£ per week) of different groups	106
5.5	Proportion of income received by early retired from different sources in 1985	108
5.6	Families with more than 50 per cent of income from one source	109
8.1	Projected contribution rates 1990/1 to 2050/1 on different assumptions about indexation (per cent of relevant earnings)	162
8.2	Take-up of Supplementary Pension 1985	165
8.3	Number of people in families over pension age with incomes below the Supplementary Benefit level 1972-85	166
12.1	Variation of child benefit with age of child and family size in European Community 1990	243
12.2	Administrative costs of family benefits	251
13.1	Examples of Western means-tested cash safety net programmes	266
