1 Introduction	1
2 Important terms, notation and classification of games	7
2.1 Terms	7
2.2 Notation	8
2.3 Taxonomy of game theory	9
2.4 Outline of the book	17
3 Static games with discrete strategy space	21
3.1 Introduction	21
3.2 Prisoners' dilemma	22
3.3 Chicken games	25
3.4 Assurance and no-conflict games	29
3.5 An extension to $N$ countries	31
3.6 Convexification of payoff space	34
3.7 Coordination through correlated strategies	37
4 Finite dynamic games with discrete strategy space: a first approach	42
4.1 Introduction	42
4.2 Some examples and first results	43
4.3 The conceptual framework	50
4.4 Some general results	57
5 Infinite dynamic games with discrete strategy space: a first approach	63
5.1 Introduction	63
5.2 Folk theorems	66
5.3 Discussion	72

6	Finite dynamic games with discrete strategy space: a second approach	75
6.1	Introduction	75
6.2	Some general remarks and results	79
6.3	Extension: strongly perfect equilibria	85
6.4	Discussion	87
7	Infinite dynamic games with discrete strategy space: a second approach	89
7.1	Weakly renegotiation-proof equilibria	89
7.2	Strongly renegotiation-proof and strongly perfect equilibria	99
8	Issue linkage	103
8.1	Introduction	103
8.2	The enlargement of payoff space	106
8.3	The impact on stage game Nash equilibria	111
8.4	Non-separable utility functions	113
9	Static games with continuous strategy space: global emission game	119
9.1	Introduction	119
9.2	Fundamental functions and assumptions	121
9.3	Best reply functions, Nash equilibrium and parameter variations	123
9.4	Existence and uniqueness of Nash equilibrium	131
9.5	Characterization of payoff space and normal form representation	136
9.6	Social optimum	137
9.7	Indifference curves, payoff structure and Pareto frontier	140
10	Finite dynamic games with continuous strategy space and static representations of dynamic games	149
10.1	Introduction	149
10.2	Sequential move emission game: filterable externalities	152
10.3	Sequential move emission game: transferable externalities	155
10.4	Non-Nash or hybrid behavior	157
10.5	Auctioning emission reductions	162
10.6	Strategic matching	167
10.7	The theory of reciprocity	172

11	Bargaining over a uniform emission reduction quota and a uniform emission tax	176
11.1	Introduction	176
11.2	Cost-efficiency of the set of instruments	178
11.3	The bargaining setting	179
11.4	The bargaining proposals	181
11.5	Equilibrium emissions	183
11.6	Equilibrium analysis	185
11.7	Strategic proposals	190
11.8	Summary	191
12	Infinite dynamic games with continuous strategy space	194
12.1	Introduction	194
12.2	Discount factors close to 1	194
12.3	Discount factors smaller than 1	210
13	Coalition models: a first approach	219
13.1	Introduction	219
13.2	Conjectural variation models	220
13.3	The core	245
14	Coalition models: a second approach	258
14.1	Introduction	258
14.2	Preliminaries	260
14.3	The grand coalition	261
14.4	The sub-coalition	269
14.5	Summary and discussion	279
15	Coalition models: a third approach	283
15.1	Introduction	283
15.2	Characterization of the per-member-partition function for positive externality games	286
15.3	Static games	288
15.4	Coalition formation models: simultaneous moves	292
15.5	Sequential move coalition models	300
16	Summary and conclusions	310
	Appendices	317
	I Chapter 3: appendix	317
	II Chapter 4: appendix	319
	III Chapter 5: appendix	324

IV	Chapter 7: appendices	326
V	Chapter 8: appendix	330
VI	Chapter 9: appendices	335
VII	Chapter 10: appendices	337
VIII	Chapter 11: appendices	341
IX	Chapter 12: appendix	351
X	Chapter 13: appendices	352
XI	Chapter 14: appendices	361
XII	Chapter 15: appendices	365

<i>Index</i>		405

# Figures

---

3.1	Payoff space of the chicken game in Matrix 3.3	35
3.2	Convex payoff space of the matrix game in Matrix 3.7	36
4.1	Two-stage sequential move chicken game	45
4.2	Simultaneous move chicken game	47
6.1	Payoff space of the extended PD games III and IV	78
6.2	Renegotiation-proof equilibrium payoffs in a finitely repeated chicken game	83
7.1	Payoff space of the extended PD game V	93
7.2	Payoff space of the PD game	95
8.1	Issue linkage of asymmetric PD games I and II	107
9.1	Possible curvatures of benefit functions	122
9.2	Nash equilibrium and parameter variations in the global emission game	124
9.3	Reaction functions of slope less than $-1$	127
9.4	Positively sloped reaction functions	128
9.5	Non-intersecting reaction functions	129
9.6	Parallel reaction functions	130
9.7	Non-linear reaction functions	131
9.8	Nash equilibrium and social optimum in the global emission game	140
9.9	Pareto frontier in the global emission game	145
10.1	Stackelberg equilibrium	153
10.2	Conjectural variation outcomes	158
10.3	Emission reduction offer curves in abatement space	163
10.4	Emission reduction offer curves in emission space	164
10.5	Sequential move matching game	169
12.1	Subgame-perfect, weakly and strongly renegotiation-proof payoff space	198
12.2	Weakly renegotiation-proof payoff space of type A and B games	199
12.3	Subgame-perfect, weakly and strongly renegotiation-proof emission space	200
12.4	Weakly renegotiation-proof emission space for reciprocal and restricted punishments	206

12.5	Weakly renegotiation-proof emission space for restricted repentance strategies	209
12.6	The discount factor requirement as a function of $\gamma$	212
12.7	Renegotiation-proof emission space for an infinite punishment duration	215
13.1	Equilibrium number of signatories in Barrett's model	230
IV.1	Weakly renegotiation-proof payoff space in the PD game	327
VII.1	Boundary negative conjectural variation equilibria	340
VIII.1	Adjustment under the tax regime	348
VIII.2	Welfare loss to the bottleneck country if adjustment occurs	350
