<i>Preface</i>	vii
<i>Acknowledgements</i>	viii
Section 1: Fundi	1
1.1 Diabetic maculopathy	3
1.2 Preproliferative retinopathy	7
1.3 Proliferative retinopathy	10
1.4 Hypertensive retinopathy	14
1.5 Retinal macroaneurysm	17
1.6 Branch retinal vein occlusion	19
1.7 Exudative retinal detachments secondary to hypertension	23
1.8 Retinal cholesterol embolus	25
1.9 Branch retinal artery occlusion	28
1.10 The ocular ischaemic syndrome	30
1.11 Central retinal vein occlusion	32
1.12 Bilateral central retinal vein occlusions in leukaemia	34
1.13 Sickle cell retinopathy	37
1.14 Roth spots in bacterial endocarditis	40
1.15 HIV microvasculopathy	42
1.16 Cytomegalovirus retinitis	44
1.17 Acute retinal necrosis	48
1.18 Toxoplasma retinochoroiditis	50
1.19 Retinal vasculitis	53
1.20 Behçet's retinal vasculitis	57
1.21 Ocular lymphoma	60
1.22 Tuberculous chorioretinitis	62
1.23 Syphilitic chorioretinitis	65
1.24 Vogt–Koyanagi–Harada syndrome	67
1.25 Choroidal metastases and tamoxifen retinopathy	69
1.26 Retinal angiomas in von Hippel–Lindau disease	72
1.27 Astrocytoma	75
1.28 Retinitis pigmentosa	77
1.29 Hydroxychloroquine retinopathy	79
Section 2: Optic Discs	81
2.1 Papilloedema: Idiopathic intracranial hypertension	83
2.2 Pseudopapilloedema secondary to	

	optic disc drusen	86
2.3	Demyelinating optic neuritis	89
2.4	Non-arteritic anterior ischaemic optic neuropathy	93
2.5	Giant cell arteritis	96
2.6	Glaucomatous disc cupping	99

Section 3: Ocular Motility and Lid Disorders 101

3.1	IIIrd nerve palsy	103
3.2	IVth nerve palsy	106
3.3	VIth nerve palsy	109
3.4	Lower motor neurone VIIth nerve palsy	112
3.5	Bilateral internuclear ophthalmoplegia	115
3.6	Myasthenia gravis	117
3.7	Chronic progressive external ophthalmoplegia	120
3.8	Thyroid eye disease	123
3.9	Progressive supranuclear palsy	125
3.10	Carotid-cavernous sinus fistula	127

Section 4: Visual Fields 131

4.1	Bilateral centrocecal scotomas	133
4.2	Junctional scotoma	135
4.3	Bitemporal hemianopia	136
4.4	Optic tract lesion	140
4.5	Incongruous hemianopia secondary to a parietal lobe lesion	141
4.6	Complete homonymous hemianopia with macular sparing	143

Section 5: Faces 145

5.1	Acromegaly	147
5.2	Graves' disease	149
5.3	Hypothyroidism	153
5.4	Cushing's syndrome	155
5.5	Systemic lupus erythematosus	158
5.6	Wegener's granulomatosis	161
5.7	Parkinson's disease	164
5.8	Myotonic dystrophy	167

Section 6: Hands	169
6.1 Rheumatoid hands	171
6.2 Psoriatic nail pitting	175
6.3 Sclerodactyly	177
6.4 Arachnodactyly	179
6.5 Clubbing	181
6.6 Acromegalic hands	183
6.7 Tendon xanthomata	185
6.8 Syringomyelia	187
6.9 Motor neurone disease	189
Section 7: Skin Lesions	191
7.1 Café au lait spots and neurofibromata	193
7.2 Ash leaf spots	195
7.3 Pemphigoid and ocular cicatricial pemphigoid	196
7.4 Erythema multiforme	199
7.5 Pseudoxanthoma elasticum	201
7.6 Ehlers–Danlos syndrome	203
7.7 Erythema nodosum and pretibial myxoedema	204
7.8 Necrobiosis lipoidica diabetorum and diabetic dermopathy	206
7.9 Herpes zoster ophthalmicus	210
7.10 Kaposi's sarcoma	212
Section 8: Biochemistry and Haematology	213
8.1 Urea and electrolytes: renal failure	215
8.2 Urea and electrolytes: Addison's disease	217
8.3 Liver function tests: cirrhosis	219
8.4 Thyroid function tests: thyrotoxicosis	221
8.5 Thyroid function tests: hypothyroidism	223
8.6 Fasting blood glucose and glucose tolerance tests	224
8.7 HbA _{1c}	225
8.8 Diabetes and hypertension	228
8.9 Full blood count: acute lymphocytic leukaemia	230
8.10 Full blood count: pernicious anaemia	232

8.11	Clotting screen: excessive anticoagulation with warfarin	234
8.12	Clotting screen: inadequately treated haemophilia	236
Section 9: Radiology		237
9.1	Angiogram of a posterior communicating artery aneurysm and intracavernous carotid aneurysm	239
9.2	CT scans of occipital lobe infarct and occipital lobe haemorrhage	241
9.3	Demyelination on a T ₂ -weighted MRI	244
9.4	Sellar and suprasellar lesions	246
9.5	Cerebellar infarcts MRI	249
9.6	Sphenoid ridge meningioma	252
9.7	MRI of a chiasmal glioma and CT scan of bilateral nerve sheath meningiomas	254
9.8	CT scan of bilateral acoustic neuromas	257
9.9	Orbital MRI and CT scans of thyroid eye disease	259
9.10	CT scan of orbital cellulitis	262
9.11	Multiple lytic skull lesions in myeloma	265
9.12	Bilateral hilar lymphadenopathy	267
9.13	Barium follow through: Crohn's disease	269
9.14	Osteoporosis: T10 crush fracture	271
Section 10: Electrodiagnostics		275
10.1	ECG: acute myocardial infarction	277
10.2	ECG: 2:1 heart block	279
10.3	Repetitive nerve stimulation: myasthenia gravis	281
10.4	Visually evoked potentials: optic neuritis	283
10.5	Nystagmus waveform: congenital idiopathic nystagmus	286
