

Table of Contents

Introduction	1
G. HASENFUSS, E. MARBÁN	
1 Alterations in excitation-contraction coupling and potential gene therapy targets in failing human hearts	5
B. PIESKE	
2 Cardiac overexpression of β -adrenergic receptors	26
M. J. LOHSE, S. ENGELHARDT	
3 Genetic approaches to elucidate the regulatory role of phospholamban in the heart	39
A. G. SCHMIDT, E. G. KRANIAS	
4 Manipulation of SERCA2a in the heart by gene transfer	53
F. DEL MONTE, S. E. HARDING, R. J. HAJJAR	
5 Changing the cardiac calcium transient: SERCA2 overexpression versus phospholamban inhibition	69
W. H. DILLMANN	
6 Adenovirus-mediated gene transfer of SERCA isoforms	76
G. INESI, M. CAVAGNA, J. M. O'DONNELL, C. SUMBILLA, L. ZHONG, H. MA, M. G. KLEIN	
7 Overexpression of FKBP12.6 to influence SR function	89
J. PRESTLE, P. M. L. JANSSEN, A. JANSSEN, G. HASENFUSS	
8 Adenovirus-mediated myocardial gene therapy	100
J. K. DONAHUE	

9	Adenovirus-mediated transfection of multicellular cardiac preparations	112
	P.M.L. JANSSEN, S.E. LEHNART, J.K. DONAHUE, J. PRESTLE, E. MARBÁN, G. HASENFUSS	
10	Myocardial-specific gene delivery	126
	W.-M. FRANZ, O.J. MÜLLER, H.A. KATUS, G. VON DEGENFELD, G. STEINBECK, P. BOEKSTEGERS	
11	Transfection studies using a new cardiac 3D gel system	144
	T. ESCHENHAGEN, C. FINK, T. RAU, U. REMMERS, J. WEIL, W.H. ZIMMERMANN, S. AIGNER, H.M. EPPENBERGER, T. WAKATSUKI, E.L. ELSON	
12	Cellular mechanisms of cardiac arrhythmias – do they play a role in heart failure?	157
	D.J. BEUCKELMANN, L. PRIEBE, U.C. HOPPE	
13	Potassium channel overexpression	180
	U.C. HOPPE, H.B. NUSS, B. O’ROURKE, E. MARBÁN, D.C. JOHNS	
14	Mechanisms and relevance of apoptosis	197
	J. HOLTZ, M. TOSTLEBE, D. DARMER	
15	Strategies to prevent apoptosis	232
	A. HAUNSTETTER, S. IZUMO	
16	Neurohumoral modulation of metalloproteinases in cardiac failure: <i>impact on remodeling</i>	247
	D.A. KASS, H. SENZAKI, N. PAOLOCCI	
17	Oxidative stress in heart failure	262
	D.B. SAWYER, W.S. COLUCCI	
18	Modulation of cardiac function by essential myosin light chains in health and disease	285
	I. MORANO	
19	Myocardial infarction, infarct repair, and strategies for muscle regeneration	298
	C.E. MURRY, M. ZHANG, H. REINECKE	

20	Cardiomyocytes can induce rhythmic contraction of skeletal muscle cells. Potential use for infarct repair	316
	H. REINECKE, G.H. MACDONALD, S.D. HAUSCHKA, C.E. MURRY	
21	Strategies to identify cardiomyocyte cell cycle regulatory genes	333
	K.B.S. PASUMARTHI, L.J. FIELD	
	Subject Index	353
