

Contents

List of contributors	vii
Preface	ix
<i>Tracey J. Mitchell and Timothy J. Williams</i> The role of eotaxin and related CC-chemokines in asthma and allergy	1
<i>Roger J. Davis</i> Signal transduction by the JNK group of MAP kinases	13
<i>Marie Chabot-Fletcher</i> Cellular signaling to NF- κ B: Role in inflammation and therapeutic promise.....	23
<i>Anthony M. Manning</i> Small molecule regulators of AP-1 and NF- κ B	39
<i>Robert T. Abraham</i> Mammalian target of rapamycin: Immunosuppressive drugs offer new insights into cell growth regulation	53
<i>Catherine Adams Burton, John Boylan, Candy Robinson, Janet Kerr and Pamela Benfield</i> Constitutive expression of a tumor suppressor leads to tumor regression in a xenograft model	67
<i>Steven D. Shapiro</i> Macrophage metalloproteinases in destructive inflammatory diseases	77
<i>Nancy H. Ruddle</i> Lymphotoxin in inflammation and lymphoid organ development: Variations on a theme	83

<i>Steven L. Kunkel, Sem H. Phan, Nicholas W. Lukacs, Cory Hogaboam and Stephen W. Chensue</i> Chemokine/cytokine biology during the evolution of fibrotic disease	89
<i>Long Gu, Susan C. Tseng and Barrett J. Rollins</i> The role of MCP-1 in disease	99
<i>Lisa A. Beck, Cristiana Stellato, Syed Shahabuddin, Renate Nickel and Robert P. Schleimer</i> The role of chemokines in allergic diseases of the airways	109
<i>James Winkler and Ken Trampusch (coordinators)</i> Ninth International Conference of the Inflammation Research Association, November 1–5, 1998: Summaries of workshops and poster discussions	
<i>William Williams and Elizabeth Arner (chair persons)</i> Targets in rheumatoid and osteoarthritis	121
<i>Lawrence Wennogle and Nancy Cusack (chair persons)</i> Signal transduction and regulation of gene expression	125
<i>James Burke and Floyd Chilton (chair persons)</i> Mediators of inflammation and their enzymes	129
<i>Denis Schrier and Fandrew Issekutz (chair persons)</i> Cell adhesion molecules and leukocyte trafficking	131
<i>Robert M. Strieter and David Underwood (chair persons)</i> Pulmonary inflammation, fibrosis, and disease	135
<i>W. Hunter and E. Turley (chair persons)</i> Angiogenesis, wound repair and skin inflammation	139
Index.....	141
