Introduction	1
R. TURVEY	
Part One: The ICLS	
1 Thirteenth International Conference of Labour Statisticians <i>Bulletin of Labour Statistics</i> 1983:3	5
2 Fourteenth International Conference of Labour Statisticians <i>Bulletin of Labour Statistics</i> 1988:2	10
Part Two: Labour Accounting	
3 A labour accounting system R. TURVEY AND E. HOFFMANN	17
4 Labour statistics in the centrally planned economy countries of the Council for Mutual Economic Assistance (CMEA) <i>Bulletin of Labour Statistics</i> 1980:1	22
5 Compilation of balance sheets of labour resources in the USSR: methodological principles V. GOURIEV <i>Bulletin of Labour Statistics</i> 1984:3	28
6 ILO-comparable annual employment and unemployment estimates: basic programme and application to countries with a centrally planned economy I. CHERNYSHEV <i>Bulletin of Labour Statistics</i> 1988:3	35
Part Three: Measuring the Labour Force	
7 Salient features of the new international standards on statistics of the economically active population M. V. S. RAO AND F. MEHRAN <i>Bulletin of Labour Statistics</i> 1984:4	59
8 International standards on the measurement of economic activity, employment, unemployment and underemployment R. HUSSMANN <i>Bulletin of Labour Statistics</i> 1989:1	80
9 The concept and boundary of economic activity for the measurement of the economically active population M. T. DUPRÉ, R. HUSSMANN AND F. MEHRAN <i>Bulletin of Labour Statistics</i> 1987:3	106

- 10 Female labour force participation in developing countries: A critique of current definitions and data collection methods 126
R. ANKER
International Labour Review Nov.-Dec. 1983
- 11 Observation and recall method for collecting data on women's activities: an experiment in India 141
J. N. TEWARI
Bulletin of Labour Statistics 1988:4
- 12 Accounting for time in labour force surveys 153
E. HOFFMANN
Bulletin of Labour Statistics 1981:1
- 13 Incomplete data in labour force and related surveys 165
R. PLATEK
Bulletin of Labour Statistics 1981:4
- 14 Labour force flow statistics – an examination of objectives, collection methods and measurement issues 189
F. MEHRAN
Bulletin of Labour Statistics 1984:1
- 15 Statistics concerning the urban informal sector 203
K. M. BASHIR
Bulletin of Labour Statistics 1980:1

Part Four: Standard classifications

- 16 The revised International Standard Classification of Occupations: A short presentation 227
E. HOFFMANN
- 17 Issues concerning a possible revision of the International Standard Classification of Status in Employment 244
E. HOFFMANN
Bulletin of Labour Statistics 1987:4
- 18 Notes on the French 'New Classification of Occupations and Socio-occupational Categories' 261
M. SCOTT
Bulletin of Labour Statistics 1985:3
- 19 Coding of occupation and industry – some experiences from Statistics Sweden 275
L. LYBERG
Bulletin of Labour Statistics 1982:3

Part Five: Labour cost, earnings and productivity

- 20 Labour cost: An international comparison of concepts 305
K. TASWELL
Bulletin of Labour Statistics 1983:4
- 21 Labour productivity 337
R. TURVEY
- 22 Establishment surveys of hours and earnings 355
R. TURVEY

- 23 What kinds of earnings indices are useful? 373
R. TURVEY
Bulletin of Labour Statistics 1981:3
- 24 Net earnings statistics 380
R. TURVEY
- 25 Statistics of paid vacations 392
R. TURVEY
Bulletin of Labour Statistics 1983:3
- Part Six: Other topics**
- 26 The measurement of inequality of basic needs attributes 401
F. MEHRAN
Bulletin of Labour Statistics 1980:3/4
- 27 Statistics on employees in the service sector, particularly
the public sector 411
J. STOKKAN
Bulletin of Labour Statistics 1982:4
- 28 National computer networking of employment statistics:
the British example 420
A. R. TOWNSEND, M. J. BLAKEMORE AND R. NELSON
Bulletin of Labour Statistics 1986:4
- 29 The redesign of a major establishment survey in the
United States 431
T. J. PLEWES
Bulletin of Labour Statistics 1982:4

List of figures

- 3.1 Conceptual labour accounting system framework
- 9.1 The scope of economic activity in terms of the SNA concept of production of economic goods and services
- 13.1 Flow chart pertaining to each sampled unit
- 19.1 Three-way independent verification
- 19.2 Two-way independent verification
- 20.1 Relationship between labour cost and compensation of employees
- 21.1 Measurement of productivity
- 24.1 Approaches to defining net earnings
- 26.1 Lorenz curve for attribute data
- 27.1 Linkages between registers for the production of employee statistics

List of tables

- 3.1 Number of persons by employment status, sex and whether they work full or part-time. Persons registered as unemployed, by employment status and sex.
- 3.2 Unemployed males, unemployed females and vacant posts, by occupation and whether full-time or part-time work is desired.
- 3.3 Transition matrixes between labour market states for males and females.
- 3.4 Posts filled by employees and by self-employed and vacancies, by industry and whether full-time or part-time.
- 3.5 Cumulative number of posts filled and posts vacated, by industry.
- 3.6 Total labour costs, labour compensation, hours paid for, actual hours worked by employees and total imputed work compensation and actual hours worked for self-employed persons, by industry.
- 3.7 Per industry, average labour costs and earnings per job and per actual hours worked for full-time jobs and average earnings per actual hours worked for part-time jobs.
- 3.8 Per occupation, average weekly earnings and average weekly hours paid for per full-time job for males and females.
- 5.1 Balance sheet of labour resources.
- 5.2 The able-bodied population of working age.
- 6.1 Employment, by industry.
- 6.2 Czechoslovakia: Adjustment of employment data.
- 6.3 Poland: Adjustment of employment data.
- 7.1 Scope of economic activity.
- 9.1 Examples of non-market production covered by the SNA concept of production of economic goods and services.
- 10.1 Percentage of married women aged 25–50 years engaged in each of 12 activities.
- 10.2 Comparison of reported female labour force activity rates based on a simple key-word question and a simple activity schedule.
- 11.1 Average time spent on economic activity (01–71), estimated by different methods (Round 1).
- 11.2 Average time spent on economic activity (01–71), estimated by different methods (15 hours) (Round 1).

- 11.3 Percentage of total time spent in a day on economic activities and household chores.
- 11.4 Percentage distribution of time spent in a day (24 hours) by major activity based on recall for previous day (Round 1).
- 11.5 Average hours spent per person on household work and leisure by females of 15–59 years (Round 2: June–August 1983).
- 11.6 NSS and NCAER data on domestic duties.
- 11.7 Percentage of females (5 and above) engaged in domestic duties only.
- 13.1 LFS non-response rates by component at the Canada level.
- 13.2 Non-response rates according to tenure of households in the LFS (1979–80).
- 13.3 Non-response rates by type of area (1980).
- 13.4 Distribution of interviewers according to non-response rates (1978).
- 13.5 Non-response rate by type of survey.
- 14.1 Rotation sampling schemes of labour force sample surveys in eight countries.
- 14.2 Some characteristics of the rotation sampling schemes of labour force sample surveys in eight countries.
- 14.3 True and observed labour force statuses of ten hypothetical persons at two consecutive survey dates.
- 14.4 True and observed flows for data from Table 14.3.
- 15.1 Urban informal sector surveys carried out in developing countries since 1973.
- 15.2 Characteristics of informal sector surveys.
- 15.3 Criteria for identifying informal sector enterprises generally followed in various surveys.
- 16.1 ISCO-88 major groups, number of sub-groups and skill level.
- 18.1 Classification of socio-occupational categories: links between different levels of aggregation.
- 19.1 Estimates of error rates in production coding of industry in the 1965 Swedish Census of Population.
- 19.2 Estimates of within-coder variability, \hat{P} , in the 1965 Swedish Census of Population.
- 19.3 Error distribution for industry coding in the 1966 Swedish Census of Population, regular coder.
- 19.4 Error distribution for industry coding in the 1965 Swedish Census of Population, verifier.
- 19.5 Estimated error rates in coding economic activity in the 1970 Swedish Census of Population.
- 19.6 Estimates of within-coder variability in the 1970 Swedish Census of Population.
- 19.7 Absolute between-coder variability distributed over coding combinations and variables in a 1970 Swedish Census study.
- 19.8 Estimated between-coder variability per variable in a 1970 Swedish Census study.
- 19.9 Error distribution for occupation coding in the 1970 Swedish Census of Population, after verification.

- 19.10 Error distribution for industry coding in the 1970 Swedish Census of Population, after verification.
- 19.11 Estimated error rates in coding economic activity in the 1975 Swedish Census of Population.
- 19.12 Error distribution for occupation coding in the 1975 Swedish Census of Population, after verification.
- 19.13 Error distribution for industry coding in the 1975 Swedish Census of Population, after verification.
- 19.14 A comparison between the majority code number and the production code number.
- 19.15 A comparison between the majority code number and the dependent verification code number.
- 19.16 Estimates of error reduction rates when using dependent verification.
- 19.17 Automated coding of Swedish industry.
- 19.18 Automated coding of Swedish occupation.
- 20.1 International Standard Classification of Labour Cost.
- 20.2 Composition of national concepts of labour cost.
- 26.1 Geographical distribution of households with certain facilities, Trinidad and Tobago, 1971–2.
- 26.2 Percentage level and geographical inequality of distribution of certain facilities, Trinidad and Tobago.
- 26.3 Percentage level and geographical inequality of distribution of certain durable goods, United Kingdom.
- 26.4 Percentage level of and ethnical inequality in schooling, Sri Lanka.
- 28.1 Leading areas of Great Britain for increased unemployment, year ending February 1986.
- 28.2 Shift-share analysis of employees in employment, counties of Tyne and Wear and Durham, 1971–81.
