Preface

1	Understanding quality	1
1.1	What is quality?	1
1.2	Meeting the requirements	5
1.3	The basic concepts	8
1.4	Market demand	10
1.5	Quality in all functional areas	12
2	Commitment and policy	14
2.1	The total quality management approach	14
2.2	Commitment to quality	15
2.3	Policy on quality	16
2.4	Achieving the 'mind-set'	21
3	Organization for quality	27
3.1	Personnel and the organizational structure	27
3.2	Define responsibilities	29
3.3	The quality function and the quality manager	42
3.4	Personnel selection	44
3.5	Councils, committees and teams	44
4	Measurement (costs) of quality	49
4.1	Cost-effective quality management	49
4.2	Data and sources	54
4.3	Assumptions, risks, and benefits	60
4.4	The quality cost system and management	63
4.5	Summarizing	67
5	Planning for quality 1 – flow charting, quality planning and JIT	69
5.1	Flow charting	69
5.2	Quality planning	81
5.3	Planning for just-in-time (JIT) management	87

6	Planning for quality 2 – purchasing, reliability and maintenance	94
6.1	Planning the purchasing activity	94
6.2	Quality and time – reliability	100
6.3	Maintenance of the plan	110
7	Design for quality	116
7.1	Design and the requirements	116
7.2	Specifications and standards	120
7.3	'Seven new tools' for quality design	122
7.4	Design control and management	137
8	System for quality 1 – design and contents	144
8.1	Why a documented system?	144
8.2	Quality system design	146
8.3	Quality system requirements	148
8.4	The quality system rings of confidence	158
9	System for quality 2 – documentation and implementation	160
9.1	The quality manual	160
9.2	Securing error/defect prevention in the system	165
9.3	Computers in quality information systems	170
9.4	Implementation of the system	174
10	Capability for quality	179
10.1	Statistical process control (SPC)	179
10.2	A systematic approach	181
10.3	Process variability and capability	190
10.4	Supplier capability	197
10.5	Taguchi methods	203
11	Control of quality	208
11.1	Inspection, checking, measurement and test	208
11.2	Process control of variables (or measuring things)	211
11.3	Process control of attributes (or counting things)	221
11.4	Acceptance sampling (or sorting out things)	223
11.5	SPC techniques in the non-manufacturing areas	226
11.6	Improvements in the process	233

12	Teamwork for quality	236
12.1	The need for teamwork in quality management	236
12.2	Communication	238
12.3	Quality improvement teams	247
12.4	Quality circles	252
12.5	Tips on communication skills for team leaders and chairmen	255
12.6	Implementing teamwork for quality	260
13	Training for quality	263
13.1	It's Tuesday – it must be training	263
13.2	A systematic approach to quality training	266
13.3	Starting where and for whom?	269
13.4	Training programmes and their design	272
13.5	Follow-up and quality counselling	278
14	Implementation of TQM	281
14.1	A guide to the American gurus	281
14.2	Planning the implementation of TQM	290
14.3	Continuous improvement and the TQM model	296
14.4	How long can TQM survive?	300
14.5	Caution – this concept can damage your wealth	304
<i>Appendix</i>	<i>TQM bibliography</i>	306
<i>Index</i>		308
