List of Figures

| | | |
|----|---|----|
| 1 | Unconditional mean of the output gap derived from the second order approximation, as a function of competition. | 47 |
| 2 | Welfare in a symmetric union under the optimal policy, $\omega = 0.001$ and $\sigma = 1.5$ | 48 |
| 3 | Welfare in a symmetric union under the optimal policy, $\omega = 0.001$ and $\sigma = 0.5$ | 49 |
| 4 | Welfare in a symmetric union under the optimal policy, $\sigma = 1.5$ and $\omega = 0.1$. | 50 |
| 5 | Variance of the inflation rate and the output gap in a symmetric union under the Taylor-rule: $\omega = 0.1$ and $\sigma = 1.5$ | 51 |
| 6 | Sum of the variance of the inflation rate, of the output gap and of the terms of trade in a symmetric union under the Taylor rule: $\omega = .5$ and $\sigma = 1.5$ | 52 |
| 7 | Welfare (a) and Welfare change (b) in a symmetric economy under the optimal rule, $\sigma = 1.5$ and $(1 - \alpha) = .8$ | 53 |
| 8 | Welfare under the optimal rule at varying degrees of competition and competition gap | 54 |
| 9 | Ratio of Welfare change under the Taylor rule and the optimal rule, versus competition and competition gap | 55 |
| 10 | Relative performance of the Taylor rule and the optimal rule under different weighting schemes and competition gaps. | 56 |
| 11 | Taylor-rule shocks and the relative weight on countries' inflation. | 57 |
