Table of Contents

FA Minimisation Heuristics for a Class of Finite Languages 1
Jérôme Amilhastre, Philippe Janssen, Marie-Catherine Vilarem

SEA: A Symbolic Environment for Automata Theory 13
Philippe Andary, Pascal Caron, Jean-Marc Champarnaud, Gérard Duchamp, Marianne Flouret, Éric Laugerotte

Analysis of Reactive Systems with n Timers 27
Anne Bergeron, Riccardo Catalano

Animation of the Generation and Computation of Finite Automata for Learning Software 39
Beatrix Braune, Stephan Diehl, Andreas Kerren, Reinhard Wilhelm

Metric Lexical Analysis 48
Cristian S. Calude, Kai Salomaa, Sheng Yu

State Complexity of Basic Operations on Finite Languages 60
C. Câmpeanu, K. Culik, K. Salomaa, S. Yu

Treatment of Unknown Words 71
Jan Daciuk

Computing Entropy Maps of Finite-Automaton-Encoded Binary Images .. 81
Mark G. Eramian

Thompson Digraphs: A Characterization 91
Dora Giammarresi, Jean-Luc Ponty, Derick Wood

Finite Automata Encoding Geometric Figures 101
Helmut Jürgensen, Ludwig Staiger

Compressed Storage of Sparse Finite-State Transducers 109
George Anton Kiraz

An Extendible Regular Expression Compiler for Finite-State Approaches in Natural Language Processing 122
Gertjan van Noord, Dale Gerdemann

Multiset Processing by Means of Systems of Finite State Transducers 140
Gheorghe Păun, Gabriel Thierrin

A Structural Method for Output Compaction of Sequential Automata Implemented as Circuits 158
M. Seuring, M. Gössel

An Algorithm to Verify Local Threshold Testability
of Deterministic Finite Automata 164
A.N. Trahtman

A Taxonomy of Algorithms for Constructing
Minimal Acyclic Deterministic Finite Automata 174
Bruce W. Watson

Author Index 183
