

## INDEX OF SUBJECTS

### A

abacus 412, 436  
absolutism 807, 810  
abstraction 51  
learning and teaching 145–152  
mathematical sign system 142 f.  
progress towards 103  
action, reflection mismatch 246 f.  
addition 112 ff.  
facts 117 f.  
mental, informal 121  
adult numeracy 755–784  
aesthetics, mathematical 51 f.  
affect, assessing 352 f.  
African cultural mathematics 914  
Agam project 167–201  
aggregation, academic vs. demographic 360 f.  
ALESCO 1246  
algebra 8, 474 f.  
arithmetic gap 587 ff.  
computer 318 ff.  
curriculum design 139–160  
distant learning environment 735 ff.  
goals 30  
linear *see* linear algebra  
practical knowledge and 152–155  
role of letters in 589  
teaching, models for 149 ff.  
resources 147 ff.  
transition to, from arithmetic 145 ff.  
algebraic function 191  
algorithm, calculator vs. 461  
counting 417  
written, learning 122  
AMU 1245  
AMUCHMA 1279  
analogy 269–272  
analysis task 81 f.  
analytic inference, successive 154  
perception 169  
anthropology 1035–1054  
definition 1035  
epistemology and 855–862  
mathematics and 1041  
perspectives on mathematics 1045–1048  
of knowledge 856–860

writing 1040–1048  
application 8, 1300 ff., 1311 ff.  
arguments for 56–65  
genuine ('real real') 67  
models and 67 f.  
probability 272 ff.  
real, in classroom 54  
vs. new mathematics purism 49  
apriorism 830  
arithmetic 8, 473 f.  
algebra gap 587 ff.  
basic vs. modeling 82  
goals 30  
number and 99–137  
transition to algebra 145 ff.  
arrow language 530  
artificial intelligence 482  
assessment 8, 80, 89 f., 132, 327–370,  
544 ff., 604–607  
action taken after 362 f.  
aggregated 360 f.  
constructive 335–359  
data handling 226 ff.  
distant learner 729  
imperatives in 368 f.  
information, encoding 353–359  
language and 1000–1003  
local vs. systemic 361 f.  
marginalization by 333 f.  
national schemes, influence on cur-  
riculum 1211 f.  
policy agenda 328–335  
praxis 363–368  
responsibility devolution 332 f.  
traditional, in new curricula 357 f.  
assimilationist model 948  
audio-visual aid, distance learning 727 f.  
media 788  
Auschwitz, education prevents new 1264  
Australia (Victoria), innovation in 79–82  
assessment in 372 f.  
axiomatics 1292 ff.  
probability 257

### B

bass (fish), survival problem 77 ff.  
Bayesian probability 281  
behavioral learning 885

betting 269  
bilingualism 1017–1021  
book, children's 796  
box plot 224  
broadcast media 788

## C

*Cabri-géomètre* 472  
calculation, algorithmic 412  
    computer use and 452  
    mental vs. written 120–125  
    tools for 629–633  
calculator 432, 435–468, 522–525  
    arithmetic 438  
    checking results 461  
    effect on curriculum 630 f.  
    empowerment by 462  
    failure in use 452  
    function key use 459  
    graphic 302 ff.  
        distance learning 727  
    mathematical teaching with 458–463  
    mathematical thought and 451–458  
    notational convention 460  
    school policy on 442 ff.  
    scientific 438  
    symbolic 438  
    use 9  
        evaluation of 449 ff.  
calculus 8, 289–325, 474 f.  
    conceptual development 679–686  
    formalization of concepts 682  
    future for 320 f.  
    instruction in 690–693  
    learning, phases in 683 ff.  
    numerical representation 315 ff.  
    reform, learning theories and 291–296  
    representations of 291–296  
    visualizing concepts 310–314  
Cartesian problem solution 155  
case studies 72–85  
CASME 1281  
causal reasoning 251  
chance and data curriculum 211  
change, conditions for 544–552  
    coping with 1193 f.  
child, development to pupil 517  
    informal mathematics 514 ff.  
CIAEM 1279  
CIBEM 1242 f., 1243  
CICEAEM 1246

CIDA 1251  
citizenship 1261–1265  
    competent 61 f.  
    education for 24, 27 ff.  
class, numbers in 580  
classroom, anthropological perspectives  
    1050  
calculator use 446–449  
concrete materials in 411–434  
culture 518  
discourse 994–1000  
interaction 516 ff.  
organization of 432  
practice 506  
proof in 899 ff.  
text materials in 397–401  
virtual 488 f.  
cognition, mathematical 144 f.  
    situated 1044  
coin tossing 246, 263 ff.  
combinatorics 257  
communication, classroom 1276 ff.  
    mathematics and 993  
    need for 684  
competence, basic 626  
    mathematical, aptitude for 100 ff.  
    social construction of 334 f.  
computation, need for 684  
computer 432, 522–525, 787, 1297 f.  
    based learning 9  
        environments 469–501  
    classroom management 631  
    classroom use, procedure 632 f.  
    effect on curriculum 630 f.  
    functions and 300 f.  
    in algebra 156  
    interface 471  
    laptop 439  
    mathematics and 778  
    palmtop 439  
    personal 435–468  
    proof and 880 f.  
    system, distributed 489–492  
    teacher partnership 486 ff.  
concept formation, probabilistic 247 ff.  
    mathematical 141–144  
        concrete material and 429 ff.  
    teaching meaning of 677  
    understanding 246  
conceptual difficulty, procedural conse-  
    quence of 306 f.  
concrete material, classroom 411–434

concreteness principle 688  
conjecture 1297  
Connected Mathematics project 213  
constructivism 247, 519, 843–846, 1306  
    radical 1074  
content, assessment 545  
context, authentic and meaningful 102  
    learning in 542  
control structure, textual 381  
counting dots 169  
    skill 106  
critical activity, learning as 1269  
    philosophical 1258  
    theory 1262  
critique, mathematics as tool for 1266 f.  
cross section 183  
    map and, use 189  
    use 189  
cube building 186  
Cuisenaire rod 424 ff.  
cultural system, identification problem  
    1042 f.  
culture, conflict and 1271 ff.  
    definition 1035 f.  
    language and 1014–1021  
    mathematics as phenomenon of 1039  
        traditional, mathematics in 926  
curriculum, approach to 568  
    calculus 690  
    canonical 7  
    design 139–160, 506, 772 f., 1075  
        distance learning 722 ff.  
    development 951–955, 1009, 1094  
        central 1222 ff.  
        large scale projects 1213 f.  
        mathematics teacher and 1207–  
            1234  
        practical 1219 f.  
        teacher in 1217–1224  
        time needed for 1220 ff.  
elementary, content 104 f.  
implementation, resources for 1216  
influences on 1208–1216  
linear algebra 693 f.  
probability and statistics 255 ff.  
real world 92  
realism in 624–627  
reform 809, 1300 ff.  
school based vs. central 1227–1230  
technology impact on 492 ff.  
text function 383 f.  
trends in 1209 f.

## D

DANAID 1251  
data 1063 f.  
calculator processing 455  
handling 8, 205–237  
    case for in curriculum 207–210  
    curriculum 210–213  
    emergence of 205 f.  
    future challenges 225–231  
    historical and social roots 206 f.  
    learning and teaching 220–225  
    professional development 228 ff.  
    research themes 222–225  
    technology and 216 f.  
    trends 214 f.  
    visualization 212, 215 f.  
deficit model 948  
definition-theorem-proof model 880  
detail, level of, choice of 169  
developing country 24  
development, formative 62 ff.  
didactical contract 521, 573 f.  
    engineering 1074 f.  
    transposition 374 f.  
didactical contract 517  
didactics 1097–1121, esp. 1111–1117  
    research and 1108 f.  
        topics in 1113  
    teacher education and 1104–1111  
discourse 824  
    classroom 888 ff., 994–1000  
    new forms 997  
discovery, epistemology 831  
distance education, changing concepts  
    701–707  
    colonialism and 740 ff.  
    dangers 739–744  
    market 708 ff.  
    mathematics and 710 f.  
    nature of 711 f.  
    priorities 707 f.  
    technology for 705 ff.  
distance education 488 f., 506, 701–754  
    appropriateness 745 f.  
    assessment and monitoring 749 f  
    assumptions 744 f.  
    case study 720–729  
    cultural bias 748  
    cultural imperialism 747  
    epistemology 749  
    example 743 f.

- linguistic factors 746 f.  
 mathematics 712–716  
 division 114 ff.  
     facts 119  
     long 122–125  
 drawing, reality and 182 ff.  
 dropout 1268  
 dualism 807, 810
- E**
- education 23 f.  
     Bantu 1271  
     experimentation in 926–931  
     liberal, mathematics and 1291–1294  
     paradox of 1259  
     pre-industrial 22  
     progressive 1298 f.  
     public, industrial era 23 f.  
     school/non-school 1270  
     universal primary 1095, 1235, 1238 f.  
         mathematics and 1240
- educational material, misuse 424–427  
     necessity 426  
     theory, proof and 884–887
- electronic text 1079
- elementary school math 511–564
- empiricism 830  
     pragmatic 1071–1073
- employment market, training for 671  
     selection, mathematics in 670
- enculturation, mathematics learning as 1049
- epistemological triad 1075
- epistemology 822, 827–876  
     genetic approach 834 f.  
     Kantian 519  
     Piagetian 1073  
     theory of instruction and 864 ff.
- equation, interpretation of 590  
     teaching concept of 587–604  
         problem oriented 596 ff.  
         situational 598–604  
         traditional 590–596  
     vocational teaching 662 f.
- equity, assessment 545  
     gender 948–954
- ERIC 1252
- error theory 270
- estimation, numerical 109 f.
- ethnomathematics 823, 909–943, 1040  
     history of 909–915
- movement of 913 f.  
 new concepts 913 ff.  
 research field 915–918
- evaluation, distant 729
- event, mathematical 787
- exemplarity 1263, 1267
- exemplary program 975
- exercise, in text 380 f., 387 f.
- exhibition, mathematical 787
- expectation value 270
- explanation, proof as 903 ff.  
     textual 372
- exploration, successive 154
- exposition, textual 387
- expression, writing mathematical 590
- F**
- facts, mastery of basic 116–119
- factual knowledge 35
- fallibilism 810
- feminist theory 950 f.
- festival, mathematics 787
- folk mathematics 914
- form, analysis of 169
- formalism 474 f.  
     adapting to ideas 280 f.  
     death of 717 f.  
     progress towards 103
- foundationalism, epistemology 829 ff.
- fractal 795
- frequentism 241
- FUGS (formalizing, unifying, generalizing, simplifying) 676, 678
- function 8, 289–325  
     computer approach to 300 f.  
     concept of 679 f.  
         development of 680 f.  
         future for 320 f.  
         types of 297 ff.
- further education 506, 647–674, 770–777, 778 f.
- mathematics in 666–669
- participants 774 f.
- providers 649
- students 650 ff.
- types of 647 f.
- G**
- Galton board 267
- game, classroom 421 f.

- cowry 928  
 displacement and enactive 795 f.  
 mathematical 787  
 gender, mathematics and 823  
 mathematics education and 955–966  
 gendered mathematics 945–985  
 generalizability principle 689  
 generalization 51  
 geometrical property 190  
 geometry 475–478
  - geometry, basic elements 170
  - concrete materials in 415
  - Euclidean, applied nature of 50
  - goals 30
  - model of space 195
 goal, clarity of 89  
 grading, assessment and 353
  - detailed vs. holistic 354
 graph, calculator use 454
  - use 223
  - visualization with calculator 459
 graphic representation, tools for 629–633  
 group, social, mathematics in 927  
 guessing, calculator use and 456
- H**
- Handbook*, audience 2 f.  
 scope, structure 3 f.  
 hermeneutic tradition 1078  
 hidden mathematics 914  
 higher education 506, 675–700
  - general features 676 ff.
 history 1306 ff., 1311 ff.
  - of mathematics, classroom use 633–644
 holographic proof 882  
 HPM 1248  
 humanism 811
  - mathematics education and 1289–1321
 hypertext 733
- I**
- IACME 1244, 1245
  - conference 1242
 IASE 1249, 1250  
 ICME 1252, 1279, 1280  
 ICMI 1241–1247, 1253
  - activities 1247 ff.
 iconic visualization 266
- ICOTS 1249, 1250  
 IDM 1252  
 IEA 1250  
 illiteracy, adult 1238  
 image, mental 193
  - textual 381 ff.
  - problems with 392–395
 implicit mathematics 914  
 indigenous mathematics 913  
 industry, mathematics for 665  
 inference, without probability 258 ff.  
 infinitesimal concept 308  
 informal mathematics 914  
 information, qualitative 1105
  - quantitative 1105, 1110 f.
 innovation, failure of 1106 ff.  
 institution, characteristics of, influence of 579 ff.
  - creating new 974
 instruction, epistemology and theory of 864 ff.  
 integer, going beyond 110 f.  
 intentionality 1304 ff.  
 interaction, social, learning through 103  
 interactionism 850–855  
 international cooperation, future 1253 f.
  - national institutions and 1252 f.
 intervention program 966–977
  - calendrical classification 971
  - historical and political influence 968 ff.
  - strategy 972
  - success 972 f.
  - types of 970 ff.
 interview, guided 278 f.  
 intuition, probabilistic 275–282  
 IOWME 1248  
 IOWO 1252  
 IREM 1252
- J**
- justification 14 f.
  - epistemology 829 ff.
  - proof and 889
- K**
- knowhow, mathematics codified in 914  
 knowledge, anthropology of 856–860
  - body of 1076
  - practical, algebra and 152–155
