

Landolt-Börnstein
Group I: Elementary Particles, Nuclei and Atoms

Volume 9
Elastic and Charge Exchange Scattering of Elementary Particles

Subvolume B2
Pion Nucleon Scattering. Part 2 - Methods and Results of Phenomenological Analyses

| | | |
|----------|--|-----|
| | Introductory material | |
| 2 | Methods and results of phenomenological analyses | 1 |
| 2.0 | Introduction | 1 |
| 2.1 | Methods of partial wave and amplitude analyses | 4 |
| 2.2 | Results for pion-nucleon scattering amplitudes | 36 |
| 2.3 | Measurable quantities reconstructed from partial waves | 148 |
| 2.4 | Further results derived from πN partial waves | 198 |
| 2.5 | Applications of πN and $\pi \pi N$ anti- N amplitudes | 285 |
| 2.6 | Analysis of high energy data | 314 |
| 3 | Bibliography | 405 |
| 3.1 | Books, reviews and lecture notes | 405 |
| 3.2 | Original papers and preprints | 424 |
| 3.3 | List of pion-nucleon scattering experiments | 478 |
| Appendix | Collection of pion-nucleon scattering formulas | 480 |
| 1 | Kinematics | 480 |
| 2 | Scattering amplitudes | 487 |
| 3 | Expansions of scattering amplitudes | 500 |
| 4 | Measurable quantities | 514 |
| 5 | Unitarity | 519 |
| 6 | Symmetries and analytic properties of invariant amplitudes | 525 |
| 7 | Analytic properties of partial wave amplitudes | 549 |
| 8 | Low energy models | 561 |
| 9 | Regge models | 569 |
| 10 | Isospin bounds | 578 |
| 11 | Electromagnetic nucleon and pion form factors | 580 |
| 12 | References | 588 |
| | Subject index | 594 |
