

## **LB-CONTENTS**

### **GROUP I: Elementary Particles, Nuclei and Atoms**

#### **VOLUME 17**

#### **Photon and Electron Interactions with Atoms, Molecules and Ions**

##### **SUBVOLUME B**

##### **Collisions of Electrons with Atomic Ions**

	Title Page, Contributors, Preface	
0	General introduction	
1	Photon interactions with atoms (See Vol. 17A)	
2	Electon collisions with atoms (See Vol. 17A)	
3	Electron collisions with atomic ions	1
3.1	Excitation (A.K. PRADHAN, H.L. ZHANG)	1
3.1.1	Introduction	1
3.1.2	Theory	2
3.1.3	Comparison with experiments	9
3.1.4	Scaling laws, analysis of data, and databases	18
3.1.5	Data tables and accuracy ratings	19
3.1.6	References for 3.1	96
3.2	Ionization (H. TAWARA)	103
3.2.1	Introduction and general description	103
3.2.2	Experimental techniques for ion targets	103
3.2.3	Contribution of various processes to ionization	105
3.2.4	Experimental results of ionization cross sections of ions	107
3.2.5	Short description of theories	116
3.2.6	Evaluated ionization cross sections for ions	116
3.2.7	Empirical formula for ionization cross sections	127
3.2.8	References for 3.2	129
	Appendix: Data sources for the experimental ionization cross sections of atomic ions	130
3.3	Electron ion recombination processes (Y. HAHN)	140
3.3.1	Introduction	140
3.3.2	General discussion	141
3.3.3	Direct processes	145
3.3.4	Indirect processes - dielectronic recombination	150
3.3.5	Plasma density effects - field and collisional perturbations	153
3.3.6	Conclusion	155
3.3.7	Explanation for the use of tables	156
3.3.8	Tables	157
3.3.9	References for 3.3	209
3.4	Electron detachment from negative ions (H. TAWARA)	211
3.4.1	Introduction	211
3.4.2	Electron detachment cross sections	212
3.4.3	Theoretical treatments	216
3.4.4	Empirical formulas for electron detachment	217
3.4.5	Resonance states in electron detachment under electron impact	217
3.4.6	References for 3.4	219
