1	Introduction	1
1.1	The sub-optimal Nehari problem	4
1.2	The sub-optimal Hankel norm approximation problem	5
1.3	The model reduction problem	6
1.3.1	The Hankel norm of systems	6
1.3.2	The model reduction problem	8
1.3.3	Hankel norm approximation and model reduction	8
1.4	Organization of the book	10
2	Classes of well-posed linear systems	13
2.1	Well-posed linear systems	14
2.2	Duality theory	16
2.3	The Pritchard-Salamon class	20
2.4	The analytic class	25
2.5	Transfer function algebras	52
3	Compactness and nuclearity of Hankel operators	63
3.1	Compactness of Hankel operators	66
3.2	Nuclearity of Hankel operators	74
3.3	L_∞ -error of sub-optimal Hankel norm approximants	80

4 Characterization of all solutions	85
4.1 The sub-optimal Hankel norm approximation problem	85
4.2 Main assumptions and a few useful consequences	89
4.3 All solutions to the sub-optimal Hankel norm approximation problem	95
4.4 A comparison with existing results	99
5 State space solutions	101
5.1 J -spectral factorization for the Pritchard-Salamon class	101
5.2 J -spectral factorization for the analytic class	104
6 The non-exponentially stable case	109
6.1 A few useful results	110
6.2 The class of systems and the main result	111
6.3 State-space solutions	114
7 The case of regular linear systems	119
7.1 Reciprocal systems	119
7.2 The sub-optimal Hankel norm approximation problem	121
7.3 The sub-optimal Nehari problem	123
8 Coda	127
Bibliography	131
Index	139
Standard notation	141
