

# Table of Contents

## Invited Papers

Embedded Systems Unsuitable for Object Orientation . . . . .	1
<i>Maarten Boasson</i>	
On Architectural Stability and Evolution . . . . .	13
<i>Mehdi Jazayeri</i>	
Encapsulating Failure Detection: From Crash to Byzantine Failures . . . . .	24
<i>Assia Doudou, Benoît Garbinato, Rachid Guerraoui</i>	
Contextware: Bridging Physical and Virtual Worlds . . . . .	51
<i>Alois Ferscha</i>	

## Embedded Systems

Evaluating Performance and Power of Object-Oriented Vs. Procedural Programming in Embedded Processors . . . . .	65
<i>Alexander Chatzigeorgiou, George Stephanides</i>	
OMC-INTEGRAL Memory Management . . . . .	76
<i>Jose Manuel Pérez Lobato, Eva Martín Lobo</i>	
Language Issues of Compiling Ada to Hardware . . . . .	88
<i>Michael Ward, Neil C. Audsley</i>	

## Case Studies

Software Development Reengineering - An Experience Report . . . . .	100
<i>Adrian Hoe</i>	
Development of a Control System for Teleoperated Robots Using UML and Ada95 . . . . .	113
<i>Francisco J. Ortiz, Alejandro S. Martínez, Barbara Álvarez, Andres Iborra, José M. Fernández</i>	
Using a Secure Java Micro-kernel on Embedded Devices for the Reliable Execution of Dynamically Uploaded Applications . . . . .	125
<i>Walter Binder, Balázs Lichtl</i>	

## Real-Time Systems

A POSIX-Ada Interface for Application-Defined Scheduling . . . . .	136
<i>Mario Aldea Rivas, Michael González Harbour</i>	

## High-Integrity Systems

Closing the Loop: The Influence of Code Analysis on Design . . . . .	151
<i>Peter Amey</i>	
High-Integrity Systems Development for Integrated Modular Avionics Using VxWorks and GNAT . . . . .	163
<i>Paul Parkinson, Franco Gasperoni</i>	

## Ada Language

How to Use GNAT to Efficiently Preprocess New Ada Sentences . . . . .	179
<i>Javier Miranda, Francisco Guerra, Ernestina Martel, José Martín, Alexis González</i>	
Exposing Uninitialized Variables: Strengthening and Extending Run-Time Checks in Ada . . . . .	193
<i>Robert Dewar, Olivier Hainque, Dirk Craeynest, Philippe Waroquiers</i>	
Adding Design by Contract to the Ada Language . . . . .	205
<i>Ehud Lamm</i>	

## Program Analysis

Static Dependency Analysis for Concurrent Ada 95 Programs . . . . .	219
<i>Zhenqiang Chen, Baowen Xu, Jianjun Zhao, Hongji Yang</i>	
DataFAN: A Practical Approach to Data Flow Analysis for Ada 95 . . . . .	231
<i>Krzysztof Czarnecki, Michael Himsolt, Ernst Richter, Falk Vieweg, Alfred Rosskopf</i>	
Prioritization of Test Cases in MUMCUT Test Sets: An Empirical Study .	245
<i>Yuen T. Yu, Man F. Lau</i>	

## Tools

About the Difficulties of Building a Pretty-Printer for Ada . . . . .	257
<i>Sergey Rybin, Alfred Strohmeier</i>	
A Tailorable Distributed Programming Environment . . . . .	269
<i>Ernestina Martel, Francisco Guerra, Javier Miranda</i>	

## Distributed Systems

Modeling and Schedulability Analysis of Hard Real-Time Distributed Systems Based on Ada Components . . . . .	282
<i>Julio L. Medina, J. Javier Gutiérrez, José M. Drake, Michael González Harbour</i>	

Transparent Environment for Replicated Ravenscar Applications . . . . .	297
<i>Luís Miguel Pinho, Francisco Vasques</i>	
Concurrency Control in <i>Transactional Drago</i> . . . . .	309
<i>Marta Patiño-Martínez, Ricardo Jiménez-Peris, Jörg Kienzle, Sergio Arévalo</i>	
<b>Libraries, APIs, and Bindings</b>	
An Ada Binding to the IEEE 1003.1q (POSIX Tracing) Standard . . . . .	321
<i>Agustín Espinosa Minguet, Ana García Fornes, Alfons Crespo i Lorente</i>	
GNAT Ada Database Development Environment . . . . .	334
<i>Michael Erdmann</i>	
<b>Object-Orientation</b>	
Ada, Interfaces and the Listener Paradigm . . . . .	344
<i>Jean-Pierre Rosen</i>	
Using Object Orientation in High Integrity Applications: A Case Study . .	357
<i>Alejandro Alonso, Roberto López, Tullio Vardanega, Juan Antonio de la Puente</i>	
<b>Author Index</b> . . . . .	367
