SUBJECT INDEX

adjunction, 16, 29
algebra,
  Heyting algebra, 141, 156
  partial Boolean algebra, 156
algebraic,
  algebraic integers, 29, 44
  algebraic logic, 212
  algebraic number field, 24, 29
algorithm, 11, 14
  Euclidean algorithm, 42, 44, 46, 51, 71, 107, 174
analytical apparatus, viii, 148, 149, 160, 174
antiautomorphism, 141, 163
arithmetic,
  bounded arithmetic, 203, 204, 208
  Dedekind-Peano arithmetic, vii
  feasible arithmetic, 201
  Fermat-Kronecker arithmetic, vii, 16, 21, 39, 54, 60, 74, 117
  fragments of arithmetic, 201
  general arithmetic, vii, 16, 21, 39, 54, 60, 74, 128
  Heyting arithmetic, 74
  Peano arithmetic, 18, 31, 65, 74, 193, 201
  polynomial arithmetic, vii, 20, 51, 210
  predicative arithmetic, viii, 31, 32, 77, 205
  primitive recursive arithmetic, 69, 73, 79
  Robinson's arithmetic, 58, 59, 82, 90
  transfinite arithmetic, 15, 122
arithmetical geometry, viii, 17, 18, 26, 189,
axiom,
  axiom of choice, 4
  axiom of constructibility, 4
  axiom of foundation, 83
  axiom of infinity, 125
  axiom of reducibility, 6
  axiom of replacement, 183
category, 8
complement,
  local complement, 141, 154, 165, 167
  relative pseudo-complement, 141, 168
conjecture,
  Herbrand's conjecture, 91
  Mordell's conjecture, 92, 189
  Taniyama-Shimura-Weil conjecture, 115
  Weil's conjecture, 189
consistency, 4, 20, 21, 33, 45, 46, 50, 61, 81, 173, 182
continuum problem,
  Cantor's continuum problem, 4, 77, 80
Curry-Howard isomorphism, 60, 75, 115
cyclotomy, 29, 35, 36
decision problem, 11, 46
diagonal,
  Cantor's diagonal, 19, 66, 76, 90, 123
  Cauchy's diagonal, 19, 47, 53, 77, 79, 89, 92
discriminant, 19, 34
disparate function system, 76, 191, 192
distribution of primes, 25
domain of rationality, 16, 27, 28, 40, 43, 53, 100
effinite quantifier, 84, 100
ellipotomy, 35, 36, 39

elliptic curve, 33, 34, 189
equation,
  Diophantine equations, 12, 15
  polynomial equations, 114
factorization,
  unique factorization, 28, 97
field,
  Galois field, 37, 97, 98
  ground field, 98
  natural field, 37, 98
finitism, 15, 32, 45, 52
forms,
  modular elliptic forms, 38, 115
function,
  logical choice function, 31, 69
  transcendantal function, 16, 29
  transfinite choice function, 31, 52, 69
functionals,
  type recursive functional, 75
global substitutions, 71, 101
group,
  Galois group 38
hierarchy,
  Veblen hierarchy, 120
horizon,
  constructive horizon, 140
hypothesis
  Riemann's hypothesis, 190
indeterminates, vii, 16, 21, 23, 28, 29
induction,
  bounded induction, 82
  complete induction, 51, 91
  infinite induction, vii, 13, 21, 32, 53
  Peano's induction postulate, vii, 32, 58, 82, 125
  transfinite induction, viii, 13, 51, 58, 62, 82, 83, 101, 119, 212
interpretation,
  Bohr's complementarity interpretation, 172
  Copenhagen interpretation, 172
  Dialectica interpretation, 51, 74
  no counterexample interpretation, 72
infinite descent, vi, 17, 19, 20, 29, 42, 51, 54, 81, 91, 189, 213
invariants, 26, 27, 33, 38, 46, 47
invariance,
  Lorentz invariance, 159
involution, 141
lattice,
  Brouwerian lattice, 168
  orthocomplemented lattice, 162
law,
  Brouwer's fan law, 121
lemniscate, 35
lemma,
  Gauss' lemma, 43, 107, 108
  König's lemma, 205
logic,
  Aristotelian logic, 16, 21
  Boolean logic, 6
  Heyting's logic, 7
  modular logic, 49, 193
machine,
  Turing machine, 11
metric,
  Hermitian metric, 115
model,
  non-standard model, 11
multiplicity, 128, 213
multiverse, 153
Modus Ponens, 11, 103, 125
numbers,
  class-number, 36
  Kummer ideal numbers, 29
  transcendantal numbers, 122, 123
operators,
  Hermitian operator, 151
paradox,
  Einstein-Podolski-Rosen paradox, 157, 169, 182
  Richard's paradox, 668
  Skolem's paradox, 68
polynomial,
  ordinal polynomial, 119
  polynomial time, 208
principle,
  Brouwer's bar-induction principle, 206

Excluded middle principle, 6, 14, 31, 49, 53, 58, 62, 132, 135, 137, 208
Hume's principle, 125
least number principle, 58, 70, 81, 82
principle of logical omniscience, 14, 58, 137
substitution principle, 97
uncertainty principle, 143, 172
product,
Cauchy's convolution product, 19, 47, 53, 60, 61, 89, 96, 126
programme,
Hilbert's programme, viii, 21-23, 33, 45, 47, 68
Kronecker's programme, viii, 21, 38, 42, 47, 51, 62, 81
Langland's programme, 38, 45
rational points, 34
realizability,
conditions of realizability, 161
recessor, 64
reductio ad absurdum, 12, 19, 57, 78, 91, 94, 171
scheme, 38
semantics,
Kripkean semantics, 139, 209
sequence,
choice sequences, 7, 77, 192, 206
effinite sequence, 84, 92
infinitely proceeding sequences, vii, 7, 57, 59, 92
lawless sequences, 206
series,
Dirichlet's series, 25, 29
infinite series, 34, 36, 37, 45, 209
space,
Banach space, 142, 143
Hilbert space, 141, 150, 152, 154, 164
probability space, 199
species, 7
structure,
cumulative rank structure, 24
system,
modular system, 43, 49, 61, 79
theorem,
Brouwer-König theorem, 205
Cantor's normal form theorem, 48, 63, 83, 115, 118, 124, 212
Church's theorem, 66
Dirichlet's theorem, 14, 25, 37, 56, 93, 189, 190
fan theorem, 207
Fermat's last theorem, 38
Gelfond-Schneider theorem, 123, 124
Gleason's theorem, 156, 164
Gödel's incompleteness theorem, 10, 13, 18, 31, 47, 65, 188, 194
Herbrand's fundamental theorem, 13, 72, 77, 84
Hilbert's basis theorem, 26, 101
Hilbert-Ackermann theorem, 82, 202
Kronecker-Weber theorem, 38
Matijasevic's theorem, 12, 79
Paris-Harrington theorem, 191
Ramsey's theorem, 4
Solovay's theorem, 5
Sturm's theorem, 36, 41, 56, 73
Trakhtenbrot's theorem, 193
theory,
Cantorian set theory, vii, 1, 2
Kolmogorov-Chaitin algorithmic complexity theory, 203
ramified type theory, 1, 127
reductive proof theory, 12, 33, 201
Robinson's theory, 59, 90
theory of forms, vii, 22, 29, 44, 54, 212
type theory, 1, 13, 20, 62, 127
Zermelo-Fraenkel axiomatic set theory, viii, 4, 58, 83, 89, 125
topos, 9, 183
transfinite,
transfinite ordinals, viii, 62, 64, 80
trees,
well-founded trees, 63, 205
valuator, 59, 60, 88, 196

winding number, 45
