

Contents

1	Introduction	1
I	Decision Theoretical Foundation	5
2	Fundamentals of Decision Making	7
2.1	Structure and Classification of Decision Models	9
2.2	The Set of Alternatives	13
2.3	Kinds of Objectives	16
2.4	Optimality	19
3	Fundamentals of Multi-criteria Decision Making	21
3.1	The General MODM-model	23
3.2	Dominance and Efficiency	27
3.3	Compromise Methods	39
3.3.1	Method of Weighting Objective Functions	43
3.3.2	Method of Weighted Distance Functions	47
3.3.2.1	Distance-minimization Method	47
3.3.2.2	Distance-maximization Method	55
3.3.2.3	Synopsis of Distance-based Methods	72

II	Dynamic Decision Making	75
4	Fundamentals of Dynamic Decision Making	77
4.1	The Set of Alternatives	82
4.2	Basic Types of Objectives in Dynamic Decision Making	88
5	Type A Objective: 'The Destination Matters'	91
5.1	Problem Formulation	93
5.2	Refinements of the General Formulation	96
5.3	Optimality	101
6	Type B Objective: 'The Journey is the Goal'	107
6.1	Problem Formulation	109
6.2	Dynamic Dominance and Efficiency	119
6.3	Compromise Models	139
6.3.1	Method of Weighting Periodic Objectives	141
6.3.2	Method of Weighted Periodic Distances	152
6.4	Sustainability as Objective	163
6.4.1	A Formal Definition	166
6.4.2	Satisficing Objective without Maximizing Behavior	178
6.4.3	Satisficing Objective with Maximizing Behavior	182
6.4.4	Afterthought	188
7	Multiple Objectives in Dynamic Decision Making	191
7.1	Multiple Type A Objectives	193
7.2	Multiple Objectives of Hybrid Types	194
7.2.1	Problem Formulation	195
7.2.2	Efficiency Aspects	196
7.2.3	Compromise Models	207

7.2.4	Sustainability Revisited	212
7.3	Multiple Type B Objectives	214
7.3.1	Problem Formulation	215
7.3.2	Efficiency Aspects	216
7.3.3	Compromise Models	218
7.3.4	Sustainability Revisited	224
8	Concluding Remarks	225
	List of Figures	229
	Symbols and Notation	231
	Bibliography	235
	Index	249
