# Contents

<b>Historical and Current Concepts of the Mechanisms of Aging</b> . . . . .	1
1.1 Rate of Living . . . . .	2
1.2 Endocrine Theory . . . . .	3
1.3 Weismann's Theory . . . . .	6
1.4 The Immune Theory . . . . .	12
1.5 Cross-Linking . . . . .	13
1.6 Free Radicals . . . . .	14
1.7 Aging and Evolution . . . . .	19
<b>Basic Determinants of Longevity</b> . . . . .	25
2.1 Energy Intake and Expenditure . . . . .	25
2.2 The Storage and Flow of Information . . . . .	30
2.3 Redundancy . . . . .	35
2.3.1 Cellular Redundancy . . . . .	35
2.3.2 Molecular Redundancy . . . . .	37
2.4 Genetics of Aging . . . . .	38
2.4.1 Species Longevity . . . . .	39
2.4.2 The Preordained Ontogeny of the Organism . . . . .	47
2.4.3 Parental Longevity . . . . .	48
2.4.4 Longevity of Twins . . . . .	48
2.4.5 Sex and Longevity . . . . .	49
2.4.6 Syndromes of "Premature Aging" . . . . .	50
2.4.7 Hybrid Vigor (Heterosis) . . . . .	53
2.4.8 The Search for Longevity Genes . . . . .	53
2.4.8.1 Lower Organisms Along the Evolutionary Scale . . . . .	53
2.4.8.2 Higher Organisms Along the Evolutionary Scale . . . . .	57
<b>Aging of the Mammalian Organism</b> . . . . .	61
3.1 Cellular Aging . . . . .	61
3.1.1 Germ Line Cells . . . . .	61
3.1.2 Stem Cells . . . . .	63
3.1.3 Mitotic Cells . . . . .	66
3.1.3.1 Kinetics of the Decline of Proliferation of Cell Compartments . . . . .	71

3.1.3.2	Mechanisms of the Decline of the Proliferative Potential . . . .	85
3.1.3.3	Relevance of the Findings in Vitro for Aging of the Organism . . . . .	105
3.1.4	Postmitotic and Slowly Renewable Cells . . . . .	109
3.2	Connective Tissue . . . . .	115
3.3	The Structural Reorganization of the Mammalian Organism . . . . .	122
	<b>Neoplastic Growth Through the Human Life Span . . . . .</b>	<b>129</b>
4.1	The Clinical Age – Incidence of Neoplastic Disease . . . . .	129
4.2	The Heterogeneity of Neoplastic Growth . . . . .	136
4.3	Initiation of Neoplastic Growth at the Cellular Level . . . . .	140
4.4	Progression of Neoplastic Disease . . . . .	144
4.5	Age-Dependent Sensitivity to Carcinogens . . . . .	145
4.6	Deviations from Normal Development and Neoplastic Growth . . . . .	146
	<b>The Centenarians . . . . .</b>	<b>151</b>
	<b>References . . . . .</b>	<b>157</b>
	<b>Subject Index . . . . .</b>	<b>191</b>
