

Table of Contents

I. Computational Complexity

General Size-Change Termination and Lexicographic Descent	3
<i>Amir M. Ben-Amram (The Academic College of Tel-Aviv Yaffo)</i>	
Comparing Star and Pancake Networks	18
<i>Linda Morales and I. Hal Sudborough (University of Texas, Dallas)</i>	
Synchronization of Finite Automata: Contributions to an Old Problem . . .	37
<i>Arto Salomaa (University of Turku)</i>	
Lambda Calculi and Linear Speedups	60
<i>David Sands, Jörgen Gustavsson, and Andrew Moran (Chalmers University of Technology and University of Göteborg)</i>	

II. Program Analysis

Design and Implementation of a Special-Purpose Static Program Analyzer for Safety-Critical Real-Time Embedded Software	85
<i>Bruno Blanchet and Patrick Cousot (CNRS and École Normale Supérieure), Radhia Cousot (CNRS and École Polytechnique) Jérôme Feret, Laurent Mauborgne, Antoine Miné, David Monniaux, and Xavier Rival (CNRS and École Normale Supérieure)</i>	
Meta-circular Abstract Interpretation in Prolog	109
<i>Michael Codish (Ben Gurion University of the Negev) and Harald Søndergaard (University of Melbourne)</i>	
Flow Analysis: Games and Nets	135
<i>Chris Hankin (Imperial College of Sciences, Technology, and Medicines), Rajagopal Nagarajan (University of Coventry), and Prahладavaradan Sampath (Teamphone.com)</i>	
On Extracting Static Semantics	157
<i>John Hannan (The Pennsylvania State University)</i>	
Foundations of the Bandera Abstraction Tools	172
<i>John Hatcliff and Matthew B. Dwyer (Kansas State University), Corina S. Păsăreanu (Kestrel Technology), and Robby (Kansas State University)</i>	

Types in Program Analysis 204
Thomas Jensen (IRISA/CNRS Rennes)

Flow Logic: A Multi-paradigmatic Approach to Static Analysis 223
Hanne Riis Nielson and Flemming Nielson (Technical University of Denmark)

Structure-Preserving Binary Relations for Program Abstraction 245
David A. Schmidt (Kansas State University)

III. Program Transformation

Principles of Inverse Computation and the Universal Resolving Algorithm 269
Sergei Abramov (The Russian Academy of Sciences) and Robert Glück (Waseda University)

A Symmetric Approach to Compilation and Decompilation 296
Mads Sig Ager and Olivier Danvy (University of Aarhus) and Mayer Goldberg (Ben Gurion University)

The Abstraction and Instantiation of String-Matching Programs 332
Torben Amtoft (Kansas State University), Charles Conzel (University Bordeaux-1), Olivier Danvy (University of Aarhus), and Karoline Malmkjær (Ericsson Telebit)

WSDFU: Program Transformation System Based on Generalized Partial Computation 358
Yoshihiko Futamura, Zenjiro Konishi, and Robert Glück (Waseda University)

Homeomorphic Embedding for Online Termination of Symbolic Methods . . 379
Michael Leuschel (University of Southampton)

Simple Driving Techniques 404
Mads Rosendahl (University of Roskilde)

Demonstrating Lambda Calculus Reduction 420
Peter Sestoft (Royal Veterinary and Agricultural University and IT University of Copenhagen)

From Type Inference to Configuration 436
Morten Heine Sørensen, (IT Practice, Copenhagen) and Jens Peter Secher (University of Copenhagen)

Author Index 473
