Table of Contents

Preface vii

List of Participants ix

Schedule x

The Diversity of Models in Statistical Mechanics: Views about the Structure of Scientific Theories 1
Anouk Barberousse

Mathematical Logic and Natural Language: Life at the border 25
Johan van Benthem

Bayesian Networks in Philosophy 39
Luc Bovens and Stephan Hartmann

An Application of Circular Definitions: Rational Decision..... 47
André Chapuis

Two-Dimensionalism and the Metaphysical Possibility of Zombies 55
Daniel Cohnitz

Topics in Reverse Mathematics 63
Mariagnese Giusto

The Logic of Intensional Predicates..... 89
Leon Horsten

The So-Called Materially Valid Inferences and the Logic of Concepts..... 113
Ludger Jansen and Niko Strobach

Analysis and Design from a Viewpoint of Information Flow 119
Makoto Kikuchi

Features in Phonological Theory 123
Marcus Kracht

New Semantics for Modal Predicate Logics 151
Oliver Kutz

What is Input/Output Logic? 163
David Makinson and Leendert van der Torre

The Gupta-Belnap Fixed-Point Problem and the Theory of Clones of Functions 175
José Martínez Fernández

Situated Reasoning in Time about Time 185
Alice G.B. ter Meulen

Generic Ontology of Linguistic Classification 203
Rainer Osswald

Techniques and Methods of Science from a Structuralist Point of View 213
Martin Rotter

Proof Theory and Formal Grammars: Applications of Normalization 235
Hans-Jörg Tiede

World Travelling and Mood Swings 257
Kai Frederick Wehmeier

Synchrony and Composition: Toward a Cognitive Architecture between Classicism and Connectionism 261
Markus Werning
