

# Contents

<b>1 Cluster and Nanoscale Science: Overview and Perspective</b>	
A.W. Castleman, Jr., S.N. Khanna . . . . .	1
1.1 Introduction . . . . .	1
1.2 Cluster Types: Formation and Study . . . . .	2
1.3 Theoretical Developments . . . . .	3
1.4 Theme of the Book . . . . .	3
<b>2 Quantum and Classical Size Effects in Thermodynamic Properties</b>	
R.S. Berry . . . . .	7
2.1 Introduction . . . . .	7
2.2 Quantum Properties of Small Systems . . . . .	10
2.3 Phases of Finite Systems . . . . .	12
2.4 Phase Diagrams of Finite Systems . . . . .	19
2.5 Conclusion . . . . .	26
References . . . . .	26
<b>3 Photoelectron Spectroscopy</b>	
G. Ganteför . . . . .	29
3.1 Introduction . . . . .	29
3.2 Physics of Photoelectron Spectroscopy . . . . .	31
3.3 Experimental Set Up . . . . .	36
3.3.1 Cluster Source . . . . .	37
3.3.2 Time-of-Flight Mass Spectrometer . . . . .	37
3.3.3 Laser . . . . .	37
3.3.4 Photoelectron Spectrometer . . . . .	38
3.4 Results . . . . .	39
3.4.1 Example: Electronic Shells in Clusters of Simple Metals . . . . .	39
3.4.2 Example: The Size Dependence of the Band Gap . . . . .	42
3.4.3 Example: Chemical reactivity and electronic structure . . . . .	45
3.4.4 Example: Dynamics . . . . .	48
3.5 Conclusion and Outlook . . . . .	51

#### 4 Quantum Tunneling of the Magnetization in Molecular Nanoclusters

R. Sessoli, D. Gatteschi, W. Wernsdorfer . . . . .	55
4.1 Introduction . . . . .	55
4.2 The Magnetic Anisotropy of Molecular Clusters . . . . .	57
4.3 The Superparamagnetic Behavior . . . . .	61
4.4 Longitudinal Field Dependence of the Relaxation Rate: The Stepped Hysteresis . . . . .	63
4.5 Transverse Field Dependence of the Relaxation Rate: The Berry Phase . . . . .	65
4.6 The Role of Dipolar Fields: The Non-Exponential Relaxation . . . .	69
4.7 The Role of the Nuclear Magnetic Moments: The Isotope Effect . .	74
4.8 Conclusions . . . . .	78
References . . . . .	79

#### 5 Magnetism of Free and Supported Metal Clusters

J.P. Bucher . . . . .	83
5.1 Introduction . . . . .	84
5.2 Simple Considerations . . . . .	86
5.2.1 Common Ideas on Magnetism . . . . .	86
5.2.2 Implications for Cluster Magnetism . . . . .	87
5.3 The Stern-Gerlach Experiments . . . . .	89
5.3.1 Experimental Principles . . . . .	89
5.3.2 Magnetic Moment Measurements of Unsupported Clusters .	91
5.3.3 A High Resolution Experiment: Nickel . . . . .	92
5.3.4 Temperature Dependence of the Giant Moments . . . . .	93
5.3.5 Clusters of Non-Ferromagnetic Transition Metals . . . . .	96
5.3.6 Locked Moment Clusters and Spin Canting . . . . .	97
5.4 Interpretation of the Beam Experiments . . . . .	99
5.4.1 Magnetic Anisotropy . . . . .	100
5.4.2 Coupling Between Magnetic Moment and Lattice: Deflection Profile . . . . .	100
5.5 Growth Kinetics of Clusters on Surfaces . . . . .	102
5.5.1 Tuning the Clusters Density . . . . .	102
5.5.2 Island Shapes . . . . .	104
5.6 Thermodynamic Growth Modes . . . . .	106
5.6.1 Growth Criteria . . . . .	106
5.6.2 Elastic and Structural Considerations . . . . .	107
5.7 Organized Growth . . . . .	108
5.7.1 Incommensurate Modulated Layers . . . . .	108
5.7.2 Atomic Scale Template . . . . .	110
5.7.3 Self Organization . . . . .	112
5.7.4 Periodic Patterning by Stress Relaxation . . . . .	113

5.7.5	Organization on Vicinal Surfaces .....	115
5.7.6	Low Temperature Growth .....	115
5.8	Magnetic Properties of Nanostructures .....	116
5.8.1	Isolated Clusters on Surfaces .....	117
5.8.2	Interacting Islands and Chains .....	120
5.8.3	The Two-Dimensional Limit .....	125
5.9	Conclusion and Outlook .....	130
	References .....	132

## 6 Magnetism in Free Clusters and in Mn<sub>12</sub>O<sub>12</sub>-Acetate Nanomagnets

	S.N. Khanna, C. Ashman, M.R. Pederson, J. Kortus .....	139
6.1	Introduction .....	139
6.2	Magnetic Moment of Free Clusters in Beams .....	140
6.3	Oscillatory Change in the Magnetic Moment of Ni <sub>n</sub> Clusters upon H Adsorption .....	143
6.4	Quantum Tunneling and Atomic, Electronic and Magnetic Structure of Mn <sub>12</sub> O <sub>12</sub> -Acetate .....	146
6.5	Details of Theoretical Studies .....	149
6.6	Geometry and Electronic Structure of Isolated Mn <sub>12</sub> O <sub>12</sub> Clusters .	150
6.6.1	Vibrational Frequencies of the Hexagonal Tower .....	151
6.7	Electronic Structure of Mn <sub>12</sub> O <sub>12</sub> -Acetate .....	152
6.8	Magnetic Anisotropy Energy .....	154
6.9	Conclusions and Extension to Fe <sub>8</sub> Nanomagnets .....	156
	References .....	157

## 7 Size Effects in Catalysis by Supported Metal Clusters

	A.A. Kolmakov, D.W. Goodman .....	159
7.1	Introduction .....	159
7.2	Methodology .....	160
7.2.1	Thin Oxide Films as a Model Support .....	160
7.2.2	Cluster Deposition: Density, Size and Control of Morphology .....	161
7.2.3	Analytical Tools: Spectroscopy and Microscopy .....	164
7.3	Cluster Size and Reactivity .....	170
7.3.1	Geometric Factors .....	170
7.3.2	Electronic Factors .....	174
7.4	Examples of Size Effects in Cluster Reactivity .....	181
7.4.1	Onset of the Reactivity of Au/TiO <sub>2</sub> with Metal-Nonmetal Transitions and the Dimensionality of Supported Clusters .....	181
7.4.2	CO Dissociation on Structural Defects of Rh/Al <sub>2</sub> O <sub>3</sub> /NiAl (110) .....	186
7.4.3	CO Oxidation Over a Pt/MgO Monodispersed Catalyst ...	189

7.5	Concluding Remarks and Future Prospects	192
	References	193
<b>8 Delayed Ionization</b>		
	E.E.B. Campbell, R.D. Levine	199
8.1	Introduction	199
8.2	Transition State Theory	200
8.3	Detailed Balance	203
8.4	Experimental: The Rate of Thermionic Emission	210
8.5	Experimental: Dynamics	213
8.6	Kinetic Model	217
8.7	Concluding Remarks	219
<b>9 Cluster Dynamics: Influences of Solvation and Aggregation</b>		
	Q. Zhong, A.W. Castleman, Jr.	223
9.1	Introduction	223
9.2	Charge-Transfer Reactions	224
	9.2.1 Photo-Induced Electron-Transfer Reactions	224
	9.2.2 Excited-State Proton-Transfer	226
	9.2.3 Excited-State Double Proton-Transfer	229
9.3	Caging Dynamics	231
	9.3.1 Caging Dynamics in Neutral Clusters	232
	9.3.2 Caging Dynamics in Anionic Clusters	234
9.4	Coulomb Explosion Process in Clusters	238
	9.4.1 Role of Clusters in the Coulomb Explosion Process	238
	9.4.2 Modeling of Coulomb Explosion Process	240
	9.4.3 Coulomb Explosion Imaging	243
9.5	Electronic Excitation, Relaxation and Ionization of Met-Cars	245
	9.5.1 Met-Cars: A Unique Molecular Cluster System	246
	9.5.2 Delayed Ionization	246
	9.5.3 Ultrafast Spectroscopy	248
9.6	Conclusion	251
	References	252
<b>10 Future Directions</b>
