Abstracts of Invited Presentations

The Mathematics of Matter and the Mathematics of Mind	1
<i>David Berlinski</i>	
A Grand Challenge: Full Reactive Modeling of a Multi-cellular Animal . . .	2
<i>David Harel (Weizmann Institute of Science)</i>	
Developing Home Robotics Products: Challenges and Lessons Learned . . .	3
<i>Udi Peless (Friendly Robotics)</i>	

Regular Contributions

Progress on Reachability Analysis of Hybrid Systems Using Predicate Abstraction	4
<i>Rajeev Alur, Franjo Ivančić (University of Pennsylvania), Thao Dang (Verimag)</i>	
Reachability Analysis of Nonlinear Systems Using Conservative Approximation	20
<i>Eugene Asarin, Thao Dang (Verimag), Antoine Girard (LMC-IMAG)</i>	
Mode Reconstruction for Source Coding and Multi-modal Control	36
<i>Adam Austin, Magnus Egerstedt (Georgia Institute of Technology)</i>	
Hybrid Control Design for a Wheeled Mobile Robot	50
<i>Thomas Bak, Jan Bendtsen, Anders P. Ravn (Aalborg University)</i>	
Modeling and Control of SMT Manufacturing Lines Using Hybrid Dynamic Systems	66
<i>L.G. Barajas, A. Kansal, A. Saxena, Magnus Egerstedt, A. Goldstein, E.W. Kamen (Georgia Institute of Technology)</i>	
Hybrid Control of an Automotive Robotized Gearbox for Reduction of Consumptions and Emissions	81
<i>Alberto Bemporad (University of Siena), Pandeli Borodani (Centro Ricerche Fiat, Italy), Massimo Mannelli (University of Siena)</i>	
A Greedy Approach to Identification of Piecewise Affine Models	97
<i>Alberto Bemporad, Andrea Garulli, Simone Paoletti, Antonio Vicino (University of Siena)</i>	

A Hoare Logic for Single-Input Single-Output Continuous-Time Control Systems	113
<i>Richard J. Boulton, Ruth Hardy, Ursula Martin (University of St Andrews)</i>	
Reachability Questions in Piecewise Deterministic Markov Processes	126
<i>Manuela L. Bujorianu, John Lygeros (University of Cambridge)</i>	
Automatic Verification of a Turbogas Control System with the Mur ϕ Verifier	141
<i>Giuseppe Della Penna, Benedetto Intrigila, Igor Melatti, Andrea Parisse (Università di L'Aquila), Michele Minichino, Ester Ciancamerla (ENEA), Enrico Tronci, Marisa Venturini Zilli (Università di Roma "La Sapienza")</i>	
Modeling the Electrical Activity of a Neuron by a Continuous and Piecewise Affine Hybrid System	156
<i>Jean-Guillaume Dumas, Aude Rondepierre (Laboratoire de Modélisation et Calcul)</i>	
Hybrid Control of Parabolic PDEs: Handling Faults of Constrained Control Actuators	172
<i>Nael H. El-Farra, Panagiotis D. Christofides (University of California, Los Angeles)</i>	
Conditions of Optimal Classification for Piecewise Affine Regression	188
<i>Giancarlo Ferrari-Trecate (INRIA), Michael Schinkel (University of Glasgow)</i>	
Approximate Stabilisation of Uncertain Hybrid Systems	203
<i>Yan Gao, John Lygeros (University of Cambridge), Marc Quincampoix (Université de Bretagne Occidentale), Nicolas Seube (ENSIETA)</i>	
Efficient Mode Enumeration of Compositional Hybrid Systems	216
<i>Tobias Geyer, Fabio Danilo Torrisi, Manfred Morari (ETH)</i>	
Automated Symbolic Reachability Analysis; with Application to Delta-Notch Signaling Automata	233
<i>Ronojoy Ghosh, Claire Tomlin (Stanford University), Ashish Tiwari (SRI International)</i>	
Modelling, Well-Posedness, and Stability of Switched Electrical Networks	249
<i>W.P.M.H. Heemels (Eindhoven University of Technology), M.K. Çamlıbel (Eindhoven University of Technology, Tilburg University, Dogus University), A.J. van der Schaft (University of Twente), J.M. Schumacher (Tilburg University)</i>	

Hybrid Modeling and Simulation of Genetic Regulatory Networks: A Qualitative Approach	267
<i>Hidde de Jong, Jean-Luc Gouzé (INRIA), Céline Hernandez (Swiss Institute of Bioinformatics), Michel Page (INRIA, École Supérieure des Affaires, Université Pierre Mendès France), Tewfik Sari (Université de Haute Alsace), Johannes Geiselmann (Université Joseph Fourier)</i>	
On Systematic Simulation of Open Continuous Systems	283
<i>Jim Kapinski, Bruce H. Krogh (Carnegie Mellon University), Oded Maler (Verimag), Olaf Stursberg (University of Dortmund)</i>	
Estimation of Distributed Hybrid Systems Using Particle Filtering Methods	298
<i>Xenofon Koutsoukos (Vanderbilt University), James Kurien, Feng Zhao (Palo Alto Research Center)</i>	
Event Prediction for Switching Linear Systems with Time Varying Thresholds Using Orthogonal Functions	314
<i>Andreas Kwiatkowski, Gerwald Lichtenberg, Axel Schild (Technische Universität Hamburg–Harburg)</i>	
On the Causality of Mixed-Signal and Hybrid Models	328
<i>Jie Liu (Palo Alto Research Center), Edward A. Lee (University of California, Berkeley)</i>	
Safety Verification of Model Helicopter Controller Using Hybrid Input/Output Automata	343
<i>Sayan Mitra, Yong Wang, Nancy Lynch, Eric Feron (MIT)</i>	
Multi-object Adaptive Cruise Control	359
<i>Rainer Möbus (DaimlerChrysler, ETH), Mato Baotic, Manfred Morari (ETH)</i>	
Universality and Language Inclusion for Open and Closed Timed Automata	375
<i>Joël Ouaknine (Carnegie Mellon University), James Worrell (Tulane University)</i>	
On the Application of Hybrid Control to CPU Reservations	389
<i>Luigi Palopoli, Luca Abeni, Giuseppe Lipari (ReTiS Laboratory – Scuola Superiore S. Anna)</i>	
Stabilization of LTI Systems with Quantized State–Quantized Input Static Feedback	405
<i>Bruno Picasso (Scuola Normale Superiore – Pisa), Antonio Bicchi (Università di Pisa)</i>	

Qualitative Heterogeneous Control of Higher Order Systems	417
<i>Subramanian Ramamoorthy, Benjamin Kuipers (University of Texas at Austin)</i>	
The Φ -Calculus: A Language for Distributed Control of Reconfigurable Embedded Systems	435
<i>William Rounds, Hosung Song (University of Michigan)</i>	
Hybrid Modelling and Control of Power Electronics	450
<i>Matthew Senesky, Gabriel Eirea, T. John Koo (University of California, Berkeley)</i>	
On the Optimal Control of Hybrid Systems: Optimization of Trajectories, Switching Times, and Location Schedules	466
<i>M. Shahid Shaikh, Peter E. Caines (McGill University)</i>	
Efficient Representation and Computation of Reachable Sets for Hybrid Systems	482
<i>Olaf Stursberg (University of Dortmund, Carnegie Mellon University), Bruce H. Krogh (Carnegie Mellon University)</i>	
Model Checking LTL over Controllable Linear Systems Is Decidable	498
<i>Paulo Tabuada, George J. Pappas (University of Pennsylvania)</i>	
Approximate Reachability for Linear Systems	514
<i>Ashish Tiwari (SRI International)</i>	
Observability of Linear Hybrid Systems	526
<i>René Vidal, Shankar Sastry (University of California, Berkeley), Alessandro Chiuso (Università di Padova), Stefano Soatto (University of California, Los Angeles)</i>	
Results and Perspectives on Computational Methods for Optimal Control of Switched Systems	540
<i>Xuping Xu (Penn State Erie), Panos J. Antsaklis (University of Notre Dame)</i>	
Author Index	557
