

Table of Contents

Preface	1
About This Book	2
The Audience of This Book	3
No Need to Read the Whole Book	3
About the Authors	8
Acknowledgements	10
1 What Pervasive Computing Is All About	11
1.1 Times Are Changing	11
1.2 Decentralization Continues	13
1.3 Applied Pervasive Computing	15
1.4 Pervasive Computing Principles	17
1.4.1 Decentralization	18
1.4.2 Diversification	18
1.4.3 Connectivity	20
1.4.4 Simplicity	21
1.5 Pervasive Information Technology	22
Part I Devices	25
2 Information Access Devices	29
2.1 Handheld Computers	29
2.2 Palm OS-Based Devices	29
2.3 Windows CE-Based Handheld Computers	34
2.4 EPOC Based- Handheld Computers	37
2.5 Sub-Notebooks	39
2.6 Phones	40
2.7 Cellular Phones	40
2.8 Data Transmission Capabilities	41
2.9 Smart Phones	43
2.10 Screenphones	44
2.11 Further Readings	45

3	Smart Identification	49
3.1	Smart Cards	49
3.1.1	What Is a Smart Card?	49
3.1.2	Smart Card Hardware	51
3.1.3	Smart Card Software	53
3.1.4	Communication Between the On-Card and Off-Card Parts	55
3.2	Smart Labels	57
3.2.1	Example Applications	60
3.3	Smart Tokens	61
3.3.1	Smart Token Examples	62
3.4	Further Readings	64
4	Embedded Controls	67
4.1	Smart Sensors and Actuators	67
4.2	Smart Appliances	72
4.2.1	The Smart Clock	72
4.2.2	Heating, Ventilation, and Air Conditioning	73
4.2.3	White Goods Appliances	74
4.3	Appliances and Home Networking	78
4.3.1	Residential Gateway	79
4.3.2	Cellular Communication	80
4.3.3	Service Provider and Residential Gateway	81
4.4	Automotive Computing	82
4.4.1	Intelligent Controls, Sensors, and Actuators	82
4.4.2	On-Board Computing Systems	83
4.4.3	In-Vehicle networks	89
4.5	Further Readings	96
5	Entertainment Systems	99
5.1	Television Systems	99
5.1.1	New Applications	99
5.1.2	Analog and Digital Broadcasting	101
5.1.3	Set-Top Boxes	102
5.1.4	New Players in the Entertainment Business	103
5.2	Game consoles	104
5.2.1	Sega Dreamcast	105
5.2.2	Sony Playstation 2	107
5.2.3	Nintendo GameCube	109
5.2.4	Microsoft Xbox	110
5.3	Further Readings	112

Part II Software115

6 Java 117

6.1 Language Characteristics 118

6.2 Java Class Libraries 119

6.3 Java Editions 121

6.4 Micro Edition 123

6.5 PersonalJava and EmbeddedJava 124

6.6 Development Tools for Java 126

6.7 Further Readings 127

7 Operating Systems 129

7.1 Windows CE 129

7.1.1 Operating System Configurations 130

7.1.2 Memory Management 131

7.1.3 Processes, Threads, and Interrupts 133

7.1.4 User Interface 134

7.1.5 Communication and Networking 136

7.1.6 Peripherals and Device Drivers 137

7.1.7 Platform-Builder – Creating a Custom OS 138

7.1.8 Developing Applications 140

7.2 Palm OS 141

7.2.1 Memory Management 142

7.2.2 Events 144

7.2.3 User Interface 145

7.2.4 Communication and Networking 145

7.2.5 Conduits 148

7.2.6 Developing Applications 149

7.3 Symbian OS 151

7.3.1 Operating System Architecture 152

7.3.2 Application Architecture 153

7.3.3 Developing Applications 154

7.3.4 A Sample Application 155

7.4 Java Card 157

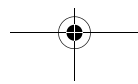

7.4.1 Java Card Framework 158

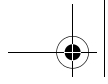

7.4.2 Lifetime of On-Card Applets and Objects 158

7.4.3 Developing a Card Applet 159

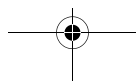

7.4.4 A Sample Applet 160

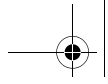

7.5 Further Readings 163

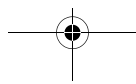

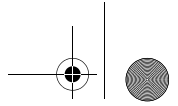

8	Client Middleware	167
8.1	Overview	167
8.2	Programming APIs	170
8.2.1	JavaPhone API	170
8.2.2	JavaTV API	172
8.2.3	WebTV	174
8.3	Smart Card Programming	176
8.3.1	OpenCard Framework	176
8.3.2	PC/SC	179
8.4	Messaging Components	182
8.4.1	WebSphere MQ Everyplace	182
8.5	Database Components	185
8.5.1	DB2 Everyplace	186
8.6	Further Readings	187
9	Security	189
9.1	The Importance of Security	189
9.2	Cryptographic Patterns and Methods	190
9.2.1	Symmetric Cryptographic Algorithms	190
9.2.2	Asymmetric Cryptographic Algorithms	194
9.2.3	How Secure Is an Algorithm?	196
9.3	Cryptographic Tools	197
9.3.1	Hash	197
9.3.2	Message Authentication Code (MAC)	197
9.3.3	Digital Signature	198
9.3.4	Certificate	199
9.4	Secure Socket Layer (SSL)	199
9.5	Further Readings	200
Part III Connecting the World		203
10	Internet Protocols and Formats	205
10.1	Hypertext Transfer Protocol (HTTP)	205
10.2	Hypertext Markup Language (HTML)	206
10.3	Extensible Markup Language (XML)	208
10.4	XForms	211
10.5	Further Readings	212

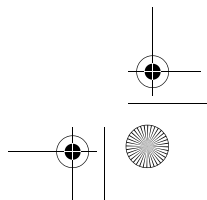

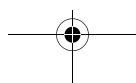

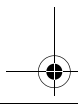

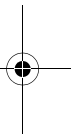

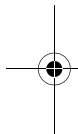

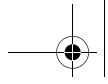

11	Mobile Internet	215
11.1	The WAP 1.1 Architecture	216
11.2	Wireless Application Environment 1.1	218
11.2.1	Wireless Markup Language	221
11.2.2	WAP Binary XML Content Format 1.1	225
11.2.3	WMLScript 1.1	225
11.3	WAP 2.0 Architecture	228
11.3.1	XHTML Mobile Profile (XHTMLMP)	229
11.4	i-mode	230
11.5	Further Readings	232
12	Voice	235
12.1	Voice Technology Trends	235
12.2	Voice on the Web	236
12.2.1	Voice Infrastructure	237
12.2.2	VoiceXML	239
12.2.3	Voice Portals	240
12.3	Standardization	241
12.4	Further Readings	242
13	Web Services	245
13.1	What are Web Services?	245
13.2	Why should one use Web Services?	246
13.3	Web Services Architecture	247
13.4	WSDL	248
13.5	UDDI	249
13.5.1	UDDI API	250
13.6	SOAP	251
13.7	Web Services Security	251
13.8	Web Services for Remote Portals (WSRP)	252
13.9	Further Readings	254
14	Connectivity	257
14.1	Wireless Wide Area Networks	257
14.1.1	Cellular Basics	257
14.1.2	Major Digital Cellular Systems	270
14.1.3	Advanced Cellular Radio Standards	277
14.2	Short Range Wireless Communication	289
14.2.1	DECT	289

14.2.2	Bluetooth	292
14.2.3	IrDA	300
14.3	Home Networks	303
14.4	Further Readings	312
15	Service Discovery	315
15.1	Universal Plug and Play	316
15.2	Jini	318
15.3	Salutation	319
15.4	Further Readings	320
Part IV Back-End Server Infrastructure		323
16	Gateways	327
16.1	Connectivity Gateway	327
16.2	Palm Webclipping Proxy Server	328
16.3	WAP Gateway	329
16.4	Wireless Gateway	330
16.5	Transcoding	331
16.6	InfoPyramid Framework	333
16.7	ProxiNet Transcoding Gateway	334
16.8	Residential Gateway	335
16.9	Further Readings	336
17	Application Servers	339
17.1	Architecture and Components	339
17.1.1	Java Servlets	340
17.1.2	Enterprise Java Beans	344
17.2	IBM WebSphere Application Server	347
17.3	Oracle9i Application Server	349
17.4	BEA WebLogic Platform	350
17.5	Sun ONE Web Server	351
17.6	Further Readings	352
18	Internet Portals	355
18.1	Portal Functional Overview	356
18.2	Types of Portals	358
18.2.1	B2E Portals	360

18.2.2	B2B Portals	361
18.2.3	B2C Portals	363
18.3	Portal Infrastructure	363
18.3.1	J2EE	364
18.3.2	Portal Structure	365
18.3.3	Portlets	367
18.4	Extensions for Mobile devices	370
18.5	Extensions for Voice Access	372
18.6	Further Readings	374
19	Device Management	377
19.1	Tasks of Device Management Systems	377
19.2	Tivoli Device Support Infrastructure	378
19.3	User Profiles and Directory Services	380
19.4	SyncML Device Management	382
19.4.1	SyncML Device Management Architecture	382
19.5	Further Readings	384
20	Synchronization	387
20.1	What Synchronization Is All About	387
20.2	Usage Models of Synchronization	387
20.3	The Challenges of Synchronizing Data	389
20.4	Industry Data Synchronization Standards	392
20.4.1	Infrared Mobile Communications (IrMC)	392
20.4.2	Wireless Application Protocol (WAP)	393
20.4.3	Third Generation Partnership Program (3GPP)	393
20.4.4	SyncML	393
20.5	Synchronization Solutions	396
20.5.1	PIM Synchronization	396
20.5.2	Synchronizing Non-PIM Databases	399
20.6	Further Readings	401
Part V	New Services	403
21	Home Services	405
21.1	The System View	405
21.2	Communication Services	406
21.3	Home Automation	407
21.4	Energy Services	408

21.5	Security Services	408
21.6	Remote Home Healthcare Services	409
21.7	Further Readings	410
22	Travel and Business Services	413
22.1	Travel Services	413
22.2	On the Ground	415
22.3	... And in the Air	416
22.4	Business Services	416
22.5	Field Support	417
22.6	Further Readings	418
23	Consumer Services	421
23.1	Interactive Advertisement	421
23.2	Loyalty	422
23.3	Shopping	422
23.4	Payment Services	423
23.5	Further Readings	424
	Part VI Appendices	425
A	Bibliography	427
B	Glossary	431
C	Index	437
