

# Contents

## About the Volume

The editors . . . . .	3
<b>Max Born and Molecular Theory</b>	
H. Rechenberg . . . . .	7

## Part I Quantum Physics: Basic Problems

<b>Trying to Divide the Universe</b>	
R. Haag . . . . .	23
<b>Modal Interpretation of Quantum Mechanics and Classical Physical Theories</b>	
R.S. Ingarden . . . . .	32
<b>On Localisation in Relativistic Quantum Mechanics</b>	
Th.W. Ruijgrok . . . . .	52
<b>Dynamical Equivalence, Commutation Relations and Noncommutative Geometry</b>	
P.C. Stichel . . . . .	75
<b>Quantum Channels of the Einstein–Podolsky–Rosen Kind</b>	
A. Uhlmann . . . . .	93

## Part II Quantum Physics: Different Approach

<b>Quantum Dynamics in the Proper Time</b>	
Z. Haba . . . . .	109
<b>Is It Possible to Construct Exactly Solvable Models?</b>	
O. Haschke and <u>W. Rühl</u> . . . . .	118

<b>Summational Invariants</b>	
H. Reeh . . . . .	141
<b>Relative Entropy Estimates in Statistical Mechanics and Field Theory</b>	
B. Zegarliński . . . . .	149
<b>Partial *-Algebras: A Retrospective</b>	
J.-P. Antoine . . . . .	161
<b>Banach Partial *-Algebras and Quantum Models</b>	
C. Trapani . . . . .	180

## Part III Supersymmetry and Quantum Deformations

<b>New Superparticle Models</b>	
<b>Outside the HLS Supersymmetry Scheme</b>	
I. Bandos and <u>J. Lukierski</u> . . . . .	195
<b>On the Implementation of Supersymmetry</b>	
D. Buchholz . . . . .	211
<b>On Generalized Quantum Statistics</b>	
W. Marcinek . . . . .	221
<b>q-Deformed Minkowski Algebra and Its Space-Time Lattice</b>	
J. Wess . . . . .	227

## Part IV Particles, Fields and Geometry

<b>The New Inverse Problem of the Newton Law</b>	
M. Gusiew-Czudżak . . . . .	237
<b>Particle in Curved 2d Space-Time</b>	
G. Jorjadze and <u>W. Piechocki</u> . . . . .	245
<b>Are There Two Sterile Neutrinos Cooscillating with <math>\nu_e</math> and <math>\nu_\mu</math>?</b>	
W. Królikowski . . . . .	251
<b>Magnetic Monopoles and Gravity</b>	
D. Maison . . . . .	263

<b>Critical Behavior of Classical Spin Models and Local Cohomology</b>	
A. Patrascioiu and E. Seiler . . . . .	279
<b>Bose-Einstein Correlations in High Energy Multiple Particle Production Processes</b>	
K. Zalewski . . . . .	291
<b>Reduction of Couplings in Massive Models of Quantum Field Theory</b>	
W. Zimmermann . . . . .	304

## Abstracts

<b>Particle-Hole Asymmetry in the BCS Thermodynamics</b>	
J. Czerwonko . . . . .	317
<b>On Generalizations of the Gravitational Interaction</b>	
L. Halpern . . . . .	318
