Table of Contents

Deciding Monotonic Games 1
Parosh Aziz Abdulla, Ahmed Bouajjani, and Julien d'Orso

The Commuting V-Diagram 15
Bernhard K. Aichernig

Concurrent Construction of Proof-Nets 29
Jean-Marc Andreoli and Laurent Mazaré

Back to the Future: Explicit Logic for Computer Science (Invited Lecture) 43
Sergei Artemov

Constraint Satisfaction with Countable Homogeneous Templates 44
Manuel Bodirsky and Jaroslav Nešetřil

Quantified Constraints: Algorithms and Complexity 58
Ferdinand Börner, Andrei Bulatov, Peter Jeavons, and Andrei Krokhin

Verification of Infinite State Systems (Tutorial) 71
Ahmed Bouajjani

Parity of Imperfection *or* Fixing Independence 72
Julian C. Bradfield

Atomic Cut Elimination for Classical Logic 86
Kai Brünnler

Computational Mathematics, Computational Logic, and Symbolic Computation (Invited Lecture) 98
Bruno Buchberger

Simple Stochastic Parity Games 100
Krishnendu Chatterjee, Marcin Jurdziński, and Thomas A. Henzinger

Machine Characterizations of the Classes of the W-Hierarchy 114
Yijia Chen and Jörg Flum

Extending the Dolev-Yao Intruder for Analyzing an Unbounded Number of Sessions 128
Yannick Chevalier, Ralf Küsters, Michaël Rusinowitch, Mathieu Turuani, and Laurent Vigneron

On Relativisation and Complexity Gap
for Resolution-Based Proof Systems 142
Stefan Dantchev and Søren Riis

Strong Normalization of the Typed λ_{ws}-Calculus 155
René David and Bruno Guillaume

A Fixed-Point Logic with Symmetric Choice 169
Anuj Dawar and David Richerby

Positive Games and Persistent Strategies 183
Jacques Duparc

Generating All Abductive Explanations for Queries
on Propositional Horn Theories 197
Thomas Eiter and Kazuhisa Makino

Refined Complexity Analysis of Cut Elimination 212
Philipp Gerhardy

Comparing the Succinctness of Monadic Query Languages
over Finite Trees 226
Martin Grohe and Nicole Schweikardt

The Arithmetical Complexity of Dimension and Randomness 241
John M. Hitchcock, Jack H. Lutz, and Sebastiaan A. Terwijn

Towards a Proof System for Admissibility 255
Rosalie Iemhoff

Program Complexity of Dynamic LTL Model Checking 271
Detlef Kähler and Thomas Wilke

Coping Polynomially with Numerous but Identical Elements
within Planning Problems 285
Max Kanovich and Jacqueline Vauzeilles

On Algebraic Specifications of Abstract Data Types 299
Bakhadyr Khoussainov

On the Complexity of Existential Pebble Games 314
Phokion G. Kolaitis and Jonathan Panttaja

Computational Aspects of Σ-Definability over the Real Numbers
without the Equality Test 330
Margarita Korovina

The Surprising Power of Restricted Programs and Gödel's Functionals 345
Lars Kristiansen and Paul J. Voda

Pebble Games on Trees 359
Łukasz Krzeszczakowski

Bistability: An Extensional Characterization of Sequentiality 372
James Laird

Automata on Lempel-Ziv Compressed Strings 384
Hans Leiß and Michel de Rougemont

Complexity of Some Problems in Modal and Intuitionistic Calculi 397
Larisa Maksimova and Andrei Voronkov

Goal-Directed Calculi for Gödel-Dummett Logics 413
George Metcalfe, Nicola Olivetti, and Dov Gabbay

A Logic for Probability in Quantum Systems 427
Ron van der Meyden and Manas Patra

A Strongly Normalising Curry-Howard Correspondence
for IZF Set Theory 441
Alexandre Miquel

The Epsilon Calculus (Tutorial) 455
Georg Moser and Richard Zach

Modular Semantics and Logics of Classes 456
Bernhard Reus

Validity of CTL Queries Revisited 470
Marko Samer and Helmut Veith

Calculi of Meta-variables 484
Masahiko Sato, Takafumi Sakurai, Yukiyoshi Kameyama,
and Atsushi Igarashi

Henkin Models of the Partial λ-Calculus 498
Lutz Schröder

Nominal Unification 513
Christian Urban, Andrew Pitts, and Murdoch Gabbay

Friends or Foes? Communities in Software Verification (Invited Lecture) . . 528
Helmut Veith

More Computation Power for a Denotational Semantics
for First Order Logic 530
Kess F.M. Vermeulen

Effective Model Completeness of the Theory
of Restricted Pfaffian Functions (Invited Lecture) 544
Nicolai Vorobjov

Effective Quantifier Elimination over Real Closed Fields (Tutorial) 545
Nicolai Vorobjov

Fast Infinite-State Model Checking in Integer-Based Systems
(Invited Lecture) 546
Tatiana Rybina and Andrei Voronkov

Winning Strategies and Synthesis of Controllers (Tutorial) 574
Igor Walukiewicz

Logical Relations for Dynamic Name Creation 575
Yu Zhang and David Nowak

Author Index 589
