

# Contents

<b>1</b>	<b>Introduction</b> .....	1
	References .....	3
<b>2</b>	<b>Warming up: Oscillators</b> .....	5
	2.1 Semiclassical Trace Formulae .....	5
	2.2 Spectral Statistics .....	14
	References .....	19
<b>3</b>	<b>Trace Formulae with Spin</b> .....	21
	3.1 The Pauli Hamiltonian .....	21
	3.2 Deriving Trace Formulae: General Strategy .....	23
	3.3 Semiclassical Time Evolution for Pauli Hamiltonians .....	26
	3.4 Spin Transport and Spin Precession .....	29
	3.5 Semiclassical Trace Formulae .....	32
	3.5.1 The Weyl term .....	34
	3.5.2 Hyperbolic Systems .....	35
	3.5.3 Integrable Systems .....	40
	3.6 Examples .....	43
	3.6.1 Reprise: Oscillators .....	43
	3.6.2 Spin–Orbit Coupling in 2 Dimensions – $\sigma p$ -Billiards ..	44
	3.6.3 The $\sigma p$ -Torus .....	45
	3.6.4 Spin–Orbit Coupling in Non-Relativistic Hydrogen ...	50
	3.7 Trace Formula for the Dirac Equation .....	54
	3.7.1 Reprise: The Dirac Oscillator .....	57
	3.8 A Different Limit of the Pauli Equation .....	59
	References .....	63
<b>4</b>	<b>Classical Dynamics of Spinning Particles – the Skew Product</b> .....	67
	4.1 The Skew Products $Y^t$ and $Y_{cl}^t$ .....	67
	4.2 Excursion: Observables for Spinning Particles .....	71
	4.3 Ergodic Properties of the Skew Product .....	73
	4.4 Integrable Systems .....	74
	4.4.1 Hamiltonian Systems – the Theorem of Liouville and Arnold .....	74

4.4.2	Integrability of the Skew Product . . . . .	76
4.5	Reprise: Trace Formula for Integrable Systems . . . . .	82
	References . . . . .	83
<b>5</b>	<b>Torus Quantisation . . . . .</b>	<b>85</b>
5.1	Quantum Mechanical Integrability . . . . .	86
5.2	EBK-Quantisation . . . . .	88
5.3	Torus Quantisation and Spin Rotation Angles . . . . .	90
5.4	Examples . . . . .	94
5.4.1	Homogeneous Magnetic Field . . . . .	94
5.4.2	The $\sigma p$ -Torus . . . . .	95
5.4.3	Rotationally Invariant Systems . . . . .	96
5.4.4	Spin-Orbit Coupling in Non-Relativistic Hydrogen . . . . .	99
5.5	Spin Rotation Angles in the Dirac Case . . . . .	102
5.6	The Sommerfeld Formula . . . . .	103
5.7	Excursion: Remarks on the General Case . . . . .	107
	References . . . . .	108
<b>6</b>	<b>Classical Sum Rules . . . . .</b>	<b>111</b>
6.1	Basic Idea . . . . .	112
6.2	Some Remarks on the Status of Sum Rules . . . . .	113
6.3	Hannay-Ozorio de Almeida Sum Rules . . . . .	115
6.3.1	Chaotic Systems . . . . .	115
6.3.2	Integrable Systems . . . . .	117
6.4	Classical Time Evolution Operators for Spinning Particles . . . . .	119
6.5	Spin in Classical Sum Rules . . . . .	120
6.5.1	Chaotic Systems . . . . .	121
6.5.2	Integrable Systems . . . . .	122
6.5.3	Partially Integrable Systems . . . . .	124
	References . . . . .	125
<b>7</b>	<b>Spectral Statistics and Spin . . . . .</b>	<b>127</b>
7.1	Symmetries and Unfolding . . . . .	129
7.2	Time Reversal Invariance in the Trace Formula . . . . .	132
7.3	Spectral Two-Point Form Factor . . . . .	133
7.3.1	Diagonal Approximation . . . . .	137
7.3.2	Chaotic Systems . . . . .	142
7.3.3	Integrable Systems . . . . .	144
7.3.4	Partially Integrable Systems . . . . .	145
7.4	Illustration: The $\sigma p$ -Rectangle . . . . .	148
7.5	Other Statistical Measures . . . . .	156
7.5.1	The Number Variance . . . . .	156
7.5.2	The Value Distribution of $N_\varepsilon^{\text{fl}}$ . . . . .	161
7.5.3	$R_2(s)$ and the Bogomolny-Keating Bootstrap . . . . .	162
	References . . . . .	167

**Appendices** ..... 171

    A The Poisson Summation Formula ..... 171

    B Solution of the Scalar Transport Equation ..... 172

    C Some Facts About the Groups  $SU(2)$  and  $SO(3)$  ..... 173

    D The Method of Stationary Phase ..... 177

    E Wigner-Weyl Calculus ..... 178

    F Remarks on the Numerical Calculation  
of the Spectral Form Factor ..... 183

References ..... 185
