

# Contents

<b>1. Introduction</b>	1.1	The Role of Astronomy .....	3
	1.2	Astronomical Objects of Research .....	4
	1.3	The Scale of the Universe .....	7
<b>2. Spherical Astronomy</b>	2.1	Spherical Trigonometry .....	9
	2.2	The Earth .....	12
	2.3	The Celestial Sphere .....	14
	2.4	The Horizontal System .....	14
	2.5	The Equatorial System .....	15
	2.6	Rising and Setting Times .....	18
	2.7	The Ecliptic System .....	18
	2.8	The Galactic Coordinates .....	19
	2.9	Perturbations of Coordinates .....	19
	2.10	Positional Astronomy .....	23
	2.11	Constellations .....	27
	2.12	Star Catalogues and Maps .....	28
	2.13	Sidereal and Solar Time .....	30
	2.14	Astronomical Time Systems .....	32
	2.15	Calendars .....	35
	2.16	Examples .....	39
	2.17	Exercises .....	42
<b>3. Observations and Instruments</b>	3.1	Observing Through the Atmosphere .....	45
	3.2	Optical Telescopes .....	47
	3.3	Detectors and Instruments .....	62
	3.4	Radio Telescopes .....	67
	3.5	Other Wavelength Regions .....	74
	3.6	Other Forms of Energy .....	77
	3.7	Examples .....	79
	3.8	Exercises .....	80
<b>4. Photometric Concepts and Magnitudes</b>	4.1	Intensity, Flux Density and Luminosity .....	81
	4.2	Apparent Magnitudes .....	83
	4.3	Magnitude Systems .....	84
	4.4	Absolute Magnitudes .....	86
	4.5	Extinction and Optical Thickness .....	86
	4.6	Examples .....	89
	4.7	Exercises .....	91
<b>5. Radiation Mechanisms</b>	5.1	Radiation of Atoms and Molecules .....	93
	5.2	The Hydrogen Atom .....	95
	5.3	Line Profiles .....	97
	5.4	Quantum Numbers, Selection Rules, Population Numbers ...	98
	5.5	Molecular Spectra .....	100

	5.6	Continuous Spectra .....	100
	5.7	Blackbody Radiation .....	101
	5.8	Temperatures .....	103
	5.9	Other Radiation Mechanisms .....	105
	5.10	Radiative Transfer .....	106
	5.11	Examples .....	107
	5.12	Exercises .....	109
<b>6. Celestial Mechanics</b>	6.1	Equations of Motion .....	111
	6.2	Solution of the Equation of Motion .....	112
	6.3	Equation of the Orbit and Kepler's First Law .....	114
	6.4	Orbital Elements .....	114
	6.5	Kepler's Second and Third Law .....	116
	6.6	Systems of Several Bodies .....	118
	6.7	Orbit Determination .....	119
	6.8	Position in the Orbit .....	119
	6.9	Escape Velocity .....	121
	6.10	Virial Theorem .....	122
	6.11	The Jeans Limit .....	123
	6.12	Examples .....	124
	6.13	Exercises .....	127
<b>7. The Solar System</b>	7.1	Planetary Configurations .....	130
	7.2	Orbit of the Earth .....	131
	7.3	The Orbit of the Moon .....	132
	7.4	Eclipses and Occultations .....	135
	7.5	The Structure and Surfaces of Planets .....	137
	7.6	Atmospheres and Magnetospheres .....	140
	7.7	Albedos .....	145
	7.8	Photometry, Polarimetry and Spectroscopy .....	147
	7.9	Thermal Radiation of the Planets .....	151
	7.10	Mercury .....	151
	7.11	Venus .....	154
	7.12	The Earth and the Moon .....	157
	7.13	Mars .....	164
	7.14	Asteroids .....	168
	7.15	Jupiter .....	172
	7.16	Saturn .....	177
	7.17	Uranus, Neptune and Pluto .....	180
	7.18	Minor Bodies of the Solar System .....	186
	7.19	Origin of the Solar System .....	192
	7.20	Other Solar Systems .....	196
	7.21	Examples .....	196
	7.22	Exercises .....	200
<b>8. Stellar Spectra</b>	8.1	Measuring Spectra .....	201
	8.2	The Harvard Spectral Classification .....	203
	8.3	The Yerkes Spectral Classification .....	205
	8.4	Peculiar Spectra .....	207

	8.5	The Hertzsprung–Russell Diagram .....	208
	8.6	Model Atmospheres .....	210
	8.7	What Do the Observations Tell Us? .....	210
	8.8	Exercise .....	212
<b>9. Binary Stars and Stellar Masses</b>	9.1	Visual Binaries .....	214
	9.2	Astrometric Binary Stars .....	214
	9.3	Spectroscopic Binaries .....	214
	9.4	Photometric Binary Stars .....	216
	9.5	Examples .....	218
	9.6	Exercises .....	219
<b>10. Stellar Structure</b>	10.1	Internal Equilibrium Conditions .....	221
	10.2	Physical State of the Gas .....	224
	10.3	Stellar Energy Sources .....	225
	10.4	Stellar Models .....	229
	10.5	Examples .....	232
	10.6	Exercises .....	234
<b>11. Stellar Evolution</b>	11.1	Evolutionary Time Scales .....	235
	11.2	The Contraction of Stars Towards the Main Sequence .....	236
	11.3	The Main Sequence Phase .....	238
	11.4	The Giant Phase .....	240
	11.5	The Final Stages of Evolution .....	242
	11.6	The Evolution of Close Binary Stars .....	244
	11.7	Comparison with Observations .....	246
	11.8	The Origin of the Elements .....	247
	11.9	Example .....	250
	11.10	Exercises .....	250
<b>12. The Sun</b>	12.1	Internal Structure .....	251
	12.2	The Atmosphere .....	253
	12.3	Solar Activity .....	257
	12.4	Example .....	263
	12.5	Exercises .....	263
<b>13. Variable Stars</b>	13.1	Classification .....	266
	13.2	Pulsating Variables .....	267
	13.3	Eruptive Variables .....	269
	13.4	Examples .....	275
	13.5	Exercises .....	276
<b>14. Compact Stars</b>	14.1	White Dwarfs .....	277
	14.2	Neutron Stars .....	278
	14.3	Black Holes .....	283
	14.4	Examples .....	286
	14.5	Exercises .....	287
<b>15. The Interstellar Medium</b>	15.1	Interstellar Dust .....	289
	15.2	Interstellar Gas .....	300
	15.3	Interstellar Molecules .....	308

	15.4	The Formation of Protostars .....	311
	15.5	Planetary Nebulae .....	313
	15.6	Supernova Remnants .....	314
	15.7	The Hot Corona of the Milky Way .....	317
	15.8	Cosmic Rays and the Interstellar Magnetic Field .....	317
	15.9	Examples .....	319
	15.10	Exercises .....	320
<b>16. Star Clusters and Associations</b>	16.1	Associations .....	321
	16.2	Open Star Clusters .....	321
	16.3	Globular Star Clusters .....	325
	16.4	Example .....	326
	16.5	Exercises .....	327
<b>17. The Milky Way</b>	17.1	Methods of Distance Measurement .....	331
	17.2	Stellar Statistics .....	333
	17.3	The Rotation of the Milky Way .....	337
	17.4	The Structure and Evolution of the Milky Way .....	343
	17.5	Examples .....	344
	17.6	Exercises .....	345
<b>18. Galaxies</b>	18.1	The Classification of Galaxies .....	347
	18.2	Luminosities and Masses .....	352
	18.3	Galactic Structures .....	355
	18.4	Dynamics of Galaxies .....	359
	18.5	Stellar Ages and Element Abundances in Galaxies .....	361
	18.6	Systems of Galaxies .....	361
	18.7	Active Galaxies and Quasars .....	364
	18.8	The Origin and Evolution of Galaxies .....	369
	18.9	Exercises .....	369
<b>19. Cosmology</b>	19.1	Cosmological Observations .....	371
	19.2	The Cosmological Principle .....	376
	19.3	Homogeneous and Isotropic Universes .....	378
	19.4	The Friedmann Models .....	379
	19.5	Cosmological Tests .....	381
	19.6	History of the Universe .....	383
	19.7	The Formation of Structure .....	384
	19.8	The Future of the Universe .....	385
	19.9	Examples .....	388
	19.10	Exercises .....	389
<b>Appendices</b> .....			391
<b>A. Mathematics</b> .....			392
	A.1	Geometry .....	392
	A.2	Conic Sections .....	392
	A.3	Taylor Series .....	394
	A.4	Vector Calculus .....	394
	A.5	Matrices .....	396

---

A.6	Multiple Integrals .....	398
A.7	Numerical Solution of an Equation .....	399
B.	Theory of Relativity .....	401
B.1	Basic Concepts .....	401
B.2	Lorentz Transformation. Minkowski Space .....	402
B.3	General Relativity .....	403
B.4	Tests of General Relativity .....	403
C.	Tables .....	405
	<b>Answers to Exercises</b> .....	425
	<b>Further Reading</b> .....	429
	<b>Photograph Credits</b> .....	433
	<b>Name and Subject Index</b> .....	435
	<b>Colour Supplement</b> .....	449
