## Part I. Prelude

---

<b>1. Introduction</b> .....	3
1.1 What Are We Talking About? .....	3
1.2 What Are We Trying to Do? .....	6
1.3 What's in the Book?.....	7
<b>2. Setting the Stage</b> .....	9
2.1 Modeling and Code Generation .....	9
2.2 Requirements .....	12
2.3 Inter-Object vs. Intra-Object Behavior .....	14
2.4 Live Sequence Charts (LSCs) .....	16
2.5 Testing, Verification and Synthesis .....	17
2.6 The Play-In/Play-Out Approach .....	21
<b>3. An Example-Driven Overview</b> .....	25
3.1 The Sample System .....	25
3.2 Playing In .....	26
3.3 Playing Out .....	39
3.4 Using Play-Out for Testing .....	43
3.5 Transition to Design .....	44
3.6 Time .....	46
3.7 Smart Play-Out .....	47

---

## Part II. Foundations

---

<b>4. The Model: Object Systems</b> .....	55
4.1 Application Types.....	55
4.2 Object Properties .....	56
4.3 And a Bit More Formally ... ..	58

<b>5. The Language: Live Sequence Charts (LSCs)</b> .....	59
5.1 Constant LSCs .....	60
5.2 Playing In .....	62
5.3 The General Play-Out Scheme .....	65
5.4 Playing Out .....	68
5.5 Combining Locations and Messages .....	71
5.6 And a Bit More Formally ... ..	73
5.7 Bibliographic Notes .....	81
<b>6. The Tool: The Play-Engine</b> .....	83
6.1 Bibliographic Notes .....	87

---

### Part III. Basic Behavior

---

<b>7. Variables and Symbolic Messages</b> .....	91
7.1 Symbolic Scenarios .....	91
7.2 Enriching the Partial Order .....	94
7.3 Playing Out .....	97
7.4 And a Bit More Formally ... ..	99
7.5 Bibliographic Notes .....	103
<b>8. Assignments and Implemented Functions</b> .....	105
8.1 Using Implemented Functions .....	105
8.2 Assignments .....	108
8.3 Playing Out .....	111
8.4 And a Bit More Formally ... ..	114
<b>9. Conditions</b> .....	119
9.1 Cold Conditions .....	119
9.2 Hot Conditions .....	120
9.3 Playing In .....	121
9.4 Playing Out .....	126
9.5 And a Bit More Formally ... ..	128
9.6 Bibliographic Notes .....	132
<b>10. Branching and Subcharts</b> .....	133
10.1 The If-Then-Else Construct .....	133
10.2 Subcharts .....	134
10.3 Nondeterministic Choice .....	135
10.4 Playing In .....	136
10.5 Playing Out .....	138

10.6 And a Bit More Formally ... 141  
 10.7 Bibliographic Notes ... 146

---

**Part IV. Advanced Behavior: Multiple Charts**

---

**11. Executing Multiple Charts** ... 149  
 11.1 Simultaneous Activation of Multiple Charts ... 149  
 11.2 Overlapping Charts ... 154  
 11.3 And a Bit More Formally ... 157

**12. Testing with Existential Charts** ... 159  
 12.1 Specifying Test Scenarios ... 159  
 12.2 Monitoring LSCs ... 160  
 12.3 Recording and Replaying ... 163  
 12.4 On-line Testing ... 164  
 12.5 Executing and Monitoring LSCs in the Play-Engine ... 165  
 12.6 And a Bit More Formally ... 166  
 12.7 Bibliographic Notes ... 171

---

**Part V. Advanced Behavior: Richer Constructs**

---

**13. Loops** ... 175  
 13.1 Using Loops ... 175  
 13.2 Playing In ... 176  
 13.3 Playing Out ... 178  
 13.4 Using Variables Within Loops ... 179  
 13.5 Executing and Monitoring Dynamic Loops ... 181  
 13.6 And a Bit More Formally ... 183  
 13.7 Bibliographic Notes ... 187

**14. Transition to Design** ... 189  
 14.1 The Design Phase ... 189  
 14.2 Incorporating Internal Objects ... 190  
 14.3 Calling Object Methods ... 193  
 14.4 Playing Out ... 196  
 14.5 External Objects ... 198  
 14.6 And a Bit More Formally ... 201  
 14.7 Bibliographic Notes ... 205

<b>15. Classes and Symbolic Instances</b> .....	209
15.1 Symbolic Instances .....	209
15.2 Classes and Objects .....	210
15.3 Playing with Simple Symbolic Instances .....	212
15.4 Symbolic Instances in the Main Chart .....	213
15.5 Quantified Binding .....	215
15.6 Reusing a Scenario Prefix .....	216
15.7 Symbolic Instances in Existential Charts .....	218
15.8 An Advanced Example: NetPhone .....	218
15.9 And a Bit More Formally ... ..	221
15.10 Bibliographic Notes .....	227
<b>16. Time and Real-Time Systems</b> .....	229
16.1 An Example .....	229
16.2 Adding Time to LSCs .....	230
16.3 Hot Timing Constraints .....	231
16.4 Cold Timing Constraints .....	234
16.5 Time Events .....	235
16.6 Playing In .....	236
16.7 Playing Out .....	237
16.8 Unification of Clock Ticks .....	239
16.9 The Time-Enriched NetPhone Example .....	240
16.10 And a Bit More Formally ... ..	242
16.11 Bibliographic Notes .....	247
<b>17. Forbidden Elements</b> .....	251
17.1 Example: A Cruise Control System .....	251
17.2 Forbidden Messages .....	252
17.3 Generalized Forbidden Messages .....	255
17.4 Symbolic Instances in Forbidden Messages .....	256
17.5 Forbidden Conditions .....	258
17.6 Scoping Forbidden Elements .....	262
17.7 Playing Out .....	264
17.8 Using Forbidden Elements with Time .....	266
17.9 A Tolerant Semantics for LSCs .....	267
17.10 And a Bit More Formally ... ..	268
17.11 Bibliographic Notes .....	277

---

**Part VI. Enhancing the Play-Engine**

---

<b>18. Smart Play-Out (with H. Kugler)</b> .....	281
18.1 Introduction .....	281
18.2 Being Smart Helps .....	283
18.3 The General Approach .....	287
18.4 The Translation .....	289
18.5 Current Limitations .....	299
18.6 Satisfying Existential Charts .....	301
18.7 Bibliographic Notes .....	307
<b>19. Inside and Outside the Play-Engine</b> .....	309
19.1 The Engine's Environment .....	309
19.2 Playing In .....	310
19.3 Playing Out .....	311
19.4 Recording Runs and Connecting External Applications .....	313
19.5 Additional Play-Engine Features .....	313
<b>20. A Play-Engine Aware GUI Editor</b> .....	317
20.1 Who Needs a GUI Editor? .....	317
20.2 GUIEdit in Visual Basic .....	318
20.3 What Does GUIEdit Do? .....	318
20.4 Incorporating Custom Controls .....	321
20.5 GUIEdit As a Proof of Concept .....	321
20.6 Bibliographic Notes .....	322
<b>21. Future Research Directions</b> .....	323
21.1 Object Refinement and Composition .....	323
21.2 Object Model Diagrams, Inheritance and Interfaces .....	325
21.3 Dynamic Creation and Destruction of Objects .....	326
21.4 Structured Properties and Types .....	327
21.5 Linking Multiple Engines .....	328

---

**Part VII. Appendices**

---

<b>A. Formal Semantics of LSCs</b> .....	333
A.1 System Model and Events .....	333
A.2 LSC Specification .....	336
A.3 Operational Semantics .....	342

<b>B. XML Description of a GUI Application</b> .....	357
<b>C. The Play-Engine Interface</b> .....	361
C.1 Visual Basic Code.....	361
<b>D. The GUI Application Interface</b> .....	363
D.1 Visual Basic Code.....	364
<b>E. The Structure of a (Recorded) Run</b> .....	367
<b>References</b> .....	369
<b>Index</b> .....	375
